 "Work it, make it, do it, makes us: harder,

 "Harder, Better, Faster"

Inverting The Pyramid Fleet

In this report I explored a very small part
 of the music industry from the USA, more
 precisely, I investigated the contribution,
 greater or lesser, of black and white artists
 in the production and writing of their
 albums. The artists investigated in this
 report are Taylor Swift, Kanye West,
 Beyoncé, Kendrick Lamar, Macklemore &
 Ryan, Adele and Beck. I selected these
 artists because the music produced and
 released by them were used by various

artists and journalists as examples of
 racial discrimination that takes place in
 the music industry. For example, Kendrick
 Lamar (black man) was promoted by
 western journalists the winner of the Best
 Rap Album days before the 2014
 ceremony, but was defeated by
 Macklemore & Ryan (white artists) and in
 2016 by Taylor Swift (white artist);
 Beyoncé (black artist) lost in 2015 to Beck
 (white artist) and in 2017 she lost to Adele
 (white artist). In other words, today's
 music industry is caught in a difficult
 situation that is severely undermining The
 Recording Academy's credibility and the
 Grammy Awards. Supporters of black
 artists have two arguments against the
 rules and awards offered by The Recording
 Academy: 1. the higher recognition of
 music received by the white artists is not
 about the quality and originality of their

music, but because of the colour of their
 skin; in other words, the white artist
 received the higher recognition because
 the institutions behind the awards is ruled
 by white people; 2. black artists create
 music and white artists take advantage
 and profit from their creation. The purpose
 of this report is to show (within the limits
 of the information used): 1. the creativity,
 originality and novelty of the investigated
 artists; 2. the artist(s) with a greater
 contribution in the production and writing
 of a song(s) and album(s) that have been
 released; 3. whether the awards and
 recognition offered by the USA music
 industry are based on originality, creativity
 and novelty in music, or are offered based
 on the colour of the skin; 4. what are the
 differences between the music recognized
 by receiving an award and the music that
 did not receive an award, but was

nominated for the music award (either by the vote of the general public or by the vote of the members of the jury); 5. whether the loss of the award is a direct and personal non-recognition of the black artist(s) who performed the song(s) and under whose name the song(s) and album(s) were released; 6. whether the loss of the award is a direct and personal non-recognition of the black producer(s) and lyricist(s) who created a part(s) (or full) of a song(s) and the album(s); 7. reasons that might justify why white artists receive more recognition than black artists in the music industry (only the artists in this report and Grammy Awards: Album of the Year, Best Rap Album; MTV Awards: Beyoncé (Single Ladies (Put a Ring On It), If I were a Boy) versus Taylor Swift (You Belong With Me, The Man) regarding the originality of these songs. This report was born out of the urgent need to confront and challenge the core arguments of black artists who feel and promote the idea of injustice regarding their music, hoping to provide clearer, more transparent information and better-founded reasons for the institution's decision to award the white artists from this report. Black artists and white artists are in need of answers and this report is a meditative resource about the recognition of their contribution in the music industry. In this report interested people about music and awards will find the space to read about it and confront their knowledge with the investigation's findings. The report can be used to calm the realities of racism and can provide a point of reference of the quality, originality and novelty of the music used in this report, but also for future artists waiting to be discovered.

Excerpt: Daft Punk are an electronic music duo consisting of French musicians Guy-Manuel de Homem-Christo (born February 8, 1974) and Thomas Bangalter (born January 3, 1975). Daft Punk reached significant popularity in the late 1990s house movement in France and met with continued success in the years following, combining elements of house with synthpop. The duo is also credited with producing songs that are considered essential in the French house scene. They were managed from 1996 to 2008 by Pedro Winter (Busy P), the head of Ed Banger Records. Early in the group's career, the band members were strongly influenced by groups such as The Beach Boys and The Rolling Stones. Bangalter and de Homem-Christo were originally in a band called Darlin', which disbanded after a short period of time, leaving the two to experiment musically on their own. The duo became Daft Punk, and released their critically acclaimed debut album Homework in 1997. The 2001 release Discovery was even more successful, driven by the club singles "One More Time," "Digital Love" and "Harder, Better, Faster, Stronger." In March 2005, the duo released the album Human After All to mixed reviews. However, the singles "Robot Rock" and "Technologic" achieved success in the United Kingdom. Daft Punk's Discovery is a homage to a fascinating, troubled beast of an album that casts a huge shadow over the 21st Century. It's a global view of Discovery as a cultural phenomenon, placing the album at the centre of celebrity culture, fan

clubs, video, the music business etc., while also examining its profound musical impact. You can draw lines from Discovery to Glass Swords, Kanye West, EDM, Autotune, iTunes, Beyoncé, Guilty Pleasures, social media and more. Discovery's footprints can be found all over the modern world but it also looked back to Daft Punk's childhood, to Van Halen records, Japanese cartoons and even Johann Sebastian Bach. Discovery was a record that confounded many fans when it was released in 2001, thanks to its blatant pop hooks and unlikely sonic bricolage. It was a record that was - and still is - widely misunderstood; Discovery's impact has only become clear with the passing of time, as Daft Punk have been proved right time and time again.

Most teacher manuals talk about what teachers need to do. That's useful enough, especially for new teachers. But no list, however long, can anticipate every circumstance, and in teaching unusual circumstances are an integral part of everyday life. But how do experienced teachers know what to do? Successful teachers develop a Teaching Character; they've worked on the qualities and personality traits that they need in order to cope successfully with the full spectrum of situations that being a teacher can involve. Veterans don't ask themselves, 'What does the teaching guide book tell me?' when confronted with difficult situations - they react instinctively, based on the character skills they've developed over time. Unfortunately, for most people this process of learning is unguided, and unconscious. It's time for a self-help manual that actually helps. This book includes case studies and anecdotes, chapter summaries and humorous illustrations to help teachers reflect on what it means to be a teacher, and why it is the most rewarding profession there is.

