Homelessness & Health in Canada Springer Science & Business Media

La liste exhaustive des ouvrages disponibles publiés en langue française dans le monde. La liste des éditeurs et la liste des collections de langue française.

*Causes of Conduct Disorder and Juvenile Delinquency* OECD Publishing

Government at a Glance Southeast Asia 2019 is the first edition in the Government at a Glance series for the region. It provides the latest available data on public administrations in the 10 ASEAN member countries: Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Viet Nam.

**Body and Affect in the Intercultural Encounter** Springer Science & Business Media

Beginning in 1983/84 published in 3 vols., with expansion to 6 vols. by 2007/2008: vol. 1--Organization descriptions and cross references; vol. 2--Geographic volume: international organization participation; vol. 3--Subject volume; vol. 4--Bibliography and resources; vol. 5--Statistics, visualizations and patterns; vol. 6--Who's who in international organizations. (From year to year some slight variations in naming of the volumes).

World Health Statistics 2009 (Chinese) Springer Science & Business Media

In July 2020, the Investment Committee recommended to Council to invite Uruguay to become the 50th adherent to the OECD Declaration on International Investment and Multinational Enterprises. This OECD Investment Policy Review of Uruguay documents the progress made in recent years to align investment policies with the national development strategy in pursuit of the Sustainable Development Goals (SDGs).

Yearbook of International Organizations KARTHALA Editions

Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In

order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.

*Human Immunodeficiency Virus Infection in the United States* African Books Collective

A La Réunion c'est côte à côte, bien plus que face à face, que la médecine et les autres pratiques de soin sont le lot quotidien de l'interprétation de la maladie et de sa prise en charge : quel soignant n'a été un jour propulsé au cœur de l'espace incertain où se rencontrent la maladie, les religions, la quête de soin et de sens face à la douleur et à la mort ? Quel est l'ethnologue, l'historien, le responsable administratif ou politique qui n'y a pas été convié malgré lui ? C'est l'effort de l'anthropologie médicale que d'aider à mettre de la clarté dans tout ce qui semble, en ces domaines, obscur. Ce volume collectif, coordonné par Jean Benoist, est destiné à ceux qui sont peu familiers du domaine de l'anthropologie médicale mais qui souhaitent participer à son essor. Panorama des questions et des perspectives, il est aussi un bilan, que trace une riche bibliographie finale.

*Cumulated Index Medicus* University of Ottawa Press

Evolution of Awareness, the debut poetry collection from Kia Marlene, is a book about a spiritual journey towards enlightenment. The collection consists of 6 chapters, titled "The Egg," "The Caterpillar," "Intermission (heartbreak&love)," "The Cocoon," "The Butterfly," and a chapter titled "Knock Knock." Through numerous poems this book outlines various thoughts, questions and eventual answers concerning our collective greater purpose in life, self love, consciousness, and personhood. The author intends for this book to help broaden the reader's general perception, view of their environment, awareness, and sense of self.

Bulletin d'information et de documentation Guilford Press

An Archaeology of Posing compiles two decades of new and previously published writing on gay culture by one of the field's most provocative and outspoken critics. Diverging from the text-based premise of most queer theory, Meyer utilizes performance studies and interpretive anthropology to examine camp and drag performances in the spaces in which they appear. He explores a variety of topics--from transsexual striptease and Harlem drag balls to the death of camp--within the genre of queer drag and sexuality performance. This collection of essays, with Meyer's rejection of gender parity and his celebration of the effeminate gay male body, presents a fresh interpretation of established art forms. From the pre-Stonewall era to the present day, Meyer's cultural critique redefines how we understand the phenomena of camp and drag.

*Handbook of Medical Neuropsychology* Cambridge University Press

This open access book focuses on practical clinical problems that are frequently encountered in stroke rehabilitation. Consequences of diseases, e.g. impairments and activity limitations, are addressed in rehabilitation with the overall goal to reduce disability and promote participation. Based on the available best external evidence, clinical pathways are described for stroke rehabilitation bridging the gap between clinical evidence and clinical decision-making. The clinical pathways answer the questions which rehabilitation treatment options are beneficial to overcome specific impairment constellations and activity

limitations and are well acceptable to stroke survivors, as well as when and in which settings to provide rehabilitation over the course of recovery post stroke. Each chapter starts with a description of the clinical problem encountered. This is followed by a systematic, but concise review of the evidence (RCTs, systematic reviews and meta-analyses) that is relevant for clinical decision-making, and comments on assessment, therapy (training, technology, medication), and the use of technical aids as appropriate. Based on these summaries, clinical algorithms / pathways are provided and the main clinical-decision situations are portrayed. The book is invaluable for all neurorehabilitation team members, clinicians, nurses, and therapists in neurology, physical medicine and rehabilitation, and related fields. It is a World Federation for NeuroRehabilitation (WFNR) educational initiative, bridging the gap between the rapidly expanding clinical research in stroke rehabilitation and clinical practice across societies and continents. It can be used for both clinical decision-making for individuals and as well as clinical background knowledge for stroke rehabilitation service development initiatives.

