JAMARI MCDANIEL

Doing Science Corwin

Read and find out about how a caterpillar becomes a butterfly in this colorfully illustrated nonfiction picture book. After a caterpillar comes to school in a jar, the children are captivated as it eats, grows, and eventually becomes a beautiful Painted Lady butterfly. This is a clear and appealing environmental science book for early elementary age kids, both at home and in the classroom. Plus it includes web research prompts and an activity encouraging kids to identify the different types of butterflies all around them. This is a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory concepts perfect for children in the primary grades. The 100+ titles in this leading nonfiction series are: hands-on and visual acclaimed and trusted great for classrooms Top 10 reasons to love LRFs: Entertain and educate at the same time Have appealing, child-centered topics Developmentally appropriate for emerging readers Focused; answering questions instead of using survey approach Employ engaging picture book quality illustrations Use simple charts and graphics to improve visual literacy skills Feature hands-on activities to engage young scientists Meet national science education standards Written/illustrated by award-winning authors/illustrators & vetted by an expert in the field Over 130 titles in print, meeting a wide range of kids' scientific interests Books in this series support the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. Let's-Read-and-Find-Out is the winner of the American Association

for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

The Gremlins Diversion Books

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Soil Protozoa Gale Cengage

Repackaged with a new afterword, this "valuable and entertaining" (New York Times Book Review) book explores how scientists are adapting nature's best ideas to solve tough 21st century problems. Biomimicry is rapidly transforming life on earth. Biomimics study nature's most successful ideas over the past 3.5 million years, and adapt them for human use. The results are revolutionizing how materials are invented and how we compute, heal ourselves, repair the environment, and feed the world. Janine Benyus takes readers into the lab and in the field with maverick thinkers as they: discover miracle drugs by watching what chimps eat when they're sick; learn how to create by watching spiders weave fibers; harness energy by examining how a leaf converts sunlight into fuel in trillionths of a second; and many more examples. Composed of stories of vision and invention, personalities and pipe dreams, Biomimicry is must reading for anyone interested in the shape of our future.

Why Don't Penguins' Feet Freeze? Legislative Reference Bureau

Friendly little gremlins help a Royal Air Force fighter pilot in World War II.

WOW! Harry N. Abrams

Comprehensive manual for understanding and carrying out marine mammal rescue activities for stranded seals, manatees, dolphins, whales, or sea otters.

Amazing Classroom Essentials Steadwell Books

Cnidarians are elegant and dazzling aquatic organisms, but despite their beauty they are known to be a threat in many coastal areas around the world. Several species of cnidaria living in tropical or sub-tropical areas are remarkably dangerous, but many Mediterranean species can also cause serious health problems. Really, cnidarians (sea anemones, corals, medusae) are considered among the most dangerous and venomous organisms, thanks to the occurrence in their tissues of batteries of intracellular capsules (nematocysts or cnidocysts) produced by the Golgi apparatus of specialized cells (nematocytes or cnidocytes) from which the phylum Cnidaria takes the name (from the Greek κνίδη = nettle). The consequences of human encounters with cnidarians vary widely, from simple skin irritation to serious anaphylactic manifestations in sensitive subjects. During the last few decades, cnidarians have been perceived as increasingly dangerous due to recurrent jellyfish outbreaks which constitute a threat both for human health and economy and for the environmental equilibrium. In addition, the occurrence of alien species, whose spread is facilitated by human activities, environmental changes, global warming, or man-made modifications of the natural features of territories, pose new and serious challenges to environmental management. For all these reasons, cnidarians can be viewed as a problem. Nevertheless, cnidarians are also viewed with particular interest due to their potential in the field of natural products. Scientists have realized the potential of natural resources hidden in aquatic environments for the development of new drugs or bioactive substances with wide potential use. At present, an enormous scientific literature is available about the value of cnidarian products as potential therapeutic agents, in human nutrition, or for other applications. As such, these organisms can also be reasonably considered a resource. Taking into consideration these two main aspects, this book aims to collect the experiences and recent research data on cnidarians and review present knowledge on the subject.

Caroli Linnaei, Med. Doct., Soc. Ac. Imper. Nat. Cur., Classes Plantarum, Seu, Systemata Plantarum Omnia a Fructificatione Desumta

John Murray

Relates the history of the gods and goddesses worshipped by the ancient Egyptians and describes how they were depicted.

Blue Dog National Aquarium in Baltimore

Discusses the history of various topics related to oceans and oceanography, covering mapping, the origins of ocean basics, the ocean floor, measurement of depth and flow, the creatures that inhabit the depths of the sea, and the adventures of modern explorers.

