ALEXIS JAMARCUS

Pediatric Acute Care Jones & Bartlett Publishers

Authored by the world's foremost stroke experts, this classic text brings you fully up to date with current research findings and management approaches for cerebrovascular disease. Stroke: Pathophysiology, Diagnosis, and Management, 7th Edition, covers every aspect of this fast-moving field, and is an ideal resource for stroke specialists, general neurologists, and other medical professionals with an interest in stroke. You'll find expert clinical guidance, comprehensive pathophysiology coverage, data from recent trials, advances in diagnostic tests, full-color CT images, pathology slides, and much more, for a complete picture of today's stroke medicine. Helps you recognize the clinical manifestations of stroke, use the latest laboratory and imaging studies to arrive at a diagnosis, and generate an effective medical and surgical treatment plan. Keeps you abreast of the overwhelming volume of studies and guidelines in this dynamic field, providing clear summaries and practical evaluations of all relevant data. Contains updates throughout, including the latest clinical trials (thrombectomy, DAWN, DEFUSE), genetics research, prevention research, new therapies, and the new guidelines from the ASA. Includes new slides for lectures, covering basic science, case studies, and interventional treatment overviews. Features a Key Points summary at the beginning of each chapter so you can quickly find important information. Provides abundant full-color CT images and pathology slides that help you make efficient and accurate diagnoses.

Elsevier's Canadian Comprehensive Review for the NCLEX-RN Examination - E-Book Springer Publishing Company
Awarded third place in the 2017 AJN Book of the Year Awards in the Critical Care- Emergency Nursing category. Learn to effectively address life-threatening and potentially life-threatening patient conditions, with *Advanced Critical Care Nursing, 2nd Edition*. Endorsed by the American Association of Critical-Care Nurses (AACN), this comprehensive, nursing-focused

text centers on the clinical reasoning process as it helps you comprehend, analyse, synthesize, and apply advanced critical care knowledge and concepts. The book is organized within the structure of body systems along with synthesis chapters that address patient conditions involving multiple body systems. Numerous illustrations and graphs plus unfolding case studies further aid your understanding and help you apply text content. In all, *Advanced Critical Care Nursing* is the must-have resource dedicated to helping you oversee or care for critical care patients in any practice setting. Body systems organization emphasizes core systems and advanced concepts. Consistent chapter format features numerous illustrations, charts, and graphs in each chapter to enhance understanding. Synthesis chapters address patient conditions that involve multiple body systems — a common occurrence in critical care nursing. Unfolding case studies with decision point questions are included at the end of all disorders chapters, providing opportunities to apply advanced critical care content to actual scenarios. Medication tables incorporate common classifications of critical care drugs for specific disorders, including drugs, actions, and special considerations. NEW! Updated information throughout reflects the latest evidence-based content as well as national and international treatment guidelines. NEW! Streamlined content places a greater focus on the need-to-know information for today's high acuity, progressive, and critical care settings. NEW! Expanded coverage of emerging and infectious diseases and multidrug-resistant infections keep readers up to date with the most topical diseases, such as the Zika virus. NEW! Additional content on alternative settings for critical care now includes the eICU and remote monitoring. NEW! Full-color design clarifies important concepts and improve the book's usability.

Lippincott Williams & Wilkins

"[This] quick reference text to guide nurses is a 'must-have' as this disease tests our health care delivery system... *Fast Facts for Stroke Care Nursing, Second Edition* provides a succinct yet comprehensive review." --Linda Littlejohns, MSN, RN, FAAN, SCRNP, CNRN Neuroscience Clinical Nurse Consultant From the

