Histories of the USSR
during World War II
generally portray the
Kremlin's restoration of
the Russian Orthodox
Church as an attempt by
an ideologically bankrupt
regime to appeal to
Russian nationalism in

order to counter the
mortal threat of Nazism.
Here, Steven Merritt Miner
argues that this version of
events, while not wholly
untrue, is incomplete.
Using newly opened
Soviet-era archives as
well as neglected British
and American sources, he
examines the complex
and profound role of
religion, especially
Russian Orthodoxy, in the
policies of Stalin's
government during World

War II. Miner
demonstrates that Stalin
decided to restore the
Church to prominence not
primarily as a means to
stoke the fires of Russian
nationalism but as a tool
for restoring Soviet power
to areas that the Red
Army recovered from
German occupation. The
Kremlin also harnessed
the Church for
propaganda campaigns
aimed at convincing the
Western Allies that the

USSR, far from being a source of religious repression, was a bastion of religious freedom. In his conclusion, Miner explores how Stalin's religious policy helped shape the postwar history of the USSR.

Bad Girls and Transgressive Women in Popular Television, Fiction, and Film

Stenhouse Publishers

Women today are expected to multitask--to serve, lead, influence, manage their busy schedules, nurture their families, and at the same time harness their emotions. Meanwhile, Satan, the longtime enemy of women, tells them they are not good enough, not successful enough, and certainly not capable of making a

difference. An author who knows how to access the power and gifts of the Holy Spirit in everyday life, Staci Wallace helps women resist the forces of darkness and rise up empowered to take on and win whatever battle they face. In *Fueled by Fire*, she takes readers on a journey through the lives of women in the Bible as well as through her own story of conquering deadly diseases, climbing corporate ladders, and raising world-changers. She inspires women to

believe that, with God, anything is possible. *Imperial Bancorp* Phoemixx Classics Ebooks Explore the world with students in grades 7-8 using *Discovering the World of Geography*. "We cannot change the cards we are dealt, just how we play the hand."--- Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what

matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the

lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his

lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come. **Stone Fox** Simon and Schuster

Marty Preston wonders why it is that despite Judd Traver's attempts to redeem himself everyone is still so willing to think the worst of him. Marty's friend David is sure that Judd will be named as the murderer of a man who has been missing. Others are sure that Judd is behind a series of burglaries in the area. But Marty's parents and, with some trepidation, Marty himself persist in their attempts to be good

neighbors and to give Judd a second chance. Now that Marty has Shiloh, maybe he can help Judd to take better care of his other dogs. Then again, maybe folks are right -- there's no way a Judd Travers can ever change for the good. Then a terrifying life-or-death situation brings this dilemma into sharp focus. Saving Shiloh is a powerful novel that brings this trilogy to a close. *International Virtual Conference on Industry 4.0* New Press, The We all know that orange is

the new black and mass incarceration is the new Jim Crow, but how much do we actually know about the structure, goals, and impact of our criminal justice system? Understanding Mass Incarceration offers the first comprehensive overview of the incarceration apparatus put in place by the world's largest jailer: the United States. Drawing on a growing body of academic and professional work, Understanding Mass Incarceration describes in plain English the many

competing theories of criminal justice—from rehabilitation to retribution, from restorative justice to justice reinvestment. In a lively and accessible style, author James Kilgore illuminates the difference between prisons and jails, probation and parole, laying out key concepts and policies such as the War on Drugs, broken windows policing, three-strikes sentencing, the school-to-prison pipeline, recidivism, and prison privatization. Informed by the crucial lenses of race

and gender, he addresses issues typically omitted from the discussion: the rapidly increasing incarceration of women, Latinos, and transgender people; the growing imprisonment of immigrants; and the devastating impact of mass incarceration on communities. Both field guide and primer, *Understanding Mass Incarceration* will be an essential resource for those engaged in criminal justice activism as well as those new to the subject. *Any Small Goodness* ASCD

This book presents the proceedings of the International Virtual Conference on Industry 4.0 (IVCI4.0 2020). This conference brings together specialists from the academia and industry sectors to promote the exchange of knowledge, ideas, and information on the latest developments and applied technologies in the field of Industry 4.0. The book discusses a wide range of topics such as the design of smart and intelligent products, developments in recent technologies,

rapid prototyping and reverse engineering, multistage manufacturing processes, manufacturing automation in the Industry 4.0 model, cloud-based products, and cyber-physical and reconfigurable systems, etc. The volume supports the transfer of vital knowledge to the next generation of academics and practitioners.

