Five Decades of Urbanization in Southeast Asia Lonely Planet Southeast Asia ranks among the most significant regions in the world for tracing the prehistory of human endeavor over a period in excess of two million years. It lies in the direct path of successive migrations from the African homeland that saw settlement by hominin populations such as *Homo erectus* and *Homo floresiensis*. The first Anatomically Modern Humans, following a coastal route, reached the region at least 60,000 years ago to establish a hunter-gatherer tradition that survives to this day in remote forests. From about 2000 BC, human settlement of Southeast Asia was deeply affected by successive innovations that took place to the north and west, such as rice and millet farming. A millennium later, knowledge of bronze casting penetrated along the same pathways. Copper mines were identified and exploited, and metals were exchanged over hundreds of kilometers. In the Mekong Delta and elsewhere, these developments led to early states of the region, which benefitted from an agricultural revolution involving permanent ploughed rice fields. These developments illuminate how the great early kingdoms of Angkor, Champa, and Funan came to be, a vital stage in understanding the roots of the present nation states of Southeast Asia. Assembling the most current research across a variety of disciplines—from anthropology and archaeology to history, art history, and linguistics—The Oxford Handbook of Early Southeast Asia will present an invaluable resource to experienced researchers and those approaching the topic for the first time.

For half a century (ever since the Japanese invasion of 1942), much of Southeast Asia has been racked by war. In the last 20

years alone, some three million people fled their homes in Vietnam, Laos and Cambodia. This book is their story. It is also the story of the international community's response. Spearheading this was the United Nations agency responsible, UNHCR. It pioneered innovations like the Orderly Departure Programme, anti-piracy and rescue-at-sea efforts, and later on, ambitious reintegration projects for returnees. Today the camps in Southeast Asia are closed. Half a million people have returned home. Over two million have started new lives in the United States, Canada, Australia and France. This compelling book is the history of this modern exodus. It also takes stock and poses important questions. How did the flight of refugees and international response evolve? How do we measure the achievements and the failures of that international effort? What has been the legacy in Asia itself? And what lessons can be drawn for use in other refugee situations around the world?

Provides an historical analysis of Southeast Asia from the perspective of regionalism. Part of a trilogy on Southeast Asia, this book begins by defining the meaning of 'region' and 'regionalism' and then applies it to periods in history in Southeast Asia, looking at how patterns of regionalism have shifted through time to the present day.

By now, planners everywhere know - more or less - what the ingredients of a sustainable city are, in theory. The problem is that only bits of solutions are being implemented in the cities that most need them, the majority of which are located in the Global South. This book examines issues related to policy transfer in urban transport planning in Southeast Asia. The metropolitan regions of four major capitals - Jakarta, Kuala Lumpur, Manila, and Bangkok - are considered. The book assesses the in-bound and out-bound transfer of sustainable transport planning policies, concepts, and tools. The investigation focuses on who transfers policy and why, what elements of policy are transferred, in what direction and to what degree, and what barriers does transfer face. It also discusses how policy transfer processes in the transportation planning arena can be improved.

To the Ends of the Earth Institute of Southeast Asian Studies

The Foreign Relations of the United States series presents the official documentary historical record of major foreign policy decisions and significant diplomatic activity of the United States Government. This volume is part of a subseries of the Foreign Relations of the United States that documents the most issues in the foreign policy of Presidents Richard M. Nixon and Gerald R. Ford. The subseries presents in multiple volumes a comprehensive documentary record of major foreign policy decisions and actions of the administrations of Presidents Nixon and Ford. This specific volume documents U.S. policy towards three important countries in Southeast Asia: Thailand, the Philippines, and Indonesia, 1969-1972, a period when the future of Southeast Asia was a major concern of American foreign policy makers. This is the last print volume to document U.S. policy towards Southeast Asia, other than those print volumes that document the Vietnam War during the Nixon-Ford administrations. For the January 1973 to January 1977 period, U.S. policy towards Southeast Asia (nations other than Vietnam, Laos, and Cambodia) is covered in an electronic-only volume. The decision to cover Thailand, the Philippines, and Indonesia for 1969-1975 in detail in this print volume was based on the fact that each country was a key ally - either formally or de facto - of the United States during the Vietnam war, and each played a specific role during the conflict. Thailand sent troops to fight in Vietnam, provided bases for U.S. airpower in Southeast Asia, and secretly provided training, troops, and arms to support U.S.-backed guerilla forces in Laos. The Philippines sent a 2,000-man civic action group to South Vietnam, and Filipinos made up many of the administrative contractors in South Vietnam. Indonesia provided key arms support to the Lon Nol government at a crucial time. In addition, Thailand, Philippines, and Indonesia were important countries in their own right, with key U.S. military and economic assistance programs, large embassies, and close relations with the United States. In each country, the United States had a considerable interest in their government's success. The chapter on Thailand, the largest in the volume, has the most obvious and closest associations with the Vietnam War. A

