!-1724Q-6, 0-13-117244-1, Martorella, Peter H., *Teaching Social Studies in Middle and Secondary Schools, 4/E* This readable, accessible book offers prospective teachers a comprehensive introduction to teaching social studies to middle and secondary school students. With the purpose of social studies being the development of reflective, competent, concerned citizens, the book first examines the origins and evolution of social studies and citizenship education across the United States. Following this, targeted chapters address the art, science, and craft of social studies teaching as a means for engaging learners in knowledge construction. In the final section, the authors look at ways to improve social studies instruction through the incorporation of emerging technology into the social studies curriculum. For middle and secondary school social studies teachers.

Designed for preservice teachers, this text consolidates social studies content into a framework for practical instruction and lesson planning. It places social studies in a thoroughly modern context and explores how such factors as language diversity and standards at the local, state, and national level affect teachers. The text retains its hallmark features, such as model unit lessons, teacher-tested activities, technology updates, and authentic children's work, and the Resource Handbook serves as a valuable tool for on-the-job use. The emphasis on current topics includes coverage of constructivist learning, cooperative learning, service learning, character education, and the teaching of children with limited English proficiency. Specific examples from the NCSS help students connect standards to the model lessons and activities presented in the text.

Social Studies for Secondary Schools: Teaching to Learn, Learning to Teach, Second Edition

integrates discussions of educational goals and the nature of history and social studies with practical ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme woven throughout the text is that what we choose to teach and the way we teach reflect our broader understanding of society, history, and the purposes of social studies education. Each chapter opens with a broad question about social studies education; provides many examples of lessons, including lesson ideas developed by new and experienced middle school and high school social studies teachers; features a rich variety of teaching, learning, and classroom activities designed to provoke discussion and illustrate different approaches to teaching social studies; and concludes with essays about related social studies topics. Part I focuses on philosophical issues, social studies goals and standards, and the design of social studies curricula. Part II examines and offers examples of strategies for planning units and lessons. Part III explores topics, such as thematic and interdisciplinary teaching, a project approach to social studies, as well as assesses student learning and one's own performance as a teacher, and provides a guide to social studies resource materials and organizations. New in the Second Edition: *Every chapter has been updated and includes a number of new lesson ideas. *The lesson ideas are designed especially to help beginning teachers address learning standards; work in inclusive settings; and promote literacy and the use of technology in social studies classrooms. *Sample activities developed with members of the Hofstra New Teachers Network reflect the current focus on document-based instruction and assessment, and can serve as tools for assessing student learning. *Increased attention is given to project-based social studies instruction and to multicultural education. Intended as a text for undergraduate and graduate preservice social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

Part of being a child is wondering. This charming book uses easy words and color illustrations to explain to children exactly where they live. Crenshaw starts with a child's room, in his or her home, neighborhood, town, state, and county-then moves out to the planet Earth, the solar system, and the Milky Way. From there, children trace their way home again.

Social Studies for the Preschool-primary Child Routledge

Building on the success of the previous editions, *Essentials of Middle and Secondary Social Studies Third Edition* focuses on the key issues central to the teaching of middle and high school social studies, including lesson planning and instructional strategies. Written in an engaging, conversational style, the text encourages teachers in their development as professionals and enables them to effectively use creative and active learning strategies in the everyday classroom. New to This Edition This third edition has been refined with new and relevant topics and strategies needed for effectively teaching middle and high school social studies. New features include: An expanded chapter on the decision-making process in secondary social studies. This chapter provides additional discussion about the importance of helping middle and high school learners better understand the decision-making process and offers strategies for helping teachers make connections between choices, values, character development, and social justice. An updated chapter on technology designed to better prepare secondary social studies teachers to effectively incorporate technology into their instruction. Focus is given to virtual teaching and learning, media literacy, teaching with film, and numerous other ways to improve teaching and learning in the digital age. Updated further readings and helpful resources for all chapters to include supplemental digital and video sources related to various topics throughout the chapter. These resources were specifically curated to be impactful for preservice and in-service teachers, as well as anyone teaching secondary social studies methods courses. Added a "Checking for Understanding" section of questions at the end of each chapter that focuses on comprehension, application, and reflection

on key concepts throughout the chapters. An expanded discussion of the Common Core Standards and C3 Framework and how it impacts teachers. An updated chapter titled "Experiencing Social Studies". This chapter focus on topics such as teaching with drama, role play, field trips, and service learning. Each chapter includes a "Helpful Resources" section that details various websites and online resources for further discovery.

