KYLER BATES

Material Feminisms University of Delaware Press
NATIONAL BESTSELLER • “Steven Pressfield brings the battle of Thermopylae to brilliant life.”—Pat Conroy
At Thermopylae, a rocky mountain pass in northern Greece, the feared and admired Spartan soldiers stood three hundred strong. Theirs was a suicide mission, to hold the pass against the invading millions of the mighty Persian army. Day after bloody day they withstood the terrible onslaught, buying time for the Greeks to rally their forces. Born into a cult of spiritual courage, physical endurance, and unmatched battle skill, the Spartans would be remembered for the greatest military stand in history—one that would not end until the rocks were awash with blood, leaving only one gravely injured Spartan squire to tell the tale. . . .

Medieval Religion and Technology Cambridge University Press
This book explores the role of the social and natural sciences in supporting the development of indigenous knowledge systems. It looks at how indigenous knowledge systems can impact on the transformation of knowledge generating institutions such as scientific and higher education institutions on the one hand, and the policy domain on the other.
World History Shorts 2 University of Pennsylvania Press
Harnessing the energy of provocative theories generated by recent understandings of the human body, the natural world, and the material world, *Material Feminisms* presents an entirely new way for feminists to conceive of the

question of materiality. In lively and timely essays, an international group of feminist thinkers challenges the assumptions and norms that have previously defined studies about the body. These wide-ranging essays grapple with topics such as the material reality of race, the significance of sexual difference, the impact of disability experience, and the complex interaction between nature and culture in traumatic events such as Hurricane Katrina. By insisting on the importance of materiality, this volume breaks new ground in philosophy, feminist theory, cultural studies, science studies, and other fields where the body and nature collide.

Poetry and Bondage Bantam
New York Times bestselling author Lauren Tarshis tackles the historic grizzly bear attacks in Glacier National Park in this latest installment of the groundbreaking *I Survived* series. No grizzly has ever killed a human in Glacier before . . . until tonight. Eleven-year-old Melody Vega and her family come to Glacier National Park every year, and it's always been a place where she can forget her troubles. But this year is different. With Mom gone, every moment in the park is a heartbreaking reminder of the past. Then Mel comes face-to-face with the mighty grizzly. Now her only thought is one of survival. Mel will soon be a part of one of the most tragic seasons in the history of America's national parks - a summer of terror that will forever change ideas about how grizzlies and humans can exist together in the wild.

Antiquarian Bookman New Africa Books
The Pearson IIT-Foundation Series has been designed to provide a clear understanding of the pattern and the

concepts critical to succeed in JEE and other talent search exams like NTSE, Olympiads, KVPY etc. Comprising of twelve titles spread across Physics, Chemistry and Mathematics, this series caters to students of classes VII to X. The core objective of the series is to help aspiring students understand the basic concepts with more clarity, in turn, helping them to master the art of problem-solving.

A detailed study of seventeenth century farming practices and their relevance for today. We are today grappling with the consequences of disastrous changes in our farming and food systems. While the problems we face have reached a crisis point, their roots are deep. Even in the seventeenth century, Frances E. Dolan contends, some writers and thinkers voiced their reservations, both moral and environmental, about a philosophy of improvement that rationalized massive changes in land use, farming methods, and food production. Despite these reservations, the seventeenth century was a watershed in the formation of practices that would lead toward the industrialization of agriculture. But it was also a period of robust and inventive experimentation in what we now think of as alternative agriculture. This book approaches the seventeenth century, in its failed proposals and successful ventures, as a resource for imagining the future of agriculture in fruitful ways. It invites both specialists and non-specialists to see and appreciate the period from the ground up. Building on and connecting histories of food and work, literary criticism of the pastoral and georgic, histories of elite and vernacular science, and histories of reading and writing practices, among

other areas of inquiry, *Digging the Past* offers fine-grained case studies of projects heralded as innovations both in the seventeenth century and in our own time: composting and soil amendment, local food, natural wine, and hedgerows. Dolan analyzes the stories seventeenth-century writers told one another in letters, diaries, and notebooks, in huge botanical catalogs and flimsy pamphlets, in plays, poems, and how-to guides, in adages and epics. She digs deeply to assess precisely how and with what effect key terms, figurations, and stories galvanized early modern imaginations and reappear, often unrecognized, on the websites and in the tour scripts of farms and vineyards today.

