— — — — — off legitimate research interests against artists' justified claims for economic gratification? And how could new methods of documentation and dissemination, for example on the Internet, contribute to a more liberal access to the (so-far) closed-circuit system of established formulas for the mediation of multi-media artworks, in order to create a wider frame of reference via new visualization techniques? These questions were debated among other issues at an international symposium, held in the spring of 2004 at the University of Art in Bremen. As intentionally reflected in the adapted title from Dan Graham's seminal video-feedback installation »Present Continuous Past(s)«, the

conference discussions crystallized around three main aspects, namely the relation of the artists' intention to the faithful presentation and preservation of multi-media artworks for possible future re-presentations, the specific reception conditions that these works require as much in their gallery displays as under the conditions of post-exhibition documentation (particularly in anticipation of future presentations), and finally – as implicitly reflected in all of these aspects – the philosophical dimensions of media art's historicity. Media art's »becoming-of-age« has generally caused more concern and has led to more useful strategic initiatives within the museum context than in the academic field of art history.

The bestselling book revealing why Americans are so fearful, and why we fear the wrong things--now updated for the age of Trump In the age of Trump, our society is defined by fear. Indeed, three out of four Americans say they feel more fearful today than they did only a couple decades ago. But are we living in exceptionally perilous times? In his bestselling book *The Culture of Fear*,

sociologist Barry Glassner demonstrates that it is our perception of danger that has increased, not the actual level of risk. Glassner exposes the people and organizations that manipulate our perceptions and profit from our fears: politicians who win elections by heightening concerns about crime and drug use even as rates for both are declining; advocacy groups that raise money by exaggerating the prevalence of particular diseases; TV shows that create a new scare every week to garner ratings. Glassner spells out the prices we pay for social panics: the huge sums of money that go to waste on unnecessary programs and products as well as time and energy spent worrying about our fears. All the while, we are distracted from the true threats, from climate

change to worsening inequality. In this updated edition of a modern classic, Glassner examines the current panics over vaccination and "political correctness" and reveals why Donald Trump's fearmongering is so dangerously effective.

John Wood (born 1969) and Paul Harrison (born 1966) fuse their aesthetic research with existential slapstick comedy. Working together since 1993, the British duo use a wide variety of

props, including furniture, household utensils and their own bodies, setting up comical interactions with objects that they record in austere video works.

Describing themselves as performance artists and sculptors whose audience is the video camera, Wood and Harrison are heirs to silent film comics Charlie Chaplin and Buster Keaton and to uniquely British comedy troupes like Monty Python. Through their efforts, no matter how absurd, Sisyphean or masochistic, Wood and Harrison reveal the potential for inventive play in all scenarios. Grounded in the joys and pratfalls of the everyday, Wood and Harrison's blend of high and low, philosophical and funny, captures both a sense of wonder and the thrill of genuine experimentation.
