We live in a world where disaster incidents are on the rise. From natural disasters to war and conflict to infectious diseases, being prepared for such events takes tremendous preparation and practice. Nurses are on the frontlines of disaster relief and care, but too few are trained in disaster prep, response, and recovery. Further, too few nurse faculty have personal, real-world experience in responding to natural and man-made disasters. So, where to start? How do nurse faculty members fit

one more thing into a course or curriculum? And how do nurses stay on top of their game when it comes to disaster and emergency preparedness? *Designing and Implementing a Disaster Preparedness Curriculum: Readyng Nurses for the Worst* presents a curriculum blueprint for nurse educators that provides readers with the best practices for implementation while avoiding pitfalls and mistakes. Disaster preparation experts Sharon Stanley and Thola Wolanski help ensure that nursing students are as prepared as possible to respond to disasters, whether in their own neighborhoods or around the world, by giving nurse educators

strategies and solutions for incorporating disaster preparedness into their curriculum. *Davis's Q&A Review For NCLEX-RN* Simon and Schuster It's a fun, visual review for the NCLEX! *Illustrated Study Guide for the NCLEX-RN® Exam, 8th Edition* covers all the nursing concepts and content found on the latest NCLEX-RN examination.
