The product of five years' investigative reporting, the subject of intense national controversy, and the source of death threats that forced the National Human Rights Commission to assign two full-time bodyguards to its author, Anabel Hernández, *Narcoland* has been a publishing and political sensation in

Mexico. The definitive history of the drug cartels, *Narcoland* takes readers to the front lines of the "war on drugs," which has so far cost more than 60,000 lives in just six years. Hernández explains in riveting detail how Mexico became a base for the mega-cartels of Latin America and one of the most violent places on the planet. At every turn, Hernández names names – not just the narcos, but also the politicians, functionaries, judges and entrepreneurs who have collaborated with them. In doing so, she reveals the mind-boggling depth of corruption in Mexico's

government and business elite. Hernández became a journalist after her father was kidnapped and killed and the police refused to investigate without a bribe. She gained national prominence in 2001 with her exposure of excess and misconduct at the presidential palace, and previous books have focused on criminality at the summit of power, under presidents Vicente Fox and Felipe Calderón. In awarding Hernández the 2012 Golden Pen of Freedom, the World Association of Newspapers and News Publishers noted, "Mexico has become one of the most

dangerous countries in the world for journalists, with violence and impunity remaining major challenges in terms of press freedom. In making this award, we recognize the strong stance Ms. Hernández has taken, at great personal risk, against drug cartels."

relación de los escritores con la prensa, su progenitor Kingsley Amis... El resultado es un auténtico festín de textos sagaces y estimulantes que maridan periodismo y literatura, elegido Libro de Año por el Sunday Times/ Times Literary Supplement. **Barbarous Mexico** Orient Paperbacks A MEMOIR BY THE YOUNGEST RECIPIENT OF THE NOBEL PEACE PRIZE As seen on Netflix with David Letterman "I come from a country that was created at midnight. When I almost died it was just after midday." When the Taliban took control of the Swat Valley in Pakistan, one girl spoke out. Malala Yousafzai refused to be silenced and fought for her right to an education. On Tuesday, October 9, 2012, when she was fifteen, she almost paid the ultimate price. She was shot in the head at point-blank range while riding the bus home from school, and few expected her to survive. Instead, Malala's miraculous recovery has taken her on an extraordinary journey from a remote valley in northern Pakistan to the halls of the United Nations in New York. At sixteen, she became a global symbol of peaceful protest and the youngest nominee ever for the Nobel Peace Prize. I AM MALALA is the

remarkable tale of a family uprooted by global terrorism, of the fight for girls' education, of a father who, himself a school owner, championed and encouraged his daughter to write and attend school, and of brave parents who have a fierce love for their daughter in a society that prizes sons. I AM MALALA will make you believe in the power of one person's voice to inspire change in the world.

Caleidoscopio St. Martin's Paperbacks Is IQ destiny? Not nearly as much as we think. This fascinating and persuasive program argues that our view of human intelligence is far too narrow, ignoring a crucial range of abilities that matter immensely in terms of how we do in life. Drawing on groundbreaking brain and behavioral research, Daniel Goleman shows the factors at work when people of high IQ flounder and those of modest IQ do well. These factors add up to a different way of being smart -- one he terms "emotional intelligence." This includes self-awareness and impulse control, persistence, zeal and self-motivation, empathy and social deftness. These are the qualities that mark people who excel

in life, whose relationships flourish, who are stars in the workplace. Lack of emotional intelligence can sabotage the intellect and ruin careers. Perhaps the greatest toll is on children, for whom risks include depression, eating disorders, unwanted pregnancies, aggressiveness and crime. But the news is hopeful. Emotional intelligence is not fixed at birth, and the author shows how its vital qualities can be nurtured and strengthened in all of us. And because the emotional lessons a child learns actually sculpt the brain's circuitry, he provides guidance as to how parents and schools can best use this window of opportunity in childhood. The message of this eye-opening program is one we must take to heart: the true "bell curve" for a democracy must measure emotional intelligence

Esta es la primera biografía de Yolanda Díaz, la política mejor valorada del Gobierno de coalición. La vicepresidenta y ministra que tuvo que luchar contra lo imposible para sacar adelante la aprobación de la polémica reforma laboral. La mujer que podría cambiar la historia de

