Beginner Chess Tactics for Kids Attacking Chess  
 Life is too short to play boring chess! That's the mantra of the two young authors of this book, and as you read their energetic and insightful words, you may find yourself caught up in their enthusiasm for direct attacking play. Their over-the-board successes are not based on mere bravado or trickery, but on a profound understanding of the chessboard struggle and thought process. Song and Preotu consider the role of manoeuvring and prophylactic thought, and examine attacks in the endgame, as well as more standard topics such as play on colour complexes and when and how to launch the pawns in an all-out assault. And because life's too short to read a boring chess book, the text is packed with advice, study suggestions and anecdotes as well as quotes and references to philosophy and other 'real-world' topics. Their examples are drawn from their own practice and their supergrandmaster trainer, as well as modern classics and older gems. Most of their material you will not have seen before; the rest you will not have seen explained this way before. The authors are the two highest-rated Canadian juniors. Razvan Preotu earned the Grandmaster title in 2016 at the age of 17. The most notable result during his meteoric rise was at the 2016 Calgary International, which he won outright ahead of a strong international field including five GMs. Michael Song became an International Master by winning the North American Under-18 Championship. He has represented Canada many times, winning a bronze medal at the 2011 World Youth Championship. His coach is super-grandmaster Evgeny Bareev.

All chess-players love to play a smooth attacking game, flowing from start to finish, and sprinkled with spectacular ideas and sacrifices. However, few can do so regularly, and for most players, their collection of brilliancies missed far outweighs their creative successes. Innate talent plays an important role, but many of the skills needed for attacking chess can be learnt by study and practice. Here, one of the world's most experienced annotators has selected 33 superb examples, and explained them in a way that strips away the mystery. We see how the decision to attack is made, and which positional factors led to that decision being justified. We observe either a gradual build-up, or a lightning-fast storm, and understand why one approach or the other was necessary. Finally, we witness the final execution of the tactical blows. To check that we have truly grasped the ideas, Franco presents us with plentiful exercises, where it is we who have to perform the heroics.

If you want to improve in chess you usually have to settle for instructional material based on games played long ago by old masters with who you have no affinity at all. Or contrived puzzles that have little in common with the reality of your own games. Italian FIDE Master and chess instructor Franco Zaninotto has a different approach. He knows from experience how stimulating it is to study the games of the best players in your peer group. Zaninotto teaches elementary strategy and tactics by using games he has selected from recent Junior Championships all over the world. He shows that you don't need to have decades of experience in order to play clever moves. Super Chess Kids tells you all you need to know about recognizing and exploiting

weaknesses in your opponent's position, about evaluating your position and developing a plan, and about calculating moves of attack and defence. You will also see typical errors that even the best young players tend to make. Included are more than 100 strategic and tactical exercises. There is little excuse for not finding the winning moves: after all, other kids already did!

From honey experts C. Marina Marchese and Kim Flottum comes this comprehensive introduction to the origin, flavor, and culinary uses of more than 30 varieties of honey, from ubiquitous clover to tangy star thistle to rich, smoky buckwheat. Like wine, cheese, coffee, and chocolate, honey has emerged as an artisanal obsession. Its popularity at farmers' markets and specialty food stores has soared as retailers are capitalizing on the trend. The Honey Connoisseur teaches consumers everything they need to know about how to taste, select, and use a diverse selection of honey. After a brief explanation of how bees produce honey, the

authors introduce the concept of terroir, the notion that soil, weather, and other natural phenomena can affect the taste of honey. As with wines, knowing the terroir of a honey varietal helps to inform an understanding of its flavor. The book goes on to give a thorough course in the origins of more than 30 different honeys as well as step-by-step instructions, how to taste honey, describe its flavor and determine what other flavors pair best with a particular honey. Also included are simple recipes such as dressings, marinades, quick-and-easy desserts, and beverages. Beautifully illustrated and designed, *The Honey Connoisseur* is the perfect book for foodies and locavores alike. Praise for *The Honey Connoisseur*: "Of all the near-perfect food we generally take for granted, honey suffers more than most (except for cheese). *The Honey Connoisseur* lays it all out on the table; Marina Marchese and Kim Flottum tell the whole story including its dark side in an eloquent style. The reader will never look at the honey jar the same way." -- Max McCalman, author of *Mastering Cheese*, *Cheese: Connoisseur's Guide to the World's Best*, and *The Cheese Plate* "Eureka! This is the book I've been looking for. As a restaurateur who has traveled high and low in search of the world's finest wines, I have always respected the role terroir plays in creating and nurturing a region's culinary personality. Ever since I took up beekeeping, I've been on the hunt for the definitive guide to the essence of honey: how to taste it, which local factors influence its flavor, and most importantly for me, how to pair it with other ingredients like an expert." ?Julian Niccolini, Owner of The Four Seasons Restaurant, New York City "With the authors' depth of knowledge, I cannot think of a better resource on honey. This book makes me want to bake with all the varieties. Finally, a honey bible! *The Honey Connoisseur* is truly a great book." ?John Barricelli, author of *The Seasonal Baker* and *The Sono Baking Company Cookbook* "Marina Marchese and Kim Flottum's knowledge of this fascinating and increasingly popular subject is unparalleled. Together, they have composed the preeminent book about honey and its regional culinary food pairings." ?Nicholas Coleman, Chief Olive Oil Specialist, Eataly NYC

