"This book is intended to drive home the fundamental ideas of managerial accounting and motivate students to actually want to study the subject. As you will see, the text has a number of unique features that help accomplish these goals. Based on my teaching experience and from what we have heard from professors using the previous editions, we believe students and professors want a textbook that: Recognizes that most students will become managers, not accountants Focuses attention on decision making Stresses the fact that "You Get What You Measure" Motivates students to learn managerial accounting by connecting concepts and techniques to the real world Recognizes the importance of service businesses Is clear, concise and current"

The twenty-second volume of *Advances in Accounting* continues to provide an important forum for discourse among and between academic and practicing accountants on issues of significance to the future of the discipline. Emphasis continues to be placed on original commentary, critical analysis and creative research – research that promises to substantively advance our understanding of financial markets, behavioral phenomenon and regulatory policy. Technology and aggressive global competition have propelled tremendous changes over the two decades since AIA was founded. A wide array of unsolved questions continues to plague a profession under fire in the aftermath of one financial debacle after another and grabbing with the advent of international accounting standards. This volume of *Advances in Accounting* not surprisingly includes several articles reflective on auditor independence, auditor tenure, auditor rotation and non-audit service fees. This volume also looks at challenges facing the academic community with respect to pressures placed on faculty to publish; a data driven commentary is provided by the incoming editor of the *European Accounting Review*. Other papers examine the use of financial data to estimate risk premiums, and measure the operating efficiency of firms; and re-examine market reaction to quarterly earnings. AIA continues its commitment to the global arena by publishing several papers with an international perspective. As never before the accounting profession is seeking ways to reinvent itself and recapture relevance and credibility. AIA likewise continues to champion forward thinking research. *Addresses the role of the auditor *Investigates how financial data is represented, used, and

received *Scope of content is international

Originally published in 1983 and as a second edition in 1988. An attempt is made in this book to disentangle some of the professional, ethical, political, theoretical and practical issues involved in curriculum evaluation. This book presents evidence concerning a number of evaluation strategies and techniques, drawing on experience in several countries, including the UK, Australia and the US, to debate the potential of insider and outsider approaches to evaluation, and combinations of the two. It also offers a practical source book for those wishing to plan and

conduct curriculum evaluations. Finally, it considers the crucial question of how evaluation can influence curriculum action and, thereby, teaching and learning.

Performance review has become a major topic in social work. As an all-embracing term, it encompasses broad concepts such as 'quality' and 'accountability' and the specific techniques for measuring and managing performance. This volume is divided into four parts to survey the subject in different areas and to examine its implications from the perspectives of the voluntary sector, management, professional practice, the client, and those implementing performance review. The importance of supervision and the need for proper consultation with carers when making policy decisions are also discussed, as well as such areas as quality assurance schemes and the proper implementation of complaints procedures. Also included is an analysis of performance review and quality in General Practice. The final Part provides a general overview of performance and quality review and examines how effective the Citizen's Charter and other quality assurance schemes are and what they mean when put into practice.

The Church is not a business, but it does have a stewardship responsibility to ensure that all of its resources are used as effectively as possible to carry out God's work on earth. In the case of human resource assets, good stewardship involves assisting those engaged in ministry (whether clerical or lay) to achieve their greatest potential through the various components of performance management, including performance assessment. This unique collection brings together both scholars and practitioners who tackle the tricky questions related to the performance management of lay Church workers and clergy (priests and deacons). Performance management is multi-faceted, ranging from issues about hiring, job descriptions, performance criteria, performance appraisal, formation, and firing procedures. As a charitable organization, the Church is subject to the same civil law employment regulations as companies in the private sector. Contributors demonstrate that Canon Law and Church tradition supports the performance management of Church ministers (including clergy). This is a valuable resource for programs in church ministry, pastoral administration, and in

the emerging field of church management.

Corporate governance arrangements define the responsibilities,

authorities, and accountabilities of owners, boards of directors, and executive managers of a company. Good corporate governance is as important for state financial institutions as for private sector companies. Many of the problems that commonly afflict state financial institutions can be associated with, if not attributed directly to, weaknesses in corporate governance. This note draws on guidelines recently published by the OECD and the Basel Committee for Banking Supervision to compile a comprehensive corporate governance evaluation framework relevant to state-owned commercial and development finance institutions. It highlights aspects of this framework that are considered to be of particular importance to state financial institutions by citing innovative practices in a number of countries. Finally, it presents a detailed case study of the governance arrangements in place at the Development Bank of Southern Africa.