**Current Catalog** McGraw Hill Professional

Toute action ou réaction face à une maladie est guidée par l'idée que nous nous en faisons, par notre façon de l'interpréter, de la penser. Cet ouvrage montre les liens entre, d'une part, les représentations sociales et médicales d'une maladie et, d'autre part, la nature des traitements proposés et les représentations de l'expérience du malade dans un contexte institutionnel de prise en charge. L'étude se concentre sur la tuberculose parce que, tout en étant moins spectaculaire que les épidémies de typhus ou de choléra, elle a néanmoins suscité une grande inquiétude dans la première moitié du XXe siècle, et ce partout en Occident. Comme le sida aujourd'hui, la tuberculose fut longtemps perçue comme un mal sournois et mortel, qui prospérait sous des conditions et dans un environnement particulier. Au Québec comme ailleurs, cette perception eut un impact certain sur les tuberculeux et sur leur expérience de la maladie.

*OECD Investment Policy Reviews: Uruguay* Springer Nature  
Women, especially young women, have increasing infection rates from HIV/AIDS and the death rate among women is now almost as high as men.

*Santé, société et cultures à La Réunion* Presses de l'Université

Laval

This comprehensive reference book addresses the unique challenges facing many African nations as poor infrastructure and economics continue to obstruct access to advanced treatments and AIDS care training. It takes into account the context of settings with limited resources. Information on how to best utilize existing resources and prioritize scaling-up of infrastructure is a critical aspect of this book for those working in HIV/AIDS-related fields in Africa.

*Les Livres disponibles* Springer Science & Business Media

"Brings together leading and emerging researchers to advance understanding of the complex relationships between homelessness and health. Covering a wide range of topics from youth homelessness to end-of-life care, contributors outline policy and practice recommendations to respond to this public health crisis."--Back cover.

*Evolution of Awareness* BibliotecaOnline SL

A great deal has been learned about serious child and adolescent conduct problems, but their causes are still not well understood. This book brings together an international group of leading authorities to advance specific, testable hypotheses about the causes of conduct disorder and juvenile delinquency. Four general causal models are delineated: the social learning model, the developmental pathways model, an integrative antisocial propensity model, and an integrative ecological/developmental model. Also provided are models focusing on specific aspects of the origins of conduct problems, including contextual, psychological, and biological influences. The authors present significant, original theoretical work and map out the kinds of further studies needed to confirm or disconfirm their new or revised hypotheses.

*Motivational Interviewing* OECD Publishing

This interdisciplinary volume reflects on the effects of recent discoveries in genetics on a broad range of scientific fields. It shows the way in which those discoveries influence genetics itself and many other fields, and explains the impact of genetics on contemporary culture. The volume contains the most recent views of the Nobel Laureate François Jacob on genetics and the nature of living things.

*Bibliography of the History of Medicine* Oxford University Press

A comprehensive review of vascular disease in the vertebrobasilar

circulation by one of the world's leading authorities, fully updated throughout.

**Artificial Intelligence in Society** OECD Publishing

The volume draws from Ren Devischs encounters with groups in southsaharan Africa, primarily. The author had the privilege to immerse himself, around the clock, in the Yakaphones activities and thoughts in southwest DR Congo from 1972 to 1974, and intermittently in Kinshasas shanty towns, from 1986 to 2003. The author first examines what sparked his choice to come to Congo, and then to pursue research among the Yakaphones in the borderland with Angola. He then invites us to follow the trajectory of his plural anthropological view on today's multicentric world. It leads us to his praise for honorary doctor Jean-Marc Elas work. He then examines the proletarian outbursts of violence that rocked Congos major cities in 1991 and 1993. These can be read as a settling of scores with the disillusioning colonial and missionary modernisation, along with president Mobutus millenarian Popular Movement of the Revolution. Furthermore, after considering the morose reduction of a major Yaka dancing mask into a mere museum-bound curio in Antwerp, the book unravels the Yakaphones perspectives on spirits and sorcery's threat. It also analyses their commitment to classical Bantu-African healing cults, along with their parallel consulting physicians and healers. By sharing the Yakaphones life-world, the analysis highlights their body-group-world weave, interlaced by the principle of co-resonance. A phenomenological and perspectivist look unfolds the local actors views, thereby disclosing the Bantu-African genius and setting for a major reversal of perspectives. Indeed, seeing 'here' from 'there' allows the author to uncover some alienating dynamics at work in his native Belgian Flemish-speaking culture. To better grasp the realm of life beyond the speakable and factual reasoning, the approach occasionally turns to the later Lacans focus on the unconscious desire, the body and its affects. The book addresses students and researchers in the humanities and, more broadly, all those immersed in the heat of the encounter with the culturally different.

First multi-year cumulation covers six years: 1965-70.

*En garde ... tuberculose* Commonwealth Secretariat

The artificial intelligence (AI) landscape has evolved significantly

from 1950 when Alan Turing first posed the question of whether machines can think. Today, AI is transforming societies and economies. It promises to generate productivity gains, improve well-being and help address global challenges, such as climate change, resource scarcity and health crises.

The Influence of Genetics on Contemporary Thinking Guilford  
Publication

This book is a concise and practical compendium of

neuropathological information for all professionals whose responsibility it is to make diagnoses, care, and help elderly humans afflicted with neurological and/or psychiatric disorders. The term neuropathology includes a multitude of disciplines including pathology, histology, genetics, immunology, biochemistry, radiology, etc. This disciplinary approach is reflected in this book. This new edition has been completely

revised and brought up to date from the 20th to the 21st century. Basic neuroscientists were invited to contribute chapters explaining and describing basic scientific principles underlying the neuropathological disciplines. Also, additional information is provided concerning medic-legal issues, neuropharmacology, and a list of support groups for the elderly neurologically or mentally impaired in Brazil, Canada, Germany, the United Kingdom, and the USA.