Foreword The second edition of this practical, pocket-sized reference has been updated to include the groundbreaking changes to stroke care protocols. Stroke is the fifth leading cause of death in the United States today and leading preventable cause of long-term disability. This resource fills in the gaps left in neuroscience content in nursing school and streamlines an often intimidating, but critically important, area of care. Featuring diagnostic tests, cutting-edge treatments, and standards for best practice, *Fast Facts for Stroke Care Nursing, Second Edition* distills the lengthy and often complex national stroke care guidelines into a clear, easily digestible format. This guide can be used as a staff education resource or as a concise review for SCRNP or SNRN certification exams, as well as a refresher for nurses seeking the essentials of stroke care. Content starts with stroke care improvements, covers moving through acute care to postacute care, and finishes with practical pointers for performance improvement. New to the Second Edition: Updated diagnostics with additional MR, CT, and transcranial Doppler options Modified Rankin Scale score Expands upon the neurological assessment with tips for completing it New acute hemorrhagic stroke intervention and 2015 landmark studies on thrombectomy Pipeline device New large-vessel occlusion tools, routing plans, and certification programs for prehospital personnel Expanded use of telemedicine Information for advanced practice providers Changes to the prehospital phase, the acute treatment phase, and the population affected by stroke Key Features: Reflects current standards of the American Heart Association, American Stroke Association, and The Joint Commission Provides crucial information at a glance about diagnostic tests, state-of-the-art treatments, and best practice standards

Stroke Nursing Certification Review Prentice Hall

An essential companion for busy professionals seeking to navigate stroke-related clinical situations successfully and make quick informed treatment decisions.

Fast Facts for the ER Nurse, Fourth Edition John Wiley & Sons
Delivering Emergency Medicine involves constant challenges to the emergency clinician, seen in the frequency of severely unwell patients, the wide breadth of conditions encountered, and the

urgency required in diagnosis and treatment. Concise, and, critically, accessible, *Algorithms for Emergency Medicine* supports the key decision-making requirements of clinicians working in the Emergency Department. Designed to support rapid problem solving, this resource covers everything from common non-life-threatening emergencies such as headaches to life-threatening acute events such as major traumas. Each topic is divided into two; the left page provides essential knowledge, and on the right, an algorithm which guides the clinician in a step by step process in managing these conditions. Evidence based and up-to-date, this book follows the College of Emergency Medicine Curriculum, making it an invaluable resource for Emergency Nurse Practitioners, new doctors starting their placement in the Emergency Department, and trainee doctors working towards specialising in Emergency Medicine.

[ACLS for EMTs](#) Lippincott Williams & Wilkins

This book is a unique source of practical information for frontline providers of care for stroke patients. It focuses on patient management—from stroke prevention through acute stroke management, through chronic care—and offers how-to guidance on implementing diagnostic and treatment protocols. Each chapter includes a bulleted list of key learning points; an evidence-based rationale for why the diagnostic and treatment recommendations work; a step-by-step approach to clinical application; practical recommendations from the authors; a critical pathway; and a bibliography. An entire chapter focuses on building a stroke team. Appendices include reproducible samples of order sets and a list of important medications.

[Advanced Cardiac Life Support](#) Elsevier

Stroke is a medical emergency that requires immediate medical attention. With active and efficient nursing management in the initial hours after stroke onset and throughout subsequent care, effective recovery and rehabilitation is increased. *Acute Stroke Nursing* provides an evidence-based, practical text facilitating the provision of optimal stroke care during the primary prevention, acute and continuing care phases. This timely and comprehensive text is structured to follow the acute stroke pathway experienced by patients. It explores the causes, symptoms and effects of stroke, and provides guidance on issues such as nutrition, continence, positioning, mobility and carer support. The text also considers rehabilitation, discharge planning, palliative care and

the role of the nurse within the multi-professional team. *Acute Stroke Nursing* is the definitive reference on acute stroke for all nurses and healthcare professionals wishing to extend their knowledge of stroke nursing. Evidence-based and practical in style, with case studies and practice examples throughout Edited and authored by recognised stroke nursing experts, clinicians and leaders in the field of nursing practice, research and education The first text to explore stroke management from UK and international perspectives, and with a nursing focus

