The late twentieth-century transition from a paper-oriented to a media-oriented society has triggered the emergence of Audiovisual Translation as the most dynamic and fastest developing trend within Translation Studies. The growing interest in this area is a clear indication that this discipline is going to set the agenda for the theory, research, training and practice of translation in the twenty-first century. Even so, this remains a largely underdeveloped field and much needs to be done to put Screen Translation, Multimedia Translation or the wider implications of Audiovisual Translation on a par with other fields within Translation Studies. In this light, this collection of essays reflects not only the “state of the art” in the research and teaching of Audiovisual Translation, but also the professionals’ experiences. The different contributions cover issues ranging from reflections on professional activities, to theory, the impact of ideology on Audiovisual Translation, and the practices of teaching and researching this new and challenging discipline. In expanding further the ground covered by the John Benjamins’ book (Multi)Media

Translation (2001), this book seeks to provide readers with a deeper insight into some of the specific concepts, problems, aims and terminology of Audiovisual Translation, and, by this token, to make these specificities emerge from within the wider nexus of Translation Studies, Film Studies and Media Studies. In a quickly developing technical audiovisual world, Audiovisual Translation Studies is set to become the academic field that will address the complex cultural issues of a pervasively media-oriented society.

This book explores migrant's global social remittances and their impacts on Europe. Exploring the topic from a range of disciplines including sociology, anthropology, geography and political science, the authors present empirical analyses covering a wide selection of international contexts across Europe, India, Iraq, Bolivia, Congo, Lebanon and Thailand. The book presents migrants not as Europe's 'cultural others' but as an integral part of Europe's global connection, and scrutinises the flows of knowledge, ideas, money, objects and

values which result from the process of migration, rather than the migrants themselves. A valuable contribution to the literature on migrant transnationalism and globalisation, this book will appeal to scholars across the social sciences.

This motivating feature helps you track your improvement, and gets you speaking German with confidence. Swift Self-improvement We've designed the first two chapters so that they offer easy immersion. Our speakers break down each word into their distinct syllables and speak slowly. This helps you catch every nuance of the language, making it easier for you to improve your listening and speaking skills all by yourself. Learn Anywhere We've specifically developed our language courses for audio learning, so you can complete other tasks while learning German. You can learn while you are running, working out, walking, driving, or

even when you are doing chores. Our parallel audio learning system teaches you wherever you are, without requiring a reference manual.

The Bilingual Child Springer

How does a child become bilingual? The answer to this intriguing question remains largely a mystery, not least because it has been far less extensively researched than the process of mastering a first language. Drawing on new studies of children exposed to two languages from birth (English and Cantonese), this book demonstrates how childhood bilingualism develops naturally in response to the two languages in the children's environment. While each bilingual child's profile is unique, the children studied are shown to develop quite differently from monolingual children. The authors demonstrate significant interactions between the children's developing grammars, as well as the important role played by language dominance in their bilingual development. Based on original research and using findings from the largest available multimedia bilingual corpus, the book will be welcomed by students and scholars working in child language acquisition,

bilingualism and language contact.

Migration in Austria John Benjamins Publishing

In the years between 1848 and 1918, the Habsburg Empire was an intensely pluricultural space that brought together numerous "nationalities" under constantly changing - and contested - linguistic

regimes. The multifaceted forms of translation and interpreting, marked by national struggles and extensive multilingualism, played a crucial role in constructing cultures within the Habsburg space. This book traces translation and interpreting practices in the Empire's administration, courts and diplomatic service, and takes account of the "habitualized" translation carried out in everyday life. It then details the flows of translation among the Habsburg crownlands and between these and other European languages, with a special focus on Italian-German exchange. Applying a broad concept of "cultural translation" and working with sociological tools, the book addresses the mechanisms by which translation and interpreting constructs cultures, and delineates a model of the Habsburg Monarchy's "pluricultural space of communication" that is also applicable to other multilingual settings. Code-switching in Bilingual Children

German Language Lessons

This volume demonstrates that mixed utterances in young bilinguals can be analyzed in the same way as adult code-switching. It provides new insights not only in the field of code-switching and of language mixing in young bilinguals, but also in issues concerning general questions on linguistic theory which are difficult to be answered with monolingual data.

Migration and Social Remittances in a Global Europe Contemporary Austrian Studies

Ever since Aristotle's Poetics, both the

theory and the practice of theater have been governed by the assumption that it is a form of representation dominated by what Aristotle calls the "mythos," or the "plot." This conception of theater has subordinated characteristics related to the theatrical medium, such as the process and place of staging, to the demands of a unified narrative. This readable, thought-provoking, and multidisciplinary study explores theatrical writings that question this aesthetical-generic conception and seek instead to work with the medium of theatricality itself. Beginning with Plato, Samuel Weber tracks the uneasy relationships among theater, ethics, and philosophy through Aristotle, the major Greek tragedians, Shakespeare, Kierkegaard, Kafka, Freud, Benjamin, Artaud, and many others who develop alternatives to dominant narrative-

aesthetic assumptions about the theatrical medium. His readings also interrogate the relation of theatricality to the introduction of electronic media. The result is to show that, far from breaking with the characteristics of live staged performance, the new media intensify ambivalences about place and identity already at work in theater since the Greeks. Praise for Samuel Weber: "What kind of questioning is primarily after something other than an answer that can be measured . . . in cognitive terms? Those interested in the links between modern philosophy and media culture will be impressed by the unusual intellectual clarity and depth with which Weber formulates the . . . questions that constitute the true challenge to cultural studies today. . . . one of our most important cultural critics and thinkers"—MLN