Schoolyard Safari Cambridge University Press

Describes the nature of oceans, the life that they support, and the scientists who study and protect them.

Encyclopedia of Animal Rights and Animal Welfare Prabhat Prakashan

Why Don't Penguins' Feet Freeze? is the latest compilation of readers' answers to the questions in the 'Last Word' column of New Scientist, the world's best-selling science weekly. Following the phenomenal success of Does Anything Eat Wasps? - the Christmas 2005 surprise bestseller - this new collection includes recent answers never before published in book form, and also old favourites from the column's early days. Yet again, many seemingly simple questions turn out to have complex answers. And some that seem difficult have a very simple explanation. New Scientist's 'Last Word' is regularly voted the magazine's most popular section as it celebrates all questions - the trivial, idiosyncratic, baffling and strange. This new selection of the best is popular science at its most entertaining and enlightening.

This product has over 225 pages of display pieces that you can utilize in your classroom! (Alphabet display pieces are intended for decor, storage, bulletin board display pieces only. It is not intended as an educational teaching tool or resource.) Everything you will need to set-up your classroom this school year is in this packet. This packet is overloaded with over 470 classroom essentials! From Bulletin Board Letters to Pocket Chart Cards. The sleek and class red design with a polkadot backdrop and apple red trim will simplify your life and allow you to customize the pieces you need from year to year. This packet will definitely save you time and money! The Classic Design pieces can be printed in black and white and in full color. Print on cardstock paper and laminate for longer durability. This packet includes the following items: Bulletin Board Letters 26 Uppercase Letters 26 Lowercase Letters Numbers 0 to 9 15 Punctuation Marks & Symbols Name Plates and Labels Welcome Back - Pennant Banner Word Wall Alphabet Labels (Letters A to Z) Word Wall - 220 Dolch Sight Words Binder Cover Designs Classroom Essential Labels Student Labels/Locker Tags Binder Spines & Pocket Chart Labels

There's a Hair in My Dirt! Rourke Educational Media

Constituting more than 70 percent of Earth's surface, the world's oceans are so vast as to remain something of an enigma to this day. Navigating these imposing seas and unlocking their secrets is the calling of oceanographers. Their research helps determine what climatic, geologic, and chemical impact oceans have on a variety of organisms. In spite of their magnitude and might, the world's oceans are not immune to the effects of adverse human activity, such as pollution. This volume surveys this huge, but fragile, ecosystem and the individuals who help fight for the preservation of this vital resource that has critical significance to all earthly life.

Texas Aquatic Science National Geographic Books

The Biology (5th ed.) Student Text takes the student on a quest to understand God's living world, from the microscopic world of the cells to the macroscopic world of plants, animals, and the human body. Clear scientific images help them picture the cell's workings, and galleries of photos in every chapter give them a sense of the classification of life. Case studies, webquests, lab activities, and questions help students think like scientists and understand that biology makes sense from a biblical perspective. - Publisher.

Life on an Ocean Planet The Rosen Publishing Group, Inc

A module to help students to understand the key concepts of the scientific method. By experiencing the process of scientific inquiry, students come to recognize the role of science in society.

Protection of Wetlands Springer Nature

A story about an earthworm family, a comely maiden, and what really goes on in the natural world.

The Primary English Teacher's Guide Dark Horse Comics

Teacher digital resource package includes 2 CD-ROMs and 1 user guide. Includes Teacher curriculum guide, PowerPoint chapter presentations, an image gallery of photographs, illustrations, customizable presentations and student materials, Exam Assessment Suite, PuzzleView for creating word puzzles, and LessonView for dynamic lesson planning. Laboratory and activity disc includes the manual in both student and teacher editions and a lab materials list.

Oceans Routledge

A review of the plant systems of other authors beginning with Andrea Caesalpino (1519-1603), and an elaboration of Linnaeus' own rules for a natural system which he earlier expressed in the second part of Fundamenta botanica. Dedicated to Nils Reuterholm (1676-1756) and Gabriel G. Gyllengrip (1687-1753).

Oceans and Oceanography HarperCollins

This book highlights interdisciplinary insights, latest research results, and technological trends in Business Intelligence and Modelling in fields such as: Business Intelligence, Business Transformation, Knowledge Dissemination & Implementation, Modeling for Logistics, Business Informatics, Business Model Innovation, Simulation Modelling, E-Business, Enterprise & Conceptual Modelling, etc. The book is divided into eight sections, grouping emerging marketing technologies together in a close examination of practices, problems and trends. The chapters have been written by researchers and practitioners that demonstrate a special orientation in Strategic Marketing and Business Intelligence. This volume shares their recent contributions to the field and showcases their exchange of insights.