Offers a fresh overview of teaching with film to effectively enhance social studies instruction. *Social Studies in the New Education Policy Era* Routledge

No plan to increase achievement and enact reform in the social studies classroom will succeed without recognizing the central importance of the teacher as the "gatekeeper" of instruction. In this book, Thornton details why teachers must develop strong skills in curriculum planning and teaching methods in order for effective instruction to occur. Thornton helps teachers to develop a vision of their practice that will build strong social studies programs and inspire students to learn. Features: An approach to preparing purposeful teachers, acknowledging that teachers make daily decisions concerning what to teach and how to teach it. Replicable examples of the kinds of reflective practice that will enable teachers to animate classroom instruction and create a dynamic social studies curriculum. An analysis of how teachers adapt and shape state and district level curricula and classroom materials to fit the specific needs of their students—a model of how to develop an instructional program with suggestions for lesson planning. In-depth examinations of alternative ways of educating teachers in subject matter and teaching methods. "In this important book, Steve Thornton brings a Deweyan perspective to current problems in social studies education. He does more, however, because his analysis can be extended profitably to every subject in the curriculum." —From the Foreword by Nel Noddings "A thoughtful and carefully documented analysis. . . . Let us hope that this book encourages a richer dialogue than the now-tedious and generally unproductive separate disciplines v. integrated social studies debate." —Linda S. Levstik, University of Kentucky, Lexington "A refreshingly clearheaded, historically grounded, altogether enlightening analysis. This is the book I've been waiting for." —Walter Parker, University of Washington

Education in the 80's--social Studies Routledge

Social Studies in the New Education Policy Era is a series of compelling open-ended education policy dialogues among various social studies scholars and stakeholders. By facilitating conversations about the relationships among policy, practice, and research in social studies education, this collection illuminates various positions—some similar, some divergent—on contested issues in the field, from the effects of standardized curriculum and assessment mandates on K-12 teaching to the appropriate roles of social studies educators as public policy advocates. Chapter authors bring diverse professional experiences to the questions at hand, offering readers multiple perspectives from which to delve into well-informed discussions about social studies education in past, present, and future policy contexts. Collectively, their commentaries aim to inspire, challenge, and ultimately strengthen readers' beliefs about the place of social studies in present and future education policy environments.

Essentials of Elementary Social Studies Eye On Education

This sourcebook contains more than twelve hundred easy-to-follow and implement classroom activities created and tested by veteran teachers from all over the country. The activities are arranged by grade level and are keyed to the revised National History Standards, so they can easily be matched to comparable state history standards. This volume offers teachers a treasury of ideas for bringing history alive in grades 5-12, carrying students far beyond their textbooks on active-learning voyages into the past while still meeting required learning content. It also incorporates the History Thinking Skills from the revised National History Standards as well as annotated lists of general and era-specific resources that will help teachers enrich their classes with CD-ROMs, audio-visual material, primary sources, art and music, and various print materials. Grades 5-12

Teaching Social Studies in Middle and Secondary Schools Rowman & Littlefield

The author wrote this new edition of the most popular elementary social studies methods text on the market with the following three goals in mind: to present the most powerful social studies content and pedagogy for children in elementary school, to offer the material in simple and accessible ways, and to write in a first person active voice. The purpose of this book is to introduce new teachers to the world of social studies teaching and learning in elementary and middle schools. Geography, history, government and the other social sciences are delivered into the palm of the new teacher's hand along with a suite of tools for bringing social studies to life in the classroom. The book is organized into three sections—the first orients the reader to the mission of social studies education to the increasingly diverse children we teach, the second concentrates on the curriculum, and the third deals with instruction, how we plan and teach this curriculum. Three central themes continue to pervade the book—democratic citizenship, diversity, and the social sciences—to ultimately encourage teachers to excite their students about closing the gap between social realities and democratic ideals. An exceptionally strong chapter on multicultural issues (Chapter 2) helps future teachers truly understand the changing demographics of the American classroom.

