In "Heart of the Tiger" the Kilrathi empire was eradicated through the bravery of a few flying aces. Now, Captain Blair and his wing are fighting a more familiar menace—their fellow humans. Blair had settled down to the quiet life of a farmer, but he's been called back into action to fight rebels from the Border Worlds. And Captain Blair finds that dog-fighting with people is a whole different kettle of kittens than fighting an alien cat species. Those humans are tricky in ways the Kilrathi never dreamed of! Since antiquity, Roman architecture and planning have inspired architects and designers. In this volume, Diane Favro and Fikret Yegül offer a comprehensive history and analysis of the Roman built environment, emphasizing design and planning aspects of buildings and streetscapes. They explore the dynamic evolution and dissemination of architectural ideas, showing how local influences and technologies were incorporated across the vast Roman territory. They also consider how Roman construction and engineering expertise, as well as logistical proficiency, contributed to the making of bold and exceptional spaces and forms. Based on decades of first-hand examinations of ancient sites throughout the Roman world, from Britain to Syria, the authors give close accounts of many sites no longer extant or accessible. Written in a lively and accessible manner, Roman Architecture and Urbanism affirms the enduring attractions of Roman buildings and environments and their relevance to a global view of architecture. It will appeal to readers interested in the classical world and the history of architecture and urban design, as well as wide range of academic fields. With 835 illustrations including numerous new plans and drawings as well as digital renderings.

When Hitchcock's Films was first published, it quickly became known as a new kind of book on film and as a necessary text in the growing body of Hitchcock criticism. This revised edition of

Hitchcock's Films Revisited includes a substantial new preface in which Wood reveals his personal history as a critic—including his coming out as a gay man, his views on his previous critical work, and how his writings, his love of film, and his personal life and have remained deeply intertwined through the years. This revised edition also includes a new chapter on Marnie.

When the enemy adopts a policy to attack convoys, truck drivers become front line troops. Convoy commanders must then become tacticians. How to study war? The student of tactics studies previous fights and mentally places himself in the position of the participants. Knowing what they knew, how would he have reacted? In hind sight, what was the best course of action, remembering that there is no one perfect solution? Any number of actions would have succeeded. The tactician must learn what would have worked best for him. For this reason, I have pulled together all the examples of convoy ambushes. The 20th century, Vietnam War, and current war in Iraq provide a wealth of examples of convoy ambushes from which to study. Unfortunately, the US Army did not record many good accounts of ambushes during the Vietnam War. Much of what is presented in this text is based upon oral interviews of the participants, sometimes backed by official record, citations or reports. For this reason, some of the ambush case studies present only the perspective of a crew member of a gun truck or the convoy commander. Since this academic study works best when one mentally takes the place of one of the participants, this view of the ambush serves a useful purpose. After my own review of the ambushes, I have drawn my own conclusion as to what principles apply to convoy ambushes.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

It was midsummer when we first found the body. Martin was twelve then, I was nine, and the man we discovered could have been no older than the combined total of our years. He wore a green uniform and there was a thin scar down one side of his face. He reminded me of my brother. Who is the bible salesman that arrives to the accompaniment of thunderstorms? Why do mysterious figures haunt the ruins on the outskirts of the city? What is the meaning of the prophecy given by the woman in the lunatic asylum? Updating the form of the gothic novel, *Blowing Hot and Cold* tells the story of Martin, a child growing up through a long and futile war. Told from the viewpoint of five different narrators, both the story of his life and the society he lives in is gradually pieced together. In the process a picture emerges of a world in which dreams, madness and delusion are the only possible responses to the events that are unfolding.

"*You Can't Be Too Careful*" is a novel written by H. G. Wells and first published in 1914. Herbert George Wells (1866 - 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as "The Time Machine" (1895), "The Invisible Man" (1897), and "The War of the Worlds" (1898). "The Father of Science Fiction" was also a staunch socialist, and his later works are increasingly political and didactic. Although never a winner, Wells was nominated for the Nobel Prize in Literature a total of four times within his lifetime.

The Political Unconscious Paw Prints

Fredric Jameson, in *The Political Unconscious*, opposes the view that literary creation can take place in isolation from its political context. He asserts the priority of the political interpretation of literary texts, claiming it to be at the center of all reading and understanding, not just a supplement or auxiliary to other methods current today. Jameson supports his thesis by looking closely at the nature of interpretation. Our understanding, he says, is colored by the concepts and categories that we inherit from our culture's interpretive tradition and that we use to comprehend what we read. How then can the literature of other ages be understood by readers from a present that is culturally so different from the past? Marxism lies at the foundation of Jameson's answer, because it conceives of history as a single collective narrative that links past and present; Marxist literary criticism reveals the unity of that uninterrupted narrative. Jameson applies his interpretive theory to nineteenth- and twentieth-century texts, including the works of Balzac, Gissing, and Conrad. Throughout, he considers other interpretive approaches to the works he discusses, assessing the importance and limitations of methods as different as Lacanian psychoanalysis, semiotics, dialectical analysis, and allegorical readings. The book as a whole raises directly issues that have been only implicit in Jameson's earlier work, namely the relationship between dialectics and structuralism, and the tension between the German and the French aesthetic traditions.
