THE PLACE OF PHILOSOPHY IN COGNITIVE SCIENCE

During the last few years, many books have been published and many meetings have been held on Cognitive Science. A cursory review of their contents shows such a diversity of topics and approaches that one might

well infer that there are no genuine criteria for classifying a paper or a lecture as a contribution to Cognitive Science. It is as though the only criterion is to have appeared in a book or in the programme of a meeting or title we can find the expression " . . . Cognitive Science" in whose name or something like that. Perhaps this situation is due to the (relative) youth of the field, which is seeking its

own identity, still involved in a process of formation and consolidation within the scientific community; but there are actually deep disagreements about how a science of the mind should be worked out, including how to understand its own subject, that is, "the mind." While for some the term makes reference to a set of phenomena impossible to grasp by any scientific approach, for others "the mind" would

be a sort of myth, and the mental terms await elimination by other more handy and empirically tractable terms.

Ras Shamra

Parallels

University of California Press

This in-depth treatise presents conclusive evidence for an extremely close relationship between ancient Egyptian religious beliefs and the Book of Revelation. Practically all characters,

scenes and series of scenes found in Revelation have parallels in mainstream Egyptian sources, including the Book of the Dead, the Amduat, Book of Gates, Book of Aker, Books of the Heavens and others. Parallel characters include Egypt's Apophis as Revelation's Satan while situations and activities in scenes include the judgment scene and singers by a lake of fire. Parallel

sequences of scenes include those found in the 2nd to 12th Divisions of the Book of Gates and most of Revelation's Chapters 15-21.

Allusions to the Book of Dead are common. Finally, a key conclusion: the entire structure of the Book of Revelation can be accounted for in the organization of text and paintings on the walls and ceilings of the tomb of Ramesses VI in Egypt's Valley of the

Kings. Fully referenced to enable critical review. See revorigin.com

Hausa is the first language of over twenty-five million ethnic Hausa people and an important trade language throughout West Africa. This title is an introduction to Hausa and was created to provide instruction to expatriates

both in Nigeria and in the United States. Dialogues, conversations, and drills are among the tools used to teach pronunciation, grammar, and vocabulary. Each lesson centers on a situation—such as a visit to the market, home, or doctor—typical of life in northern Nigeria and southern Niger in the early 1970s. Fireside tales and proverbs provide additional insights into the cultural world and

social reality of the Hausa people. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again

using print-on-demand technology. This title was originally published in 1973. Remarkably,</p>	<p>in the 1990s several new lines of research have appeared, with series of original publications by Fred Johnson, Richard Patterson and Ulrich Nortmann. Johnson presented for the first time a formal semantics adequate to a de re reading of the apodeictic syllogistic; this was based on a simple intuition linking the modal syllogistic to Aristotelian metaphysics.</p>	<p>Nortmann developed an ingenious de dicto analysis. Patterson articulated the links (both theoretical and genetic) between the modal syllogistic and the metaphysics, using an analysis which strictly speaking is neither de re nor de dicto. My own studies in this field date from 1976, when my colleague Peter Roeper and I jointly wrote a paper "Aristotle's apodeictic syllogisms" for the XXIIInd</p>

History of Logic Conference in Krakow. This paper contained the disjunctive reading of particular affirmative apodeictic propositions, which I still favour. Nonetheless, I did not consider that paper's results decisive or comprehensive enough to publish, and my 1981 book *The Syllogism* contained no treatment of the modal syllogism. The paper's ideas lay dormant till 1989, when I read

Johnson's and Patterson's initial articles. I began publishing on the topic in 1991. Gradually my thoughts acquired a certain comprehensiveness and systematicity, till in 1993 I was able to take a semester's sabbatical to write up a draft of this book. **Aquatic Insects of California** JHU Press Reinforced cloth library binding, no dust jacket, individual shrinkwrap

Semitic words and names appear in unprecedented numbers in texts of the New Kingdom, the period when the Egyptian empire extended into Syria-Palestine. In his book, James Hoch provides a comprehensive account of these words--their likely

origins, their contexts, and their implications for the study of Egyptian and Semitic linguistics and Late-Bronze and Iron-Age culture in the eastern Mediterranean. Unlike previous word catalogs, this work consists of concise word studies and contains a wealth of linguistic, lexical, and cultural information. Hoch considers some five hundred Semitic words found in Egyptian texts

from about 1500 to 650 b.c.e. Building on previous scholarship, he proposes new etymologies and translations and discusses phonological, morphological, and semantic factors that figure in the use of these words. The Egyptian evidence is essential to an understanding of the phonology of Northwest Semitic, and Hoch presents a major reconstruction of the phonemic systems. Of

equal importance is his account of the particular semantic use of Semitic vocabulary, in contexts sometimes quite different from those of the Hebrew scriptures and Ugaritic myths and legends. With its new critical assessment of many hotly debated issues of Semitic and Egyptian philology, this book will be consulted for its lexical and linguistic conclusions and will serve

as the basis for future work in both fields. Originally published in 1994.