principal theme of this chapter is U.S. efforts to assure the Thais that unilateral withdrawal of U.S. troops in South Vietnam and a projected settlement of the war did not mean a lesser U.S. commitment to Thailand. A second key theme of the volume is the covert military role that Thailand's military forces played in supporting the anti-communist forces in Laos and the potential role they could play in supporting the Lon Nol government in Cambodia. The second largest chapter in this volume documents U.S. policy towards the Philippines. The relationship between President Ferdinand Marcos and the Nixon administration is the dominant theme of this chapter. U.S. officials had to assure Marcos that they were neutral in the 1969 Philippines presidential elections and discourage his desire for a special channel to Washington. Corruption in the Marcos government, Marcos's desire to revise the constitution to his benefit, and his eventual declaration of martial law in September 1972 in the face of student riots caused U.S. officials in Manila and Washington to assess whether he was the best man to lead the Philippines from the U.S. point of view. Other themes that are documented in the chapter are the ones that predate the Vietnam War, such as preference for Philippines exports to the United States, U.S. benefits for Filipino veterans who served in the Second World War, and U.S. bases in the Philippines. The final chapter in the volume deals with Indonesia, officially a non-aligned nation, but under strongman General Suharto, a de facto ally of the United States. The principal themes of this chapter are the question of Indonesia's international debt left over from the Sukarno years and U.S. support for multilateral Indonesian debt relief among international lending organizations. A related theme is the amount of U.S. bilateral aid provided to Indonesia.

The first volume in the Asia Society's Asian Agenda Series, this book addresses the unique partnership that Japan and the United States developed in the last generation and the subsequent emergence of Japan as a global economic and political power, which poses new demands on the partnership and challenges the relationship. Changes that have occurred in Asia during the 1970s require adjustments in the perceptions and policies of both nations. This report is designed to foster increased American understanding and U.S. Asian dialogue. Co-published with the Asia Society.

Lavishly illustrated, *Museums of Southeast Asia* is a guidebook to the collections, history and architecture of the region's museums. The book's detailed content, supplemented by easily accessible key facts, represents a "virtual tour" of each of the museums. It is an up-to-date, comprehensive and useful reference guide for visitors planning their trips to Southeast Asia and for armchair travelers seeking to broaden their knowledge of the region.

Southeast Asia Tomorrow David & Charles Publishers

This book is the first overall study of research-based art practices in Southeast Asia. Its objective is to examine the creative and mutual entanglement of academic and artistic research; in short, the Why, When, What and How of research-based art practices in the region. In Southeast Asia, artists are increasingly engaged in research-based art practices involving academic research processes. They work as historians, archivists, archaeologists or sociologists in order to produce knowledge and/or to challenge the current established systems of knowledge production. As artists, they can freely draw on academic research methodologies and, at the same time, question or divert them for their own artistic purpose. The outcome of their research findings is exhibited as an artwork and is not published or presented in an academic format. This book seeks to demonstrate the emancipatory dimension of these practices, which contribute to opening up our conceptions of knowledge and of art, bestowing a

new and promising role to the artists within the society.

Fiscal Year 1967 Supplemental Authorization for Southeast Asia (H.R. 4515) Lonely Planet

Straddling the equator, Southeast Asia comprises Myanmar, Thailand, Malaysia, Indonesia, Vietnam, Singapore, and the Philippines, as well as Laos, Cambodia, Brunei, and East Timor. Despite its extraordinary diversity of ethnicities, religions, and political systems, Southeast Asia plays a key role in global economies and geopolitics, especially in light of its strategic position bordering China and India. This Very Short Introduction explores the contemporary character of Southeast Asia's national societies through the lens of their historical evolution, from the eras of indigenous kingdoms and colonies under Western rule to the present's independent nation states. Deftly combining historical analysis and geopolitical insights, the book paints a bird's eye view of contemporary Southeast Asia as a community of diverse societies and traditions as well as a political theater-of-action nested between India and China and tangled in global economic traffic patterns, balance of powers, and environmental forces. As James R. Rush explains, archaic structures, such as religious and ethnic rivalries, tenacious feudal hierarchies, and age-old trade and migration patterns, remain rooted in today's Southeast Asia beneath the surface of modern national governments. The book draws on a wide range of examples from the major nations, including the ethno-religious violence in Myanmar, the Muslim-led rebellion in the southern Philippines, the Thai-Cambodian territorial rivalries, the Confucian-inspired governance in Singapore, the military rule and democratization in Indonesia, the environmental consequences of agribusiness, mining, and unchecked urbanization, and the big-power alignments and tensions involving the United States, China, and Japan. By delving into the cultural, political, and geographical background of Southeast Asia, Rush shows that Southeast Asia is unquestionably modern, but it is modern in distinctively Southeast Asian ways.
