The expansion of trade across borders has placed great focus on a particular link in the supply chain: the intermediaries. This study focuses on one specific form of intermediaries, the freight forwarders. The activities of a freight forwarder in developed countries are eased and stimulated by supportive policies and regulations, competitive markets, sophisticated infrastructure, and flawless inter-institutional coordination. In the case of Africa, cross border trade procedures represent a challenge with both time and cost related implications for supply chains. This study addressed the issue of bottlenecks within the freight forwarding sector in West coast Africa, specifically in Angola, Cameroon, DR of Congo, Gabon and Nigeria, with the purpose of identifying such constraints, producing a theoretical model and a number of recommendations to be implemented in the industry.

*Export-Import Theory, Practices, and Procedures* Springer Science & Business Media

In this book, the business of international freight forwarding is examined from both a theoretical and empirical point of view with a special emphasis on multimodal transport chains, including sea or air transport operations. In such contexts, the freight forwarder is always considered "The Architect of Transport", but this intermediary role seems to be largely neglected in research to date. Therefore, relevant concepts from economic theory and economic sociology are employed to produce both an intermediary and a network perspective of freight forwarding in order to provide a better understanding of this kind of transportation business. Furthermore, its intermediary role in such inherent network structures is explored by mapping relationship patterns in a stylized model framework applied to a questionnaire-based sample collected among freight forwarders engaged in such multimodal transport chains in Germany (especially from Hamburg, Bremen and Bremerhaven)

as well as in Austria in 2003.

Freight Forwarder Business Startup How to Start, Run & Grow a Successful Freight Forwarding Business The global freight forwarding market has been seeing a steady growth of around 5% for last four years in a row now. This trend is expected to continue and grow bigger. With all the new trade deals like TPP (Trans-Pacific Partnership), TAP (Trans-Atlantic Partnership) and many other similar trade deals between countries are bringing the whole world into one marketplace. According to Transportation Intelligence, a leading logistics research firm, in 2013 the freight forwarding industry was at 129 Billion, but as of today, it has grown by another 16-20 billion more. This is an industry that in my opinion still in its infancy, with TPP, TAP and many other global trade agreements, the need for such services will grow higher every year. Another rapid growth I see in this business is from all the Amazon FBA(Fulfilled By Amazon) business owners, most of who buy their merchandise from China. Now Amazon never accepts merchandise directly from a foreign country, so each and every piece of merchandise has to come through a freight forwarder/broker. This way the merchandise can get relabeled and shipped to various Amazon warehouses. In This Book You Will Learn: What is a Freight Forwarder What Is Freight Forwarding Business Types of Freight Forwarders Steps To Becoming A Freight Forwarder How to get started How and Where to Get Trained What Courses You Should Take How To Setup Your Business Legal Factors Freight Forwarder Licenses Steps to FMCSA Registration Insurance Requirements Running a Freight Forwarding Business Trading Condition and Limiting Liability How To Promote & Grow Your Business The Elements of Price Quote Links to all forms and applications But one word of caution, please don't think reading this book will be enough to get started as a freight forwarder, it takes some training either on the job (like I did) or formal school or online training to get started in this business. In this book, I shared some of the resources that are available for you to get started. If you are thinking about getting into this business, trust me when I say this, there is not a better time than now to get started. Do your research, get educated, get started. Good luck!