Why People Do the Things They Do Routledge

Any time you sincerely want to make a change, the first thing you must do is to raise your standards. When people ask me what really changed my life eight years ago, I tell them that absolutely the most important thing was changing what I demanded of myself. Anthony Robbins Changing to become Bigger, Better, Faster & Stronger (BBFS) will give you a competitive edge in your quest for

success. As Anthony Robbins states above, changing what you demand of yourself is the first step to achieving higher standards in any field. Is it your goal to improve your mind and/or body for longevity, competition or confidence? If so, search these chapters that our Celebrity Experts(r) have written. These authors have enjoyed the personal experience of achieving their goals. They have tested and proved that it can be done, and written their "How-To-Do-It" based on their personal experiences. Professional athletes work harder for coaches who come out of the very sport they coach. They have been there and done that! So too, can you benefit from the Celebrity Experts(r) experiences and teaching. The trio of Mindset, Nutrition and Training are all integral determinants of BBFS. Mindset is the acceptance of factors that accompany us into appropriate action. Do you have the right mindset? Correct nutrition prepares us for the task. Are you getting the correct nutrition? Training is the practice to achieve the desired goal. Are you training in the right manner? This trifecta is a combination that will overcome indecision, poor habits and inaction. Desire alone won't get you there, you must change. Have you heard the saying: "if wishes were horses, beggars would ride." Well, if you wish to 'ride' - saddle up and take action! Your BBFS success depends on

Unter dem Pseudonym "The Secret Footballer" berichtet der Autor seit anderthalb Jahren regelmäßig für den "Guardian" über sein Leben als Profi in der Premier League. Über seine Identität gibt es viele Spekulationen. Bekannt ist lediglich, dass er Engländer ist, verheiratet und bereits für mindestens zwei Vereine der Premier League gespielt hat. In seinem Buch wirft der "geheime Fußballer" einen schonungslosen Blick hinter die Kulissen der weltweit beliebtesten Fußballliga. Seine Anonymität erlaubt es ihm, ganz offen zu berichten: über Trainer, Mit- und Gegenspieler, aus dem Ruder laufende Weihnachtsfeiern, Spielerberater, Rassismus im Profifußball oder Versuchungen wie Alkohol und Frauen. Ebenso ehrlich erzählt er von seiner persönlichen Laufbahn, vom Druck des Profilebens und den Depressionen, mit denen er infolgedessen zu kämpfen hat. Ein Buch, das nicht nur für Fans der Premier League interessant ist, sondern für alle, die wissen wollen, wie das Leben eines Profifußballers wirklich aussieht. *Workout Planner, Harder Better Faster Stronger* Bloomsbury Publishing Having invented the game, everything that has followed for England and its national football team has been something of an anticlimax. There was, of course, the golden summer of 1966, and the great period of English dominance on the world stage, which fell roughly between 1886 and 1900, when England won 35 of their 40 internationals ... But before long foreign teams, with their insistence on progressive 'tactics', began to pose a few questions. And much of what followed for England constituted a series of false dawns. In *THE ANATOMY OF ENGLAND* Jonathan Wilson seeks to place the bright spots in context. Time and again, progressive coaches have been spurned by England - technique being all very well, but what really matters is pluck and 'organised muscularity', or, to quote Jimmy

Hogan's chairman at Aston Villa in 1936: 'I've no time for these theories about football. Just get the ball in the bloody net.' Wilson takes ten key England fixtures and explores how what actually happened on the pitch shaped the future of the English game. Bursting with insight and critical detail, yet imbued with a wry affection, this is a history of England like none before.

'A clear, concise, easy-to-read account of the issues between sex, gender and feminism . . . an important book' Evening Standard 'A call for cool heads at a time of great heat and a vital reminder that revolutions don't always end well' Sunday Times **Material Girls** is a timely and trenchant critique of the influential theory that we all have an inner feeling known as a gender identity, and that this feeling is more socially significant than our biological sex. Professor Kathleen Stock surveys the philosophical ideas that led to this point, and closely interrogates each one, from De Beauvoir's statement that, 'One is not born, but rather becomes a woman' (an assertion she contends has been misinterpreted and repurposed), to Judith Butler's claim that language creates biological reality, rather than describing it. She looks at biological sex in a range of important contexts, including women-only spaces and resources, healthcare, epidemiology, political organization and data collection. **Material Girls** makes a clear, humane and feminist case for our retaining the ability to discuss reality, and concludes with a positive vision for the future, in which trans rights activists and

feminists can collaborate to achieve some of their political aims.

Pitbull - Mr. Worldwide Orion

What does it mean to be expressive in music performance across diverse historical and cultural domains? What are the means at the disposal of a performer in various time periods and musical practice conventions? What are the conceptualisations of expression and the roles of performers that shape expressive performance? This book brings together research from a range of disciplines that use diverse methodologies to provide new perspectives and formulate answers to these questions about the meaning, means, and contextualisation of expressive performance in music. The contributors to this book explore expressiveness in music performance in four interlinked parts. Starting with the philosophical and historical underpinnings crucially relevant for Western classical musical performance it then reaches out to cross-cultural issues and finally focuses the attention on various specific problems, including the teaching of expressive music performance skills. The overviews provide a focussed and comprehensive account of the current state of research as well as new developments and a prospective of future directions. This is a valuable new book for those in the fields of music, music psychology, and music education.
