The Cosmotheandric Experience is not a Christian, or an Indic, or a Buddhist study, but an interdisciplinary study with a firm foundation. It aims at an integration of the whole of reality: We have to reconstruct the body of Prajapati, even if some of the parts feel unworthy, are shy or run away ... We have to think of all of the fragments of the present world in order to bring them together into a harmonious--though not monolithic--whole. The Cosmotheandric principle, which the author advocates, could be formulated by saying that the divine, the human and the earthly are three irreducible dimensions which constitute the real.

"Transit, transitional, transition: Dalia Judovitz catches Marcel Duchamp on the run with his art in a suitcase and his thought all boxed and ready to go. . . . She demonstrates how the theme of transition, reappearing from work to work, makes each piece reproduce some other piece, while all continue to exemplify an original which can no longer be found and which has no creator."—Jean-François Lyotard

This book traces some of the colonial, postcolonial, and postmodern complexities of psychoanalytical thought as it has been variously applied to Hinduism. From Girindrasekhar Bose's pioneering reflections on the Indian Oedipal wish and the colonial positioning of early psychoanalytic practice in India, to postcolonial cultural criticism and contemporary clinical case studies, the collection spans close to a century of creative, sometimes radical, and always controversial thought about the psychological and theoretical riches of Hinduism.

"Of all Lepage's magic boxes, this is the masterpiece" (Independent on Sunday) Early one August morning in 1945, several kilos of uranium dropped over Japan changed the course of human history. Fifty years later, Hiroshima's vitality is striking: the city where survival itself seemed unimaginable today incarnates the notion of renaissance. Robert Lepage and Ex Machina's *The Seven Streams of the River Ota* makes Hiroshima a literal and metaphoric site for theatrical journey through the last half-century. In *The Seven Streams*, Hiroshima is a mirror in which seeming opposites - East and West, tragedy and comedy, male and female, life and death - are revealed as reflections of the same reality.

Between 1912 and 1918, Marcel Duchamp made hundreds of notes in preparation for the execution of his major work, *The Bride Stripped Bare by Her Bachelors, Even* (1915-23), also known as the *Large Glass*. Considering these notes to be as important as the *Glass* itself, Duchamp published three sets during his lifetime - 178 notes in all. Kundalini's power lies dormant in humans until it is awakened. The awakened Kundalini expresses the primal divine impulse and ultimately joins the individual with the divine. The development of the book parallels the development of the Kundalini within. Part One exposes the awakening and unfolding of the Kundalini; Part Two describes the piercing of the energy centers and the stages of ascent through the body; and Part Three examines Kundalini's relation to sexual expression. The book provides a deep understanding of Tantra and of the underlying purpose of Tantracism. The author carefully considers the Caryakrama practices of sexual expression as a means of awakening and controlling Kundalini. Silburn draws together passages from the Trika, Krama, and Kaula systems ranging through Abhinavagupta and Lalla and provides both translation and commentary for them. Chapters on the Chakras, the Nadis, and on mantras further elucidate the topic and lead to a forceful conclusion: Kundalini is the source of ultimate human knowledge and power.

In "Thinking with Whitehead," Isabelle Stengers one of today's leading philosophers of science goes straight to the beating heart of Whitehead's thought. Both an erudite yet accessible introduction and a highly advanced commentary, it establishes the mathematician-philosopher as a daring thinker on par with Deleuze, Guattari, and Foucault.

The world's inhabitants are clearly not only interdependent but singly unable to achieve peace. In this important and timely book, philosopher and theologian Raimon Panikkar deals with the crucial issues of our time - peace, war, religion, ecology - as he redefines true peace and offers a way to achieve it in the world. Peace, he argues, requires more than nuclear, military, or economic disarmament. Peace can ultimately be obtained only by cultural disarmament, which requires that absolutism be abandoned for true reconciliation through ongoing intercultural dialogues.

Virginia Woolf, to whom university admittance had been forbidden, watched the universities open their doors. Though she was happy that her sisters could study in university libraries, she cautioned women against joining the procession of educated men and being co-opted into protecting a "civilization" with values alien to women. Now, as Woolf's disloyal (unfaithful) daughters, who have professional positions in Belgian universities, Isabelle Stengers and Vinciane Despret, along with a collective of women scholars in Belgium and France, question their academic careers and reexamine the place of women and their role in thinking, both inside and outside the university. They urge women to heed Woolf's cry—Think We Must—and to always make a fuss about injustice, cruelty, and arrogance.

Jacobi's polemical tract Concerning the Doctrine of Spinoza in Letters to Herr Moses Mendelssohn propelled him to notoriety in 1785. This work, as well as David Hume on Faith, or Idealism and Realism, Jacobi to Fichte, and the novel Allwill, is included in George di Giovanni's translation. In a comprehensive introductory essay di Giovanni situates Jacobi in the historical and philosophical context of his time, and shows how Jacobi's life and work reflect the tensions inherent in the late Enlightenment.