The War Below Metropolitan Museum of Art

The Racial Contract puts classic Western social contract theory, deadpan, to extraordinary radical use. With a sweeping look at the European expansionism and racism of the last five hundred years, Charles W. Mills demonstrates how this peculiar and unacknowledged "contract" has shaped a system of global European domination: how it brings into existence "whites" and "non-whites," full persons and sub-persons, how it influences white moral theory and moral psychology; and how this system is imposed on non-whites through ideological conditioning and violence. The Racial Contract argues that the society we live in is a continuing white supremacist state. As this 25th anniversary edition—featuring a foreword by Tommy Shelbie and a new preface by the author—makes clear, the still-urgent *The Racial Contract* continues to inspire, provoke, and influence thinking about the intersection of the racist underpinnings of political philosophy.

Comparative Administrative Law

Indiana University Press

Includes both books and articles.

Texas Ranger Univ of California Press

The emphasis of the inquiry in *Reconfiguring Human, Nonhuman and Posthuman in Literature and Culture* is on the various ways actual and fictional nonhumans are reconfigured in contemporary culture.

Digging the Past Harvard University Press

This companion novel to Skrypuch's *Making Bombs for Hitler* follows a boy who joins the underground Ukrainian resistance in the fight against Hitler. The Nazis took Luka from his home in Ukraine and forced him into a labor camp. Now, Luka has smuggled himself out -- even though he left behind his dearest friend, Lida. Someday, he vows, he'll find her again. But first, he must survive. Racing through the woods and mountains, Luka evades capture by both Nazis and Soviet agents. Though he finds some allies, he never knows who to trust. As Luka makes difficult choices in order to survive, desperate rescues and guerilla raids put him in the line of fire. Can he persevere long enough to find Lida again or make it back home where his father must be waiting for him? Marsha Forchuk Skrypuch, author of *Making Bombs for Hitler*, delivers another action-packed story, inspired by true events, of daring quests and the crucial decisions we make in the face of war.

Essays fra 1940-1975, med

udgangspunkt i middelalderens teknologiske frembringelser, og videnskabsmænd.

Animal Encounters Cambridge University Press

"You might think that dancing doesn't have a lot to do with social research, and doing social research is probably why you picked this book up in the first place. But trust me. Salsa dancing is a practice as well as a metaphor for a kind of research that will make your life easier and better." Savvy, witty, and sensible, this unique book is both a handbook for defining and completing a research project, and an astute introduction to the neglected history and changeable philosophy of modern social science. In this volume, Kristin Luker guides novice researchers in: knowing the difference between an area of interest and a research topic; defining the relevant parts of a potentially infinite research literature; mastering sampling, operationalization, and generalization; understanding which research methods best answer your questions; beating writer's block. Most important, she shows how friendships, non-academic interests, and even salsa dancing can make for a better researcher. "You know about setting the kitchen timer and writing for only an hour, or only 15 minutes if you are feeling particularly anxious. I wrote a fairly large part of this book feeling exactly like that. If I can write an entire book 15 minutes at a time, so can you."

Reconfiguring Human, Nonhuman and Posthuman in Literature and Culture

Simon and Schuster

Levinas and Nineteenth-Century Literature presents nine essays that reread major British, American, and European nineteenth-century literary texts in light of the post-deconstruction

ethical philosophy of Emmanuel Levinas. The first section pursues in essays on Wordsworth, Coleridge, De Quincey, and Baudelaire connections between Levinas's radical rethinking of subjectivity and Romantic generic, aesthetic, and conceptual innovation. The second section explores how Levinas's analysis of totalizing thought may illuminate how Poe, Emerson, Hawthorne, Douglass, Susan Warner, and Melville grapple with American experience and culture. The third section considers the relevance of Levinas's work for reassessments of the realist novel through essays on Austen, Dickens, and George Eliot. Essay authors are A.C. Goodson, David P. Haney, E.S. Burt, Alain Paul Toumayan, N.S. Boone, Lorna Wood, Donald R. Wehrs, Melvyn New, and Rachel Hollander. Donald R. Wehrs is Associate Professor of English at Auburn University. David P. Haney is Vice Provost for Undergraduate Education and Professor of English at Appalachian State University.