The Stroke Book Oxford University Press

Nancy Caroline's *Emergency Care in the Streets*, Ninth Edition is the newest evolution of the premier paramedic education training program. This legendary paramedic textbook was first developed by Dr. Nancy Caroline in the early 1970s and transformed paramedic education. Today, lead editors Bob Elling and Barb Aehlert, along with the American Academy of Orthopaedic Surgeons, are proud to continue this legacy and set the new gold standard for the paramedics of tomorrow. The Ninth Edition offers cutting-edge, evidence-based content that meets or exceeds the most current scientific recommendations developed by the International Liaison Committee on Resuscitation (ILCOR) and the ECC Guidelines established by the American Heart Association and other resuscitation councils around the world. Clear chapter objectives align with the 2019 National EMS Scope of Practice Model and 2021 EMS Education Standards. Thoroughly reviewed by medical doctors and subject-matter experts, the Ninth Edition teaches students the technical skills required of today's paramedic while emphasizing other important professional attributes, including critical thinking, empathy, teamwork, communication, problem solving, and personal well-being. Taking a systemic approach to the assessment and management of traumatic and medical emergencies, and devoting entire chapters to special topics, such as mass-casualty incidents, the Ninth Edition covers the full scope of paramedic practice. Some of the key high-level updates to the Ninth Edition include the following: Language carefully reviewed throughout text to ensure gender neutrality, racial inclusivity, and nonstigmatizing descriptions of patient conditions NEW Street Smarts boxes throughout the text to emphasize the "soft skills" expected of today's paramedics Images updated to reflect appropriate PPE in the current COVID-19 setting Added emphasis on current spinal motion

restriction guidelines Thoroughly reviewed and updated references, statistics, and case studies CPR and ACLS algorithms updated throughout text to reflect the current AHA guidelines *Concept-Based Clinical Nursing Skills* Elsevier Health Sciences This updated and refined new edition is the only book to provide a comprehensive approach to the intensive care of neurologically injured patients from the emergency room and ICU through the operating room and post-surgical period. It reviews neuroanatomy, neuroradiology, and neurophysiology, examines the neurological problems most frequently seen in intensive care, and describes the various types of neurosurgery. General issues are discussed, such as cardiac care, fluids and electrolytes, nutrition, and monitoring as well as more specific conditions and complications including elevated intracranial pressure, seizures, and altered mental states.

[IAPS Textbook of Pediatric Surgery](#) Elsevier Health Sciences

During the 1990's, scientific advances in understanding the mechanisms and pathophysiology of acute central nervous system injury were offset by a history of disappointing results from Phase III clinical trials of novel neuroprotective drugs. Numerous novel compounds were "tested, and seemingly fell by the wayside. This book is intended to focus on novel therapies and the unique challenges their intended targets pose for the design and analysis of clinical trials. The authors explore the issues facing research in this area and the strategies that might lead to future success in this critical area of unmet medical need. It represents a compendium of information gained from over 20 years of clinical trial experience in areas of acute neurology and neurosurgery. From the knowledge of clinical assessment using standardized tools, to the intricate design of difficult hyper-acute neuroemergencies trials, the reader will benefit from the authors' perspectives. * Presents new perspectives on acute neuroemergency clinical trials * Includes insights from clinical pharmacology and industry perspectives * Discusses historical lessons learned from early and recent trials in acute neuroscience populations

[Textbook of Neurointensive Care](#) Cambridge University Press

Developed out of the authors' numerous years of successful classroom instruction to hundreds of students in ACLS courses. This volume contains 14 chapters that provide the core information necessary to prepare a candidate for the American

Heart Association's ACLS Provider course. Concepts are presented in a logical manner that allows the reader to progress from a foundation of basic core knowledge (first six chapters) to more complex case management material. As the chapters progress, the information, cases and algorithms become more complex, requiring integration of the knowledge gained in previous chapters. Continuous reinforcement is a critical aspect of this book and will give readers the understanding necessary to pass ACLS and the confidence to use it. The volume presents key concepts of advanced cardiac life support, systematic approach to emergency cardiac care, airway management, ventilation, and oxygen therapy, gaining intravenous access, monitoring and dysrhythmia recognition, 12-lead electrocardiographic interpretation, electrical therapy, pharmacological therapy, acute coronary syndromes, algorithms and emergency cardiac care protocols, prehospital cardiac emergency scenarios, acute stroke, special resuscitation situations and special treatment considerations in the prehospital environment. For paramedics and EMTs.

Rural Health Care Issues Jones & Bartlett Learning

Moderate and Deep Sedation in Clinical Practice Jones & Bartlett Learning

The Anesthesia Technician and Technologist's Manual is a comprehensive review of the core knowledge necessary for the day to day workflow of an anesthesia technician or technologist. The text is arranged into seven sections: Careers in Anesthesia Technology; Anatomy, Physiology, and Pharmacology; Principles of Anesthesia; Equipment Setup, Operation, and Maintenance; Operating Room and Hospital Environment; Operating Room Emergencies; and Acronyms and Abbreviations. This is also an ideal resource for those preparing for the ASATT certifying examination.