This is a book for those who have started to play chess and want to know how to win from good positions and survive bad ones. The endgame is where most games are decided, and knowing all the tricks will dramatically improve your results. Endgame specialist John Nunn has drawn upon his decades of experience to present the ideas that are most important in real games. Step by step he helps you uncover the key points and then add further vital knowledge. *Chess Endgame Workbook for Kids* is the third in a new series of books that help players gain chess skills by solving hundreds of carefully chosen exercises. The themes are similar to those in Gambit's best-selling 'Chess for Kids' series, but the focus is on getting hands-on experience. Many positions build on ones given earlier, showing how advanced ideas are normally made up of simpler ones that we can all grasp. Each chapter deals with a particular type of endgame and features dozens of exercises, with solutions that highlight the key points. For each endgame we are given tips on the themes that are most important and the strategies for both sides. The book ends with a series of test papers that enable you to assess your progress and identify the areas that need further work. Dr John Nunn is one of the best-respected figures in world chess. He was among the world's leading grandmasters for nearly twenty years and won four gold medals in chess Olympiads. In 2004, 2007 and 2010, Nunn was crowned World Chess Solving Champion, ahead of many former champions.

Chess becomes fun when we learn how to survive the opening

and stop falling into our opponents' cheap tactical tricks. And that's what this book is about! By understanding opening play and how to exploit tactical ideas, we turn the tables on our opponents. Now they will be the ones getting outmanoeuvred, tricked, trapped and pushed off the board! Chess Opening Traps for Kids is a serious course on how to play the opening, illustrated with memorable and entertaining examples. By focusing on 100 key themes, Graham Burgess explains how to use opening tricks to our advantage. Every opening features hidden dangers for both players, so we need to avoid pitfalls while making full use of tactics to achieve the opening goals of purposeful development and central control. Most of the 100 sections feature a basic example followed by a more complex one. Some of the traps have claimed grandmaster victims, while others are more likely to arise in junior chess. Either way, the aim is to learn the theme so well that you can use it when similar opportunities arise in your own games. A series of exercises at the end of the book allows you to check that you have grasped the main points. Throughout the book there are tips on how to spot tactics in advance and advice on opening strategy. Award-winning author Graham Burgess has written 25 chess books, ranging from general guides to works on specific openings. He is a FIDE Master and a former champion of the Danish region of Funen. In 1994 he set a world record for marathon blitz chess playing and in 1997 won the British Chess Federation Book of the Year Award. Nowadays he lives in Minnesota.

Pre-budget Report 2008 Gambit Publications

The Treasury Committee's report on the Pre-Budget Report 2008 (Cm. 7484, ISBN 9780101748421) considers that the balance of risks to the Treasury's forecast, for a swift recovery in economic growth for 2010 after a significant decline in output in 2009, is on the downside. The report highlights the lack of bank lending as the single most critical problem for the economy in the near term. The overall effect of the fiscal stimulus remains uncertain, the cost of the reduction in VAT is considerable and, in the view of the majority of commentators, the Treasury's analysis of its impact is an optimistic one. The report notes that the risk of a self-reinforcing deflationary cycle exists in the UK economy at present and recommends that the Treasury prepare and publish the actions it may consider taking should a period of "quantitative easing" be needed. While the need for lower interest rates to maintain economic growth is crucial at the present time, the needs of savers must not be forgotten and the Treasury should consider measures that will also support savers at this difficult time. The report notes with concern that the Pre-Budget Report contains no policy measures which will significantly advance meeting the 2010 child poverty target.

Attacking the Chess King Workbook Grandmaster Preparation

This is a book for those who know the rules of chess and are keen to start winning games. The quickest way to improve your chess

is to learn tactics. But not just knowing the themes - you need to get used to using them in real positions. Master tactician John Nunn has thoughtfully crafted a course that gives you the basic nuggets of knowledge and immediately invites you to start finding tactical ideas for yourself. Chess Tactics Workbook for Kids is the first in a new series of books that help players gain chess skills by tackling hundreds of carefully chosen exercises. The themes are similar to those in Gambit's best-selling 'Chess for Kids' series, but the focus is on getting vital hands-on experience. Many positions build on ones given earlier, showing how advanced ideas are normally made up of simpler ones that we can all grasp. Each chapter introduces a basic theme and features dozens of exercises, with solutions that highlight the key points. In each chapter there are tips on what to look out for to help spot tactical ideas. As the chapters progress, we increasingly see how tactical ideas are combined together, with ideas from previous sections repeatedly appearing as part of a deadly one-two punch. The book ends with a series of six test papers where you are given no clues about the themes involved. Dr John Nunn is one of the best-respected figures in world chess. He was among the world's leading grandmasters for nearly twenty years and won four gold medals in chess Olympiads. In 2004, 2007 and 2010, Nunn was crowned World Chess Solving Champion, ahead of many former champions.

You've just read a chess beginners' manual and learned the rules of the game, some simple tactics, maybe a few opening moves. What's next for the ambitious player? Everyone's Second Chess Book, of course! Acclaimed chess teacher Dan Heisman equips the not-quite-novice with the practical tools and knowledge needed to get started in competitive play: how to develop board vision; what to do when you're way ahead in material; how to avoid common mistakes in thinking; when to "believe" your opponent; even how to act properly at the chessboard. The author uses examples from inexperienced players to provide a wealth of common-sense advice, topping it off with a collection of illustrative games and practice puzzles. In this new and enhanced edition of a classic work, National Master Heisman adds chapters identifying the most important areas for the novice to focus on to advance to intermediate level; then exploring the dangers of stopping too soon when analyzing a position; and highlighting the value of making chess study fun so that the student will feel motivated to do the work. Read Everyone's Second Chess Book and start climbing up the ladder of chess success!
