While universities world over are undergoing reforms and change, in the case of African universities as illustrated in this book, the reforms and changes are profound and can best be described as transformative. This book is unique in many ways, which makes it extraordinary. First, unlike other books that have examined issues on higher education in Africa from externalist positions, the contributors to this book are scholars who have been educated, are currently teaching in African universities or have taught in African universities. The book specifically focuses on transformations in the governance of African universities and its implications on equity, entrepreneurship, innovation, quality assurance, information and communication technologies (ICTs), and reform issues in higher education in Africa. The book presents pertinent research on governance in African universities in an experiential and empirical manner. The contributors of the book chapters include individuals actively involved in teaching, researching and governance of higher education institutions in Africa. The chapters are based on empirical data, including review of relevant literature. The book also recognizes that university governance is more than just crisis in financial or economic issues, but includes best management practices, shared governance, meaningful reforms, strategic planning, consultation, transparency and accountability, client (students, lecturers, parents and the public) satisfaction, as well as the role of the university in development. The contributions take cognizance of the fact that governance as a concept is facing fundamental changes in the context of global knowledge economy, and African local conditions. Contributors also take cognizance of the fact that one important source of change in Africa has been the accelerating speed of scientific and technological advancement in learning at universities where lifelong learning programs, adult learning programs, distance and online learning are relatively new. The chapters are also sensitive to new changes in gender, demographical, technological, education reforms, social and economic transformations in the governance of African universities. The book is basically an academic book for use by undergraduates and graduate students at universities, policy

makers and formulators in African ministries of Education; supra national organizations, foreign organizations working in Africa, NGOs and CBOs as well as development stakeholders, and community organizers.

The role of higher education in establishing structures and procedures in society and industry is clearly articulated in scholarly discussions. The narrative has recently taken a new momentum in Kenya with acknowledgement of the creative industry involves many youth, as an area that impacts on the economy. In unravelling the link between higher education and industry, the authors focus on leadership and governance in higher education and its expected and perceived contribution to the shaping of the creative industry. Through analysis of cases, the authors interrogate the processes and structures that govern the teaching and practice of the creative subjects, noting how these affect the creative industry in Kenya. This book approaches the creative disciplines from the perspectives of the students, lecturers and university administrators. The three voices provide a balanced view of what higher creative arts education in Kenya is. The multiple authorship of the book further provides a balanced account of the development of these disciplines in higher education, and their growth in industry. The key concepts here are the development of the creative industry and how higher education should contribute to the same.

ScholarlyEditions

In this book, we can read about new technologies that enhance training and performance; discover new, exciting ways to design and deliver content; and have access to proven strategies, practices and solutions shared by experts. The authors of this book come from all over the world; their ideas, studies, findings and experiences are beneficial contributions to enhance our knowledge in the field of e-learning. The book is divided into three sections, and their respective chapters refer to three macro areas. The first section of the book covers Instructional Design of E-learning, considering methodology and tools for designing e-learning environments and courseware. Also, there are examples of effective ways of gaming and educating. The second section is about Organizational Strategy and Management. The last section deals with the new Developments in E-learning Technology, emphasizing subjects like knowledge building by mobile e-learning systems, cloud computing and new proposals for virtual learning environments/platforms.

*Handbook of Research on Algae as a Sustainable Solution for Food, Energy, and the Environment* BoD – Books on Demand

This book celebrates the contributions of John Weidman and his

colleagues to the understanding of student socialization in higher education. It includes innovative chapters reflecting new approaches to higher education student socialization with respect to students of color, gender, STEM, and students in higher education systems outside the USA. Specifically, the book examines socialization between and within in a range of groups, including national, international and minority students, parents, doctoral students, early career faculty, and scholarly practitioners. The book assesses methodological approaches and suggests directions for reformulating theory and practice. Using sociological perspectives to address issues and concerns at both the undergraduate and graduate levels, the book gives renewed life to the college impact literature. It includes revisions and expansions of the original Weidman frameworks based on the synthesis of existing research with new work reflecting unique perspectives by a variety of authors. John Weidman has been an indisputable force in the study and understanding of student socialization in higher education. This new book by Weidman and his coeditor, Linda DeAngelo, represents an undeniably significant and welcomed expansion of the original “Weidman model” of student socialization. In updating and revising the original model, chapter authors give attention to various contemporary issues such as student diversity, gender differences, early career experiences, and internationalism. Whether one samples only some of the articles that constitute this book or reads all of them, the professional payoff will be substantial. Kenneth A. Feldman, Professor of Sociology, Stony Brook University John Weidman has made a number of groundbreaking contributions to our understanding of student socialization in postsecondary education. This book, edited with Linda DeAngelo, brings together a group of fine scholars whose contributions will push our understanding even further. It is a significant addition to the college impact literature. Ernest T. Pascarella, Petersen Chair in Higher Education, University of Iowa