España. Con información de primera mano obtenida a través de más de cincuenta testimonios -entre ellos, los de Pablo Iglesias o la exministra de Trabajo, Magdalena Valerio- y de todo su entorno personal y político, los periodistas Manuel Sánchez y Alexis Romero relatan en este libro la trayectoria fascinante de una mujer que ha llegado a lo más alto de la política española: desde sus primeros pasos en el activismo, la estrecha relación con su padre -el histórico sindicalista Suso Díaz-, su ingreso en el partido comunista, sus primeras campañas -incluidos tanto sus éxitos como sus fracasos-, hasta su entrada en el Gobierno como vicepresidenta segunda y ministra de Trabajo y Economía Social. Yolanda Díaz, la dama roja es el retrato de una mujer luchadora y comprometida con los valores de izquierda, que ha revolucionado el panorama político y que, si nada se lo impide, puede darle la vuelta al tablero de cara a las próximas elecciones generales de nuestro país. Citas: «¿De dónde viene la esperanza blanca de una parte de la izquierda? ¿Qué opinan de ella quienes la conocen desde sus comienzos en política? Esta es la historia de Yolanda Díaz. Sin

trampas ni cartón. Sin apriorismos y sin prejuicios». Esther Palomera «Este libro es una travesía apasionante por la política española. Según un histórico dirigente de IU «la izquierda soñaba con ella antes de existir». Es la historia de una mujer que mira más allá del horizonte. Es un libro escrito con rigor y objetividad». In this new edition of his critically acclaimed book, Jon Elster examines the nature of social behavior, proposing choice as the central concept of the social sciences. Extensively revised throughout, the book offers an overview of key explanatory mechanisms, drawing on many case studies and experiments to explore the nature of explanation in the social sciences; an analysis of the mental states - beliefs, desires, and emotions - that are precursors to action; a systematic comparison of rational-choice models of behavior with alternative accounts, and a review of mechanisms of social interaction ranging from strategic behavior to collective decision making. A wholly new chapter includes an exploration of classical moralists and Proust in charting mental mechanisms operating 'behind the back' of the agent, and a new conclusion points to the pitfalls and fallacies in current ways of doing social science, proposing guidelines for more modest and more robust procedures.

Clearly babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers"and learners"every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? *Eager to Learn* explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children

from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning needs of minority children, children with disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and continuing development of teachers. *Eager to Learn* presents a comprehensive, coherent picture of early

childhood learning, along with a clear path toward improving this important stage of life for all children.

John Ratey, bestselling author and clinical professor of psychiatry at Harvard Medical School, lucidly explains the human brain's workings, and paves the way for a better understanding of how the brain affects who we are. Ratey provides insight into the basic structure and chemistry of the brain, and demonstrates how its systems shape our perceptions, emotions, and behavior. By giving us a greater understanding of how the brain responds to the guidance of its user, he provides us with knowledge that can enable us to improve our lives. In *A User's Guide to the Brain*, Ratey clearly and succinctly surveys what scientists now know about the brain and how we use it. He looks at the brain as a malleable organ capable of improvement and change, like any muscle, and examines the way specific motor functions might be applied to overcome neural disorders ranging from everyday shyness to autism. Drawing on examples from his practice and from everyday life, Ratey illustrates that the most important lesson we can learn about our brains is how to use them to their maximum potential. From Neurons to Neighborhoods MIT Press Mission is not the ultimate goal of the

church. Worship is. Missions exist because worship doesn't. Worship is ultimate.' John Piper's contemporary classic draws on key biblical texts to demonstrate that worship is the ultimate goal of the church and that proper worship fuels missionary outreach. Piper offers a biblical defence of God's supremacy in all things, providing a sound theological foundation for missions. He examines whether Jesus is the only way to salvation and issues a passionate plea for God-centredness in the missionary enterprise, seeking to define the scope of the task and the means for reaching 'all nations'. *Let the Nations Be Glad!* is a trusted resource for missionaries, pastors, church leaders, youth workers, seminary students, and all who want to connect their labours to God's global purposes. An analysis of contemporary violence as the new commodity of today's hyper-consumerist stage of capitalism. "Death has become the most profitable business in existence." —from *Gore Capitalism* Written by the Tijuana activist intellectual Sayak Valencia, *Gore Capitalism* is a crucial essay that posits a decolonial, feminist philosophical approach to the outbreak of violence in Mexico and, more broadly, across the global regions of the Third World. Valencia argues that violence itself has become a product within hyper-consumerist neoliberal capitalism, and that tortured and mutilated bodies have become commodities to be traded and utilized for profit in an age of impunity and governmental austerity. In a lucid and transgressive voice, Valencia unravels the workings of the politics of death in the

context of contemporary networks of hyper-consumption, the ups and downs of capital markets, drug trafficking, narcopower, and the impunity of the neoliberal state. She looks at the global rise of authoritarian governments, the erosion of civil society, the increasing violence against women, the deterioration of human rights, and the transformation of certain cities and regions into depopulated, ghostly settings for war. She offers a trenchant critique of masculinity and gender constructions in Mexico, linking their misogynist force to the booming trade in violence. This book is essential reading for anyone seeking to analyze the new landscapes of war. It provides novel categories that allow us to deconstruct what is happening, while proposing vital epistemological tools developed in the convulsive Third World border space of Tijuana.