The Student-centered Classroom Handbook: Secondary social studies Educators for Social responsibility

The preparation of social studies teachers is crucial not only to the project of good education, but, even more broadly, to the cultivation of a healthy democracy and the growth of a nation's citizens. This one-of-a-kind resource features ideas from over 100 of the field's most thoughtful teacher educators reflecting on their best practices and offering specific strategies through which future teachers can learn to teach, thus illuminating the careful planning and deep thinking that go into the preparation of the social studies teachers. While concentrating on daily teaching realities such as lesson planning and meeting national, state, or provincial standards, each contributor also wrestles with the most important current issues on educating teachers for today's increasingly diverse, complex, and global society. Features of this unique teaching resource include: Volume sections that are arranged by both disciplinary organization and approach or activity. Thoughtful introductory section essays that conceptualize each theme, providing a conscientious theoretical overview and analysis of each individual section. Rich and concrete examples of best practice from some of the field's most diverse and highly regarded scholars and teacher educators An index that identifies the appropriate teaching level and teacher education context and links the strategies and ideas that are presented in the essay to the relevant INTASC and NCSS standards for quick reference in classroom planning as well as institutional development and implementation. A much-needed addition to the field, this comprehensive volume will be of value to any teacher interested in social studies or diversity education across age groups and educational contexts.

Social Studies for Secondary Schools Longman Publishing Group

This Handbook outlines the current state of research in social studies education – a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory,

research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.

National Standards for History Routledge

EDUCATION/ SOCIAL STUDIES "... a much-needed addition to elementary social studies that will move the field ahead." Keith C. Barton, University of Cincinnati "This text fills a valuable niche and should quickly become a leading reference for teachers and teacher educators." Linda S. Levstik, University of Kentucky This book, resulting from a collaboration among an educational psychologist, a social studies educator, and a primary teacher, describes in rich detail and illustrates with excerpts from recorded lessons how primary teachers can engage their students in social studies lessons and activities that are structured around powerful ideas and have applications to their lives outside of school. The teaching portrayed connects concepts and skills emphasized in national and state standards, taught in ways that build on students' prior experiences in their local communities and connect with their family backgrounds and home cultures. The analyses include rich descriptions of the teacher-student interactions that occur during lessons, detailed information about how and why the teacher adapted lesson plans to meet her students' background experiences and adjusted these plans to take advantage of teachable moments that emerged during lessons, and what all of this might imply concerning principles of practice. The principles are widely applicable in elementary schools across the country, as well as across the curriculum (not just in social studies) and across the elementary grades (not just the primary grades).

New Frontiers in the Social Studies: Goals for students, means for teachers Allyn & Bacon Social Studies for the Twenty-First Century, Third Edition weaves theory, curriculum, methods, and assessment into a comprehensive model to guide middle and secondary teachers in setting objectives; planning lessons, units, and courses; choosing classroom strategies; and constructing tests for some of the field's most popular and enduring programs. It offers practical, interesting, exciting ways to teach social studies and a multitude of instructional and professional resources for teachers. The text includes separate chapters on teaching each of the major areas of the social studies curriculum. Its reflective and integrative framework emphasizes building imagination, insight, and critical thinking into everyday classrooms; encourages problem-solving attitudes and behavior; and provokes analysis, reflection, and debate. Throughout the text, all aspects of curriculum and instruction are viewed from a tripartite perspective that divides social studies instruction into didactic (factual), reflective (analytical), and affective (judgmental) components. These three components are seen as supporting one another, building the groundwork for taking stands on issues, past and present. At the center is the author's belief that the heart and soul of social studies instruction, perhaps all teaching, lies in stimulating the production of ideas; looking at knowledge from others' viewpoints; and formulating for oneself a set of goals, values, and beliefs that can be explained and justified in open discussion. New in the Third Edition: * Summaries of recent research, particularly in history education, that have been published since the last edition; * Increased attention to social studies standards, as well as those for civics, economics, and history; * An enriched view of teaching history and social studies with a wide array of sources ranging from material objects through primary sources on to art, music, and literature; * Tightening of the text to make it shorter and more pointed, including a few provocative new ideas; * More and better-organized ideas for classroom group and individual activities and cooperative learning;* Expanded appendices on instructional resources include the rapidly growing use of websites; * New visuals that are better integrated into the text and which teachers can use in their classrooms as lessons in visual literacy; and * Continued efforts to inject a bit of humor and self-criticism into a field of education most students view as a sizeable trunk of dead and deadly facts. Social Studies for the Twenty-First Century, Third Edition is a primary text for secondary and middle social studies

methods courses.