Stroke E-Book Springer

Going above and beyond the new DOT curriculum, this book offers a high level–yet practical–approach to the assessment, diagnosis and treatment of the full range of adult medical emergencies. Each well-illustrated chapter discusses realistic methods that a seasoned EMS practitioner would use–moving from assessment-based procedures with initial management of the threats, to field diagnosis and management of treatable

underlying causes. Includes real-world case studies. Assumes a familiarity with anatomy, physiology, and pathophysiology, and an overall understanding of the nature of medical emergencies. Assessment of the Medical Patient. Airway Management, Ventilation, and Oxygenation Therapy. IV Access and Medication Administration. Hypoperfusion (Shock). Dyspnea. Chest Pain. Altered Mental Status. Acute Abdominal Pain. Gastrointestinal Bleeding. Seizures and Seizure Disorders. Syncope. Headache, Nausea, and Vomiting. Case Studies. For EMTs, paramedics, nurses, and others involved in emergency medical care. *Fast Facts for Stroke Care Nursing, Second Edition* Prentice Hall Advanced Medical Life Support, Second Edition is the leading course for prehospital practitioners in the advanced medical assessment and treatment of commonly encountered medical conditions. Taught throughout the world since 1999, Advanced Medical Life Support (AMLS) was the first emergency medical services education program that fully addressed how best to manage patients in medical crises. AMLS is the only textbook approved for use by NAEMT's Advanced Medical Life Support course, which emphasizes the AMLS Assessment Pathway, the most important guide for assessing patients with medical conditions. The United Kingdom edition of AMLS is enhanced by: Key Features Critical thinking scenarios give students a genuine context for the application of the knowledge presented in the chapter, including a scenario solution. Students are able to assess, review, and discern the possible diagnosis of the patient. Chapter review questions, chapter summaries, and Putting It All Together sections reinforce key concepts and tie information together, helping students retain what they have learned. Endorsed by the National Association of EMS Physicians and the United Kingdom College of Paramedics, the course emphasises the use of the AMLS Assessment Pathway, a systematic assessment tool that enables healthcare practitioners to diagnose medical patients with urgent accuracy. Current Medical Content Coverage of basic and advanced treatment modalities incorporate the latest research developments that are suitable for both beginning and experienced prehospital care providers, emergency and critical care nurses, and emergency doctors. An Updated AMLS Assessment Pathway The revised AMLS Assessment Pathway provides a systematic approach to the assessment of a medical patient and even more direction for

students at all levels of practice.

Geriatric Trauma and Acute Care Surgery Jones & Bartlett Publishers

This volume explores some of the global challenges and possible solutions for transcultural health and social care, and includes a selection of papers that were presented at the 2nd European Transcultural Nursing Association International Conference, in June 2011. This collection explores some of the challenges and possible solutions from the perspectives of various countries regarding promoting transcultural health and social care, including Ireland, Turkey, Strasbourg, the Philippines, the Netherlands, Sweden and Australia. As outlined in the papers included, the provision of transculturally competent care is challenging and requires knowledgeable, skilled and culturally sensitive health and social care professionals. The delivery of culturally competent care requires a commitment from health and social care services, professionals working within these services, and institutes of education responsible for educating healthcare professionals to understand and be responsive to the needs of culturally diverse patients. Learned behaviour and deeply rooted values must be challenged to address unwitting prejudices and stereotyping. Attention should focus on creating an environment of trust where critical reflection occurs, blame is avoided, risk managed and new ideas developed, tested and evaluated.

Decision Support in Clinical Practice for Stroke: Clinician

Experiences and Expectations Lippincott Williams & Wilkins

Prepare for success on the NCLEX-RN® exam with the review book written for Canadian nursing students! Elsevier's Canadian Comprehensive Review for the NCLEX-RN® Examination, 2nd Edition provides everything you need to prepare for the NCLEX® exam — complete content review and more than 5,000 NCLEX examination-style questions in the book and online. Proving that not all NCLEX exam review books are the same, only this book includes the kinds of questions that consistently test the critical thinking skills needed to pass today's NCLEX exam. In addition, all answers include detailed rationales and test-taking strategies with tips on how to best approach each question. From Canadian editors Patricia Bradley and Karin Page-Cuttrara, and NCLEX review experts Linda Anne Silvestri and Angela Silvestri, this edition integrates Canadian approaches to nursing, making this the only comprehensive review text written from a fully Canadian