Integrated Analytical Approaches for Pesticide Management provides proven laboratory practices/examples and methods necessary to control pesticides in food and water in various environments. The book presents insights into good laboratory practices and examples of methods used in individual specialist laboratories, thus enabling stakeholders in the agri-food industry

to appreciate the importance of proven, reliable data and the associated quality assurance approaches for end product testing for toxic levels of contaminant residues in food. The book is written in a rigorous, but simple, way to make sure that a broad range of readers can appreciate its technical content. The book's practical nature and generic guidelines distinguish it from others in the marketplace. Provides coverage of risk assessment and effective testing technologies Covers generic guidelines on pesticide analysis on different environmental matrices for use in the developed and developing world Presents the most up-to-date information in research sample testing preparation and method validation to detect pesticide residues in food Includes examples of each method for practical application Demonstrates proven, reliable research data and the associated quality assurance approaches for end product testing for food, water and soil sediment Describes the concept of integrated analytical approaches for pesticide management practices

The tropics is an area of enormous opportunity and potential. The countries situated between the Tropics of Cancer and Capricorn are largely developing in nature. There is huge interest in the types of business investments made in Southeast Asia, Central Africa, and the Amazonian tropical belts. These tropical regions continue to face opportunities and challenges in attracting foreign direct investments as well as the need to complement and/or compete with larger economies external to the tropics. This book provides an empirical assessment of the key sociocultural, economic, environmental, and political factors that influence the business dynamics of organizations operating within the tropics. It will address but is not limited to topics such as attracting businesses to the tropics, facilitating smooth, stable conditions for business operations and sustainability, national institutions, and regulations that shape the way business is done, and the increasing deployment of new technologies and entrepreneurial innovations which are defining the global tropics as a distinct business region. It will offer readers a key focus for developing a deeper understanding of the factors and frameworks that influence and shape business activity in the area. While the primary audience for the book consists of academics and students from the fields of economics (environmental economics, developmental economics), business, international trade, tourism, and area studies, it will also provide a practical resource for government policy analysts wanting to fully appreciate some of the key economic and business issues facing the region.

This book explores the journey that Kenya has travelled as a nation since its independence on December 12, 1963. It seeks to

advance understanding of the country's major milestones in the postcolonial period, the challenges and the lessons that can be learned from this experience, and the future prospects.

E-learning and digital education approaches are evolving and changing the landscape of teaching and learning at all levels of education throughout the world. Innovation of emerging learning technologies is assisting e-learning and digital education to meet the needs of the 21st century. Due to the digital transformation of everyday practice, the process of learning and education has become more self-paced and accessible at any time from anywhere. The new generations of digital natives are growing up with a set of skills through their engagement with the digital world. In this context, this book includes a collection of chapters to facilitate continuous improvements including flexibility and accessibility in e-learning and digital education by exploring the challenges and opportunities of innovative approaches through the lenses of current theories, policies, and practices.

Until recently, Eurocentrist history professors taught that it was the Europeans who brought higher education to the African continent. While the Europeans have indeed influenced African education in recent times, there is some vital information that most history books leave out: for centuries before the arrival of the Europeans, the vast and advanced native African civilizations already had sophisticated universities and other institutions of higher education to boast about. This book is an attempt to fill the chasm in today's literature regarding this topic. It will be of interest to those researching the accurate, non-Euro-biased history of Africa.

*A History of African Higher Education from Antiquity to the Present* IGI Global

The purpose of this study was to examine sustainable gender equity interventions in selected public universities. The study used descriptive survey and case study research methods to carry out an in-depth analysis of the gender equity interventions in selected public universities in Kenya. The sample consisted of four public universities that were selected because they had established gender centers/institutes that were assumed to be coordinating gender equity intervention. The study has the following objectives: To establish the existing gender inequalities in the formal organisational structure of the selected universities; To identify and assess sustainability of gender equity interventions in the selected public universities; To analyse the national, regional, international and organisational culture and policy contexts that have influenced and supported the introduction of the identified gender equity interventions; To investigate the attitudes of staff, students and management towards the gender equity interventions; and to recommend appropriate institutional strategies to address existing gender inequities.

Industry wastewater is a major contributor to environmental pollution with chemicals such as dyes, acids, fungicides, and more creating a threat to the environment. Nanocomposites of heterogeneous photocatalysis can be used to cure such problems due to its efficiency and ease of use, as well as the fact that it turns toxic chemicals completely to carbon dioxide and inorganic acids. With toxic chemicals posing a tremendous threat to ecological wellbeing and human health, it is integral that a variety of nanocomposites are studied for their use in the degradation of toxic and hazardous chemicals. Innovative Nanocomposites for the Remediation and Decontamination of Wastewater describes the synthesis of nanomaterials and its application for the protection of the environment. It presents studies on the photodegradation of the various toxic and hazardous chemicals by different nanocomposites, as well as the decontamination of bodies of water through the use of various nanocomposites. Covering topics such as dye degradation, novel biomaterials, and structural modification, this premier reference source is a vital resource for environmental scientists, construction managers, compliance officers, biochemists, biophysicists, conservation scientists, hydrologists, microbiologists, libraries, students and educators of higher education, researchers, and academicians. *Socialization in Higher Education and the Early Career* CODESRIA Offers research on educational policies, programs, and practices for adolescent girls and adult women, from both comparative international perspectives.