One of the greatest challenges for English language arts teachers

today is the call to engage students in more complex texts. Tim Gillespie, who has taught in public schools for almost four decades, has found the lenses of literary criticism a powerful tool for helping students tackle challenging literary texts. Tim breaks down the dense language of critical theory into clear, lively, and thorough explanations of many schools of critical thought--reader response, biographical, historical, psychological, archetypal, genre based, moral,

philosophical, feminist, political, formalist, and postmodern. Doing Literary Criticism gives each theory its own chapter with a brief, teacher-friendly overview and a history of the approach, along with an in-depth discussion of its benefits and limitations. Each chapter also includes ideas for classroom practices and activities. Using stories from his own English classes--from alternative programs to advance placement and everything in between--Tim provides

a wealth of specific classroom-tested suggestions for discussion, essay and research paper topics, recommended texts, exam questions, and more. The accompanying CD offers abbreviated overviews of each theory (designed to be used as classroom handouts, examples of student work, collections of quotes to stimulate discussion and writing, an extended history of women writers, and much more. Ultimately, *Doing Literary Criticism* offers teachers a

rich set of materials and tools to help their students become more confident and able readers, writers, and critical thinkers.

John Reynolds Gardiner's classic action-packed adventure story about a thrilling dogsled race has captivated readers for more than thirty years. Based on a Rocky Mountain legend, *Stone Fox* tells the story of Little Willy, who lives with his grandfather in Wyoming. When Grandfather falls ill,

he is no longer able to work the farm, which is in danger of foreclosure. Little Willy is determined to win the National Dogsled Race—the prize money would save the farm and his grandfather. But he isn't the only one who desperately wants to win. Willy and his brave dog Searchlight must face off against experienced racers, including a Native American man named Stone Fox, who has never lost a race. Exciting and heartwarming, this novel has sold millions of copies and was named a New

 This groundbreaking book offers a comprehensive theory of executive functioning (EF) with important clinical implications. Synthesizing cutting-edge neuropsychological and evolutionary research, Russell A. Barkley presents a model of EF that is rooted in

meaningful activities of daily life. He describes how abilities such as emotion regulation, self-motivation, planning, and working memory enable people to pursue both personal and collective goals that are critical to survival. Key stages of EF development are identified and the far-reaching individual and social costs of EF deficits detailed. Barkley explains specific ways that his model may support much-needed advances in assessment and treatment. See also

public school. Fresh-mouthed and free-spirited, the irrepressible Madame Esmé—as she prefers to be called—does the cha-cha during multiplication tables, roller-skates down the hallways, and puts on rousing performances with at-risk students in the library. Her diary opens a window into a real-life classroom from a teacher's perspective. While battling bureaucrats, gang members, abusive parents, and her own insecurities, this gifted

young woman reveals what it takes to be an exceptional teacher. Heroine to thousands of parents and educators, Esmé now shares more of her ingenious and yet down-to-earth approaches to the classroom in a supplementary guide to help new teachers hit the ground running. As relevant and iconoclastic as when it was first published, *Educating Esmé* is a classic, as is Madame Esmé herself. *Saving Shiloh* Hachette Books
Every year, the Federation

of European Biochemical Societies sponsors a series of Advanced Courses designed to acquaint postgraduate students and young postdoctoral fellows with theoretical and practical aspects of topics of current interest in biochemistry, particularly within areas in which significant advances are being made. This volume contains the Proceedings of FEBS Advanced Course No. 88-02 held in Bari, Italy on the topic "Organelles of Eukaryotic Cells: Molecular Structure

and Interactions." It was a deliberate decision of the organizers not to restrict FEBS Advanced Course 88-02 to a discussion of a single organelle or a single aspect but to cover a broad area. One of the objectives of the course was to compare different organelles in order to allow the participants to discern recurrent themes which would illustrate that a basic unity exists in spite of the diversity. A second objective of the course was to acquaint the participants with the

latest experimental approaches being used by investigators to study different organelles; this would illustrate that methodologies developed for studying the biogenesis of the structure-function relationships in one organelle can often be applied fruitfully to investigate such aspects in other organelles. A third objective was to impress upon the participants that a study of the interaction between different organelles is intrinsic to understanding their

physiological functions. This volume is divided into five sections. Part I is entitled "Structure and Organization of Intracellular Organelles." *The Trip of Le Horla* Houghton Mifflin Harcourt Now in its 4th edition, this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme throughout is that

what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers, and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter addresses a broad question about social studies education;

sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in the book and online are especially designed to help new teachers to address common core learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, and Classroom Activities designed to provoke

discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to on-line essays about related social studies topics. Activities are followed by four categories: "Think it over," "Add your voice to the discussion," "Try it yourself," and "It's your classroom." All of these are supported with online teaching material. Designed for undergraduate and graduate pre-service

social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data-driven, standards-based instruction, especially in relation to

the common core curriculum Addresses the interactive nature of learning in updated technology sections Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on-line material linked to the text *Get Up or Give Up* Routledge Providing guidance on a broad range of issues for young children and adolescents, *Ergonomics for Children: Designing Products and Places for*

Toddlers to Teens give you a deep understanding of how children develop and how these developmental changes can influence the design of products and places for children. Copiously illustrated with photos and other images, the book helps you quickly find answers to your questions, grasp concepts, and apply them. Its subsections are organized to help you locate and understand the content you need. Edited by experts with contributions from an

international panel, the book is both broad in coverage and international in perspective. The contributors review the ways in which children develop physically, perceptually, cognitively, and socially and then use this information to provide practical guidelines for the design of places and products for children.
