The Only Black Student is a book that evolved progressively from casual group and one on one discussions into written form during the latter years of Lull's undergraduate experience. On campus, Lull worked as a student ambassador for the Office of Minority Affairs. Additionally, he provided guidance to college-bound high school students who feared that they would not succeed socially and academically at a Predominantly White Institution. Many had only interacted with people of similar economic and ethnic

backgrounds before entering a PWI. Compiling input from his mentors, mentees, and peers over the course of three years, he completed and published his first edition of The Only Black Student. Lull never considered himself a writer, but was driven by the desire to inscribe the wisdom to others that he wished someone had shared with him when his academic journey began.

Hairstylist Stacie Harmon loves all the benefits of being blonde—even the assumption that she's dumb. (Psst: She's not.) Perhaps that's why she's so enthusiastic about helping other women discover and maintain their blonde identity, whether through highlights, allover hair color, or simply cultivating that legendary blonde sense of fun. Along the way, she hears stories from her

clients that come to light only in a hair salon—and now she's sharing them with you. You'll find out why some women will have their hair cut only during a full moon, why you may want to have your tresses trimmed to a particular length before you embark on a certain kind of "alternative" cruise, and how a butterfly can appear in the most unexpected places. The various characters in Stacie's chair prove that regardless of hair color, we all have at least fifty personality traits—maybe even an inner blonde—just screaming to get out.

You only need to look at the story of Samson and Delilah to see just how important a man's hairstyle can be. Thankfully, *A Geezer's Guide to Mullet Maintenance and Combover care* is guide to selecting, growing and maintaining a stylish, comfortable and well-groomed hair helmet. Including: manly grooming tips; a breakdown of barnets to try out, such as the Curtain Cut (try to look like Johnny Depp; try not to look like Worzel Gummidge) or the Quiff (try to look like Alex Turner from the Arctic Monkeys; try not to look like Nick Grimshaw); a perambulation through hirsute history; a rundown of famous hair aficionados, from Albert Einstein to Paul McCartney via Adolf Hitler; hair and hairstyling records (can you beat the Longest Time Hanging by your Hair record?); the most ridiculous names for hair salons (Crops and Bobbers vs Shear-N-Dipity). The perfect gift for every man: from the metrosexual to those who just want to progress from their mum's bowl cuts; whether he wants to learn how to carefully calm his cowlick or skilfully shine his skinhead.

Book 12: Hair's Looking at You Createspace Independent Pub Jay was so excited about going to school. She loved the whole idea of what school was all about. She couldn't wait to get started. Then she met Cindy. She couldn't understand why Cindy didn't like her. She tried everything to make Cindy like her, but everything about her was wrong. At least that's what Cindy told her—even her hair! What's wrong with her hair? She couldn't tell Mom because then she would be so disappointed, and she liked seeing Mom happy about her learning. She had to talk to someone, and most of all she had to cut her hair! It was the only way Cindy would ever be her friend.

The Second World War affected the lives and shaped the experience of millions of individuals in Germany--soldiers at the front, women, children and the elderly sheltering in cellars, slave laborers toiling in factories, and concentration-camp prisoners and POWs clearing rubble in the Reich's devastated cities. Taking a "history from below" approach, the volume examines how the minds and behaviour of individuals were moulded by the Party as the Reich took the road to Total War. The ever-increasing numbers of German workers conscripted into the Wehrmacht were replaced with forced foreign workers and slave labourers and concentration camp prisoners. The interaction in everyday life between German civilian society and these coerced groups is explored, as is that society's relationship to the Holocaust. From early 1943, the war on the home front was increasingly dominated by attack from the air. The role of the Party, administration, police, and courts in providing for the vast numbers of those rendered homeless, in bolstering civilian morale with "miracle revenge weapons" propaganda, and in maintaining order in a society in disintegration is reviewed in detail. For society in uniform, the war in the east was one of ideology and annihilation, with intensified indoctrination of the troops after Stalingrad. The social profile of this army is analysed through study of a typical infantry division. The volume concludes with an account of the various forms of resistance to Hitler's regime, in society and the military, culminating in the failed attempt on his life in July 1944.

**I Want to Cut My Hair!** Sterling Publishing (NY)

The author of the e-books Obama: The Greatest President in the History of Everything and How to Fix Everything in America

Forever explains how Americans can finally overcome the insidious legacy of the 1960s. As Frank J. Fleming reveals in this delightfully sarcastic self-help book, every American has a little hippie inside, preaching free love and poor hygiene, and keeping him from achieving his full potential. It's a relic from the 1960s, kept alive in acid flashbacks and pop culture, which affects decision-making in unconscious ways. The only solution is to punch that inner hippie as hard and as often as possible. *Punch Your Inner Hippie* hilariously explains how to understand and defeat your inner hippie. Fleming looks back at history to describe all of the civilizations ruined by hippies and to warn of the destruction in store for the U.S. if they are not stopped. He reveals the symptoms of hippie-ism, from laziness and dependence to whining and protesting, so you can gauge the strength of your own inner hippie. Fleming also shows you how to beat your inner hippie by constructing a tank of awesome out of the four parts of being awesome: Independence, Gratitude, Ambition, and Confidence. If you punch your inner hippie every day, it will eventually be too broken and defeated to move, and you will finally become as awesome as America.

Overview Generally barber shops can be divided into two; a) Normal/ Traditional Barber Shops The normal barber shops offer a basic hair cutting service where the main aim is to get the hair down with little or no regard for the experience while at it. They are the most common in every town center characterized by small rooms, two or so chairs, loud music, hair on the floor and a casual (in dressing and service) barber. b) Executive Barber Shops The executive barber shops aim not only at offering a hair cut but also a superior experience while at it. Thus they lay premium emphasis on everything that is used in the process from the chairs to the towel, machines, ambience, cleanliness and all else. The executive barber shops arose from a need to serve a customer who is health conscious, with enough income, lifestyle and social exposure to make him willing to pay a premium for personalized and higher quality service. However the definition of executive barber shop is now somehow diluted. There are 'normal' barber shops which use "Executive" as a trade name but offer none of the superior services. There are others which only offer one or two premium services but still define themselves as executive; this is in comparison to the other barber shops in the location. The most common of the premium services being washing a customer's head with warm water the shave. Lastly are the barber shops which are "Executive" proper offering the whole range of premium services. Such are the focus of this report.

(Applause Books). Rita Lakin was a pioneer a female scriptwriter in the early 1960s when Hollywood television was exclusively male. For years, in creative meetings she was literally "the only woman in the room." In this breezy but heartfelt remembrance, Lakin takes readers to a long-forgotten time when women were not considered worthy or welcome at the creative table. Widowed with three young children, she talked herself into a secretarial job at Universal Studios in 1962, despite being unable to type or take dictation. With guts, skill, and humor, she rose from secretary to freelancer, to staff writer, to producer, to executive producer and showrunner, meeting hundreds of famous and infamous show biz legends along the way during her long and unexpected career. She introduced many women into the business and was a feminist before she even knew she was one. The general public did not know her name, but Lakin touched the lives of millions of viewers week after week, year after year. The relevance of her personal journey charming yet occasionally shocking will be an eye-opener to present-day who take for granted the abundance of female creative talent in today's Hollywood.
