The only English-language guidebook to South America's highest mountain, featuring 27 routes from the three major approaches and thoroughly researched advice on lodging, permits, equipment, seasons, weather and more. Reaching the highest summit in the Western hemisphere requires careful preparation and detailed instruction. R. J. This updated and revised guide features comprehensive information on recommended equipment, safety and health precautions, and conservation issues. It details both the popular and less-travelled routes reached via the Horcones Valley, South Face, and Vacas and Relinchos Valleys. "A Demon-Haunted Land is absorbing, gripping, and utterly fascinating... Beautifully written, without even a hint of jargon or pretension, it casts a significant and unexpected new light on the early phase of the Federal Republic of Germany's history. Black's

analysis of the copious, largely unknown archival sources on which the book is based is unfailingly subtle and intelligent." —Richard J. Evans, *The New Republic* In the aftermath of World War II, a succession of mass supernatural events swept through war-torn Germany. A messianic faith healer rose to extraordinary fame, prayer groups performed exorcisms, and enormous crowds traveled to witness apparitions of the Virgin Mary. Most strikingly, scores of people accused their neighbors of witchcraft, and found themselves in turn hauled into court on charges of defamation, assault, and even murder. What linked these events, in the wake of an annihilationist war and the Holocaust, was a widespread preoccupation with evil. While many histories emphasize Germany's rapid transition from genocidal dictatorship to liberal democracy, *A Demon-Haunted Land* places in full view the toxic mistrust, profound bitterness, and spiritual malaise that unfolded alongside the economic miracle. Drawing on previously unpublished archival materials, acclaimed historian Monica Black argues that the surge of supernatural obsessions stemmed from the unspoken guilt and shame of a nation remarkably silent about what was euphemistically called "the most recent past." This shadow history irrevocably changes our view of postwar Germany, revealing the country's fraught emotional life, deep moral disquiet, and the cost of trying to bury a horrific legacy.

The Roman Emperors were the men who wielded ultimate power over the vast empire stretching from Britain to the Sahara and from the Atlantic to the Euphrates - one of the greatest multi-racial states the world has ever known, to which we owe innumerable features of our lives today. Although the great evolutionary pressures shaping the empire were sometimes outside their control, the influence of these rulers was a decisive, often world-shaking, force in Roman history. Magisterial in its breadth and coverage, *The Roman Emperors* is a standard work for both the student and general reader by one of the greatest classical historians of our times. 'Michael Grant never fails to be lively and well informed and he has done more, singlehandedly, to blow the dust off the classical world than any comparable populariser' *Sunday Times*

How can we distinguish between injustice and misfortune? What can we learn from the victims of calamity about the sense of injustice they harbor? In this book a distinguished political theorist ponders these and other questions and formulates a new political and moral theory of injustice that encompasses not only deliberate acts of cruelty or unfairness but also indifference to such acts. Judith N. Shklar draws on the writings of Plato, Augustine, and Montaigne, three skeptics who gave the theory of injustice its main structure and intellectual force, as well as on political theory, history, social psychology, and literature from sources as diverse as Rousseau, Dickens, Hardy, and E. L. Doctorow. Shklar argues that we cannot set rigid rules to

distinguish instances of misfortune from injustice, as most theories of justice would have us do, for such definitions would not take into account historical variability and differences in perception and interest between the victims and spectators. From the victim's point of view--whether it be one who suffered in an earthquake or as a result of social discrimination--the full definition of injustice must include not only the immediate cause of disaster but also our refusal to prevent and then to mitigate the damage, or what Shklar calls passive injustice. With this broader definition comes a call for greater responsibility from both citizens and public servants. When we attempt to make political decisions about what to do in specific instances of injustice, says Shklar, we must give the victim's voice its full weight. This is in keeping with the best impulses of democracy and is our only alternative to a complacency that is bound to favor the unjust.

The present volume provides a comparative look at the contents and layout features of secondary annotations in biblical manuscripts across linguistic traditions. Due to the privileged focus on the text in the columns, these annotations and the practices that produced them have not received the scholarly

attention they deserve. The vast richness of extant verbal and figurative notes accompanying the biblical texts in the intercolumns and margins of the manuscript pages have thus been largely overlooked. The case studies gathered in this volume explore Jewish and Christian biblical manuscripts through the lens of their annotations, addressing the various relationships between the primary layer of text and the secondary notes, and exploring the roles and functions of annotated manuscripts as cultural artifacts. By approaching biblical manuscripts as potential "notepads", the volume offers theoretical reflection and empirical analyses of the ways in which secondary notes may shed new light on the development and transmission of text traditions, the shifting engagement with biblical manuscripts over time, as well as the change of use and interpretation that may result from the addition of the notes themselves.

An essential guidebook for walking the GR5, one of the world's most spectacular long-distance trails. The GR5 makes its way through the Alps from the shores of Lac Léman at Geneva to the Mediterranean at Nice. A route of 674km (420 miles), it can be trekked in a month, or split over a series of summer trips. The GR5 is well within the reach of fit and moderately experienced walkers and backpackers. There is good signposting and waymarking, and accommodation, food and drink are all available at regular intervals. The paths and tracks are generally well graded, while steep climbs are tackled on zigzag paths, so the overall gradient is not so severe. Every summer, thousands of walkers embark on this trek. This guidebook also describes some scenic variant routes, including the stunning GR55 through the Vanoise National Park and the delightful GR52 that crosses the Mercantour National Park. Full descriptions and maps are provided for these alternatives. The book includes daily stages, timings, ascents and descents, full-colour mapping and gradient profiles, alongside information about facilities and services along the route. The result is an ideal companion to planning and completing your trek. Two further Cicerone guidebooks cover the remaining sections of the GR5; 'The GR5 Trail - Vosges and Jura', and 'The GR5 Trail - Benelux and Lorraine' which together cover the route from Lac Léman to the Hoek Van Holland.

This volume explores how forced movement and exile of clerics developed over time and ultimately came to shape interactions between the late-antique Roman Empire, the Byzantine, post-Roman, and early medieval worlds. It investigates the politics and

legal mechanics of ecclesiastical exile, the locations associated with life in exile, both in literary sources and in material culture, as well as the multitude of strategies which ancient and early medieval authors, and the exiles themselves, employed to create historical narratives of banishment. The chapters are revised versions of papers given at international conferences held at the Martin-Luther-University Halle-Wittenberg, the German Historical Institute London, and the University of Alcalá in 2016 and 2017.
