 "[A] masterful volume that will do much to advance understanding of mental health as an essential public health challenge." -Journal of Sociology & Social Welfare  
**THE GROUNDBREAKING TEXTBOOK IN POPULATION-LEVEL MENTAL HEALTH, NOW FULLY REVISED AND UPDATED**  
 Public Mental Health equips a new generation of public health students, researchers and practitioners with the most innovative social, biological, and behavioral science approaches to mental health challenges at the population level. Incorporating insights from multiple health and science disciplines, this new edition introduces novel concepts and methodologies for understanding the occurrence of mental disorders in populations worldwide. Reflecting the disciplinary diversity and expertise of an internationally-recognized roster of contributors, its nineteen chapters include coverage of such essential topics as: · estimates of global prevalence based on new data from the Global Burden

of Disease Study · the complex way in which genes, other biological factors, and life stresses increase risk · mental health disparities among population subgroups · population-level mental health consequences of violence and natural disasters · the logic and practice of prevention of mental and behavioral disorders  
 With a perspective that will resonate from the lab to the legislature floor, Public Mental Health offers a much-needed core text for students, researchers, and practitioners.

 Sexually transmitted diseases (STDs) are a worldwide problem affecting all nations and races. Such diseases are especially prevalent in developing countries where insufficient health care centers, inadequate laboratory capabilities, and the unavailability of appropriate treatment perpetuate the problem. Sexually Transmitted Diseases: Epidemiology, Pathology, Diagnosis, and Treatment addresses the therapeutic challenges posed by STDs. It covers bacterial, spirochete, fungal, protozoan, viral, and ectoparasite infections. Strategies and progress in eliminating these diseases worldwide are discussed.

Gujarat Files is the account of an eight-month long undercover investigation by journalist Rana Ayyub into the Gujarat riots, fake encounters and the murder of state Home Minister Haren Pandya that brings to the fore startling revelations. Posing as Maithili Tyagi, a filmmaker from the American Film Institute Conservatory, Rana met bureaucrats and top cops in Gujarat who held pivotal positions in the state between 2001 and 2010. The transcripts of the sting operation reveal the complicity of the state and its officials in crimes against humanity. With sensational disclosures about cases that run parallel to Narendra Modi and Amit Shah's ascent to power and their journey from Gujarat to New Delhi, the book tells you the hushed truth of the state in the words of those who developed amnesia while speaking before commissions of enquiry, but held nothing back in the secretly taped videos which form the basis of this remarkable read.

NATIONAL BOOK CRITICS CIRCLE AWARD WINNER • NATIONAL BESTSELLER • The definitive account of America's conflict with Islamic fundamentalism and a searing exploration of its human costs—an instant classic of war reporting from the Pulitzer Prize winning journalist. Through the eyes of Dexter Filkins, a foreign correspondent for the New York Times, we witness the rise of the Taliban in the 1990s, the aftermath of the attack on New York on September 11th, and the American wars in Afghanistan and Iraq. Filkins is the only American journalist to have reported on all these events, and his experiences are conveyed in a riveting narrative filled with unforgettable characters and astonishing scenes. Brilliant and fearless, *The Forever War* is not just about America's wars after 9/11, but about the nature of war itself.

Optimizing outcomes for women in labor at the global level requires evidence-based guidance of health workers to improve

care through appropriate patient selection and use of effective interventions. In this regard, the World Health Organization (WHO) published recommendations for induction of labor in 2011. The goal of the present guideline is to consolidate the guidance for effective interventions that are needed to reduce the global burden of prolonged labor and its consequences. The primary target audience includes health professionals responsible for developing national and local health protocols and policies, as well as obstetricians, midwives, nurses, general medical practitioners, managers of maternal and child health programs, and public health policy-makers in all settings.

"A Princess of Mars is a science fantasy novel by American writer Edgar Rice Burroughs, the first of his Barsoom series. It was first serialized in the pulp magazine *All-Story Magazine* from February-July, 1912. Full of swordplay and daring feats, the novel is considered a classic example of 20th-century pulp fiction. It is also a seminal instance of the planetary romance, a subgenre of science fantasy that became highly popular in the decades following its publication. Its early chapters also contain elements of the Western. The story is set on Mars, imagined as a dying planet with a harsh desert environment. This vision of Mars was based on the work of the astronomer Percival Lowell, whose ideas were widely popularized in the late 19th and early 20th centuries. The Barsoom series inspired a number of well-known 20th-century science fiction writers, including Jack Vance, Ray Bradbury, Arthur C. Clarke, Robert A. Heinlein, and John Norman. The series was also inspirational for many scientists in the fields of space exploration and the search for extraterrestrial life, including Carl Sagan, who read *A Princess of Mars* when he was a child."

This comprehensive reference work, updated from the first edition, brings together the knowledge and expertise of contributors from around the world. It includes new topics such as prostaglandin synthetase enzyme, new synthetic eicosanoids, innovative analytical methods, the influence of cytokines in the regulation of synthesis and actions, newer eicosanoids that influence the cardiovascular system, and newly discovered roles in reproduction and interactions with nitric oxide. This book satisfies a surge of interest in prostaglandins—NSAIDs (e.g. aspirin) are the biggest selling drugs of all time, and the field has been refreshed by the advent of new types (selective COX-2 inhibitors, anti-leukotiene drugs).
