Barrons Educational Series

Weaving into the narrative his own firsthand field experiences around the world, the author, an ecologist brings ecology alive while giving a solid understanding of the science at work behind today's pressing environmental issues. He delves into topics including deforestation, biodiversity loss, over fishing, population growth, use of fossil fuel and climate change while discussing the

real consequences of our growing ecological footprint. Coral reefs are on track to become the first ecosystem actually eliminated from the planet. So says the author in this crash course on the state of the planet. He draws from his own extensive work on coral reefs, and from recent research by other ecologists, to explore the many ways we are changing the Earth and to explain why

it matters. Most important, this book emphasizes that a gloom-and-doom scenario is not inevitable, and as the author explores alternative paths, he considers the ways in which science can help us realize a better future.

Although only six years old, Antonio Marez is perceptive beyond his years. He was brought into the world with the help of Ultima, a curandera, or folk healer, in touch with nature and the spirit world.  
Revered by some as a wisewoman

but rebuked by others as a witch, Ultima has now come back to stay with Tony's family in New Mexico. As Tony seeks out his destiny—torn between his mother's farming forebears and his father's wandering vaquero roots, between Spanish Catholicism and the gods of his indigenous ancestors—Ultima's loving tutelage will help him navigate questions of life and death, good and evil,

and reveal to him the vastness of the heritage that shapes him, in this pioneering work of literature. Penguin Vitae—loosely translated as “Penguin of one’s life”—is a deluxe hardcover series from Penguin Classics celebrating a dynamic and diverse landscape of classic fiction and nonfiction from seventy-five years of publishing. Penguin Vitae provides readers with

beautifully designed classics that have shaped the course of their lives, and welcomes new readers to discover these literary gifts of personal inspiration, intellectual engagement, and creative originality. In this lively and eye-opening book, educator Myron Dueck reveals how many of the</p>	<p>assessment policies that teachers adopt can actually prove detrimental to student motivation and achievement and shows how we can tailor policies to address what really matters: student understanding of content. In sharing lessons, anecdotes, and cautionary tales from his own experiences revamping assessment procedures in the classroom, Dueck offers a</p>

variety of practical strategies for ensuring that grades measure what students know without punishing them for factors outside their control; critically examining the fairness and effectiveness of grading homework assignments; designing and distributing unit plans that

make assessment criteria crystal-clear to students; creating a flexible and modular retesting system so that students can improve their scores on individual sections of important tests. *Grading Smarter, Not Harder* is brimming with reproducible forms, templates, and real-life

examples of grading solutions developed to allow students every opportunity to demonstrate their learning. Written with abundant humor and heart, this book is a must-read for all teachers who want their grades to contribute to, rather than hinder, their students' success.
