In *Template Analysis*, Nigel King and Joanna Brookes guide you through the origins of template analysis and its place in qualitative research, its basic components, and the main strengths and limitations of this method. Practical case studies and examples from published research then guide you through how to use it in your own research project. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as a reference book for doctoral students and faculty members interested in the method. Part of SAGE's *Mastering Business Research Methods*, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the *Mastering Business*

Research Methods series.

This book develops an original theory of performative beauty. Philosophical aesthetics has largely neglected one's own actions as a potential experience of the beautiful. Throughout the book, the author uses his own experiences of Argentine tango as a case study; one important incentive for social dancing is to have pleasurable and beautiful experiences. This book begins by investigating the methodological causes for why beauty in modernity has been seen to result only from contemplating external objects. It then builds a theory of performative beauty that incorporates findings from new phenomenology, neuroaesthetics, enactivism, and somaesthetics and that reassesses existing inquiries of beauty. The result is an account that identifies kinaesthetic awareness as the point of emergence of both theory and practice, of creation (poiesis) and perception (aisthesis), and of moving (agency) and being moved (reception). Performative beauty is the pleasure of being moved by the dance where the dancer feels both as a creative improviser and as an integrated part of the activity itself. *A Somaesthetics of Performative Beauty—Tangoing Desire and Nostalgia* will appeal to scholars and advanced students working in aesthetics, dance studies, performance studies, and related fields of artistic research.

A proven program for enhancing students' thinking and comprehension abilities Visible Thinking is a research-based approach to teaching thinking, begun at Harvard's Project Zero, that develops students' thinking dispositions, while at the same time deepening their understanding of the topics they study. Rather than a set of fixed lessons, Visible Thinking is a varied collection of practices, including thinking routines?small sets of questions or a short sequence of steps?as well as the documentation of student thinking. Using this process thinking becomes visible as the students' different viewpoints are expressed, documented, discussed and reflected upon. Helps direct student thinking and structure classroom discussion Can be applied with students at all grade levels and in all content areas Includes easy-to-implement classroom strategies The book also comes with a DVD of video clips featuring Visible Thinking in practice in different classrooms.

The diary as a genre is found in all literate societies, and these autobiographical accounts are written by persons of all ranks and positions. The Diary offers an exploration of the form in its social, historical, and cultural-literary contexts with its own distinctive

features, poetics, and rhetoric. The contributors to this volume examine theories and interpretations relating to writing and studying diaries; the formation of diary canons in the United Kingdom, France, United States, and Brazil; and the ways in which handwritten diaries are transformed through processes of publication and digitization. The authors also explore different diary formats, including the travel diary, the private diary, conflict diaries written during periods of crisis, and the diaries of the digital era, such as blogs. The Diary offers a comprehensive overview of the genre, synthesizing decades of interdisciplinary study to enrich our understanding of, research about, and engagement with the diary as literary form and historical documentation.

Over recent years there has been major investment in research infrastructure to harness the potential of routinely collected health data. In 2013, The Farr Institute for Health Informatics Research was established in the UK, undertaking health informatics research to enhance patient and public health by the analysis of data from multiple sources and unleashing the value of vast sources of clinical, biological, population and environmental data for public benefit. The Medical Informatics Europe (MIE) conference is already established as a key event in the calendar of the European Federation of Medical Informatics (EFMI); The Farr Institute has been establishing a conference series. For 2017, the decision was made to combine the power and established reputational excellence of EFMI with the emerging and innovative research of The Farr Institute community to create 'Informatics for Health 2017', a joint conference that creates a scientific forum allowing these two communities to share knowledge, insights and experience, advance cross-disciplinary thinking, and stimulate creativity. This book presents the 116 full papers presented at that conference, held in Manchester, UK in April 2017. The papers are grouped under five headings: connected and digital health; health data science; human, organisational, and social aspects; knowledge management; and quality, safety, and patient outcomes, and the book will be of interest to all those whose work involves the analysis and use of data to support more effective delivery of healthcare.

Measuring the performance of a library's services is one of the

most crucial parts of providing a good service. This important book is the first to provide an accessible account of current thinking on the evaluation of library services, both traditional and - importantly - electronic library services. Illustrated throughout with a range of international examples across different types of libraries, this book will become the standard work on performance measurement. The book is structured to focus first of all on the intended user of the services (outcome and impact perspectives), then to look at the management of the service (output and process issues), then at evaluating the building blocks of services (input issues) and finally to draw together these strands by examining some of the broader frameworks for evaluation which have emerged. The book ends with an extensive Appendix with a description of key methodologies and suitable references. Each chapter includes suggestions for further reading as well as key references. The key areas addressed include: user satisfaction impact on users economic impact inputs evaluating processes counting the outputs acquiring content staff evaluating infrastructure benchmarking and balanced scorecard standards based approaches. Readership: The emphasis on principles and techniques in the book means that it is perfect reading for busy practitioners but it is also eminently suitable for students and researchers trying to get to grips with this tricky area.