The New Yorker Springer-Verlag
From the 1880s to the 1950s, pioneering American artists drew upon the rich traditions and recent innovations of European and Asian ceramics to develop new designs, decorations, and techniques. The extraordinary range and inventiveness of these American interpretations of international trends—from the Arts and Crafts and Art Deco movements to the modernism of Matisse and the Wiener Werkstätte to abstracted, minimalist styles—are exemplified in this book by more than 180 works from the outstanding collection of Martin Eidelberg. Splendid new photography and engaging essays by two of the foremost experts on American art pottery trace the period's decorative developments, from

sculptural and painted ornament to adornment with deeply colored glazes and textures. Featured makers include the renowned Rookwood, Grueby, and Van Briggles Potteries, as well as leading artists such as Maija Grotell, George E. Ohr, Frederick Hurten Rhead, Louis C. Tiffany, Rockwell Kent, Adelaide Alsop Robineau, and Leza McVey. A vivid and accessible overview of American ceramics and ceramists of the late nineteenth and early twentieth centuries, *Gifts from the Fire* reveals how artists working in the United States drew upon diverse, global influences to produce works of astonishing variety and ingenuity.

Salsa Dancing into the Social Sciences
Penguin

The New York Times bestseller! "Frank Hamer, last of the old breed of Texas Rangers, has not fared well in history or popular culture. John Boessenecker now restores this incredible Ranger to his proper place alongside such fabled lawmen as Wyatt Earp and Eliot Ness. Here is a grand adventure story, told with grace and authority by a master historian of American law enforcement. Frank Hamer can rest easy as readers will finally learn the truth behind his amazing career, spanning the end of the Wild West through the bloody days of the gangsters." --Paul Andrew Hutton, author of *The Apache Wars* To most Americans, Frank Hamer is known only as the "villain" of the 1967 film *Bonnie and Clyde*. Now, in *Texas Ranger*, historian John Boessenecker sets out to restore Hamer's good name and prove that he was, in fact, a classic American hero. From the horseback days of the Old West through the gangster days of the 1930s, Hamer stood on the front lines of some of the most important and exciting periods in American history. He

participated in the Bandit War of 1915, survived the climactic gunfight in the last blood feud of the Old West, battled the Mexican Revolution's spillover across the border, protected African Americans from lynch mobs and the Ku Klux Klan, and ran down gangsters, bootleggers, and Communists. When at last his career came to an end, it was only when he ran up against another legendary Texan: Lyndon B. Johnson. Written by one of the most acclaimed historians of the Old West, *Texas Ranger* is the first biography to tell the full story of this near-mythic lawman.

The Cultural Nature of Human Development Lulu.com

Born in the stables of the Sultan of Morocco, an Arabian stallion named Sham is taken to England, along with the loyal yet mute Arab stable boy who tends to him, and becomes one of the founding sires of the Thoroughbred breed.

The Book of Night Women Routledge
Three-year-old Kwara'ae children in Oceania act as caregivers of their younger siblings, but in the UK, it is an offense to leave a child under age 14 ears without adult supervision. In the Efe community in Zaire, infants routinely use machetes with safety and some skill, although U.S. middle-class adults often do not trust young children with knives. What explains these marked differences in the capabilities of these children? Until recently, traditional understandings of human development held that a child's development is universal and that children have characteristics and skills that develop independently of cultural processes. Barbara Rogoff argues, however, that human development must be understood as a cultural process, not simply a biological or psychological one.

Individuals develop as members of a community, and their development can only be fully understood by examining the practices and circumstances of their communities.

I Survived the Attack of the Grizzlies, 1967 (I Survived #17) Scholastic Inc.
Photographs and text explain the causes and effects of volcanoes and earthquakes and examine specific occurrences throughout history.

When Modern Was Green Indiana University Press

The use of assisted reproductive technologies (ART)--in vitro fertilization, artificial insemination, and gestational surrogacy--challenges contemporary notions of what it means to be parents or families. Camisha A. Russell argues that these technologies also bring new insight to ideas and questions surrounding race. In her view, if we think of ART as medical technology, we might be surprised by the importance that people using them put on race, especially given the scientific evidence that race lacks a genetic basis. However if we think of ART as an intervention to make babies and parents, as technologies of kinship, the importance placed on race may not be so surprising after all. Thinking about race in terms of technology brings together the common academic insight that race is a social construction with the equally important insight that race is a political tool which has been and continues to be used in different contexts for a variety of ends, including social cohesion, economic exploitation, and political mastery. As Russell explores ideas about race through their role in ART, she brings together social and political views to shift debates from what race is to what race does, how it is used, and what effects it has had in the world.
