Part Mao biography, part historical overview of the turbulent story of China's Communist revolutions, the introductory essay traces the history of twentieth-century China, from Mao's early career up to the Chinese Communist

Party's victory in 1949, through three decades of revolution to Mao's death in 1976. The second half of the volume offers a selection of Mao's writings — including such seminal pieces as "On New Democracy" and selections from the Little Red Book — and writings about Mao and his legacy by both his contemporaries and modern scholars.

Springer Nature

Volume 9, Part 2 of The Cambridge History of China is the second of two volumes which together explore the political, social and economic developments of the Ch'ing Empire during the seventeenth and eighteenth centuries prior to the arrival of Western military power. Across fifteen chapters, a team of leading historians explore how the eighteenth century's greatest contiguous empire in terms of geographical size, population, wealth, cultural production, political order and military domination peaked and then began to unravel. The book sheds new light on the changing systems deployed under the Ch'ing dynasty to govern its

large, multi-ethnic Empire and surveys the dynasty's complex relations with neighbouring states and Europe. In this compelling and authoritative account of a significant era of early modern Chinese history, the volume illustrates the ever-changing nature of the Ch'ing Empire, and provides context for the unforeseeable challenges that the nineteenth century would bring.

This comprehensive overview of the modern Chinese economy by a noted expert from China

offers a quality and breadth of coverage. In this book, the author provides an introduction to China's economy since 1949 and original insights based on his own extensive research. The book sets out to analyze and compare the operational mechanisms of the Chinese economy between the pre- and post-reform periods and through national, regional and local dimensions. Both positive and negative consequences of the Chinese economic transformation have been clarified. A multiregional comparison of the Chinese economy is conducted in terms of natural and human resources, institutional evolution, as well as economic and social

performances. At last, some key issues relating to the inherent operational mechanisms of and the dynamic patterns of the Chinese economy are also discussed.

**A Brief History of Chinese Fiction, by Lu Hsun** Cambridge University Press

This brief discourse is an introduction to the historical development of medicine in China, whose influence on Korea, Japan and Southeast Asia was profound and even reached far west into the Islamic world. The authors wish to make the interested reader aware of China's rich contribution to the world growth of the medical sciences. Too often the view has been taken that the history of medicine began with the

discoveries of the Greeks and those ancient nations from whom they learnt. The authors want to redress this view and acquaint readers with a glimpse of the concepts and history of Chinese medicine and hope that they will feel encouraged to delve deeper.

China's economic  
growth has  
transformed the

country from one of the poorest in the world to its second largest economy. Understanding the drivers of growth remains elusive as the country is affected by both its transition from central planning and the challenges of a developing country. This book examines the main themes of growth, offering micro level evidence to shed light on the macro drivers of the economy. It also focuses on law and informal institutions of the economy to highlight the importance of entrepreneurship and the development of the private sector.

Studies of Sino-Viet  
relations have

traditionally focused on Chinese aggression and Vietnamese resistance, or have assumed out-of-date ideas about Sinicization and the tributary system. They have limited themselves to national historical traditions, doing little to reach beyond the border. Ming China and Vietnam, by contrast, relies on sources and viewpoints from both sides of the border, for a truly transnational history of Sino-Viet relations. Kathlene Baldanza offers a detailed examination of geopolitical and cultural relations between Ming China (1368-1644) and Dai Viet, the state that would go on to become Vietnam. She highlights the internal debates and external alliances that

characterized their diplomatic and military relations in the pre-modern period, showing especially that Vietnamese patronage of East Asian classical culture posed an ideological threat to Chinese states.

Baldanza presents an analysis of seven linked biographies of Chinese and Vietnamese border-crossers whose lives illustrate the entangled histories of those countries.