perspective. It's THE book of choice for NCLEX preparation! More than 5,000 practice questions in the text and online offer ample testing practice. UNIQUE! Detailed test-taking strategy and rationale is included for each question, offering clues for analyzing and uncovering the correct answer option. UNIQUE! Priority Nursing Action boxes provide information about the steps you will take in clinical situations requiring clinical judgement and prioritization. UNIQUE! Pyramid Points icons indicate important information, identifying content that typically appears on the NCLEX-RN® examination. UNIQUE! Pyramid Alerts appear in red text and highlight important nursing concepts. UNIQUE! Priority Concepts — two in each chapter — discuss important content and nursing interventions. New graduate's perspective is offered on how to prepare for the NCLEX-RN, in addition to nonacademic preparation, the CAT format, and test-taking strategies. Mnemonics are included to help you remember important information. 75-question comprehensive exam covers all content areas in the book in the same percentages that they are covered on the actual NCLEX-RN test plan. Practice questions on delegation, prioritization, and triage/disaster management emphasize these areas on the NCLEX exam. Companion Evolve website provides 25 new Next Generation NCLEX® (NGN)-style questions plus all alternate item format questions including multiple response, prioritizing (ordered response), fill-in-the-blank, figure/illustration (hot spot), chart/exhibit, video, and audio questions. Question categories on Evolve are organized by cognitive level, client needs area, integrated process, and content area, allowing completely customizable exams or study sessions. UNIQUE! Audio review summaries on Evolve cover pharmacology, acid-base balance, and fluids and electrolytes.

AMLS United Kingdom: Advanced Medical Life Support Oxford University Press

Are you looking for a new way of learning skills? Do you want to learn how to problem solve and think conceptually? Stein and Hollen's *Concept-Based Clinical Nursing Skills: Fundamental to Advanced* covers over 250 nursing skills in an innovative concept-based format with excellent illustrations, concise rationales, and current evidence. Unlike any other text, Stein and Hollen incorporate an overarching framework of seven critical concepts — accuracy, client-centered care, infection control, safety, communication, evaluation, and health maintenance — to drive

home the importance of these key themes in performing nursing skills. Each section balances need-to-know narrative with step-by-step skills, and every chapter includes a detailed case study with a concept map to help you apply knowledge and use clinical judgement in clinical situations involving nursing skills. Over 250 step-by-step nursing skills with over 900 photos and illustrations. Language and concepts reflect those used on the NCLEX. Concept-based approach to skills education pairs well with the Giddens framework. Accuracy, Client-Centered Care, Infection Control, Safety, Communication, Evaluation, and Health Maintenance are reinforced throughout as Critical Concepts to skills performance. Case studies with concept maps depict patients with problems that might be experienced in the clinical setting and are followed by a series of critical thinking questions with every chapter. Application of the QSEN competencies: A question that challenges you to apply a QSEN competency is provided within the critical thinking questions of each case study. Lessons from the Evidence boxes highlight and summarize current research that can contribute to evidence-based clinical practice; Lessons from the Courtroom boxes summarize actual court cases related to the skills in the chapter in order to help you understand legal implications; and Lessons from Experience boxes use a storytelling format to share the experiences of more experienced nurses with students. Application of the nursing process: Nursing diagnoses that include specific examples of client outcomes and nursing interventions are presented within each section of the chapters. Uses an easy-to-understand, conversational writing style. Organized to present fundamental skills first, then intermediate acute care skills, and finally advanced skills often performed in critical care. Critical concepts align with the quality and safety framework of the QSEN competencies. Emphasis on safety and client centered care. Expect the Unexpected boxes use a storytelling format to present unexpected situations that could occur and explore appropriate responses to them. Home Care, Lifespan, and Cultural Considerations provided in each chapter. Performing an Assessment chapter details physical assessment skills. Evolve site for students features skills video clips, skills checklists for all skills, and NCLEX-style review questions.

ASLS Springer Publishing Company

The purpose of this book is to give providers of all levels a simple

and essential source of practical information in treating the elderly trauma and emergency surgery patient. The Introduction instructs practitioners how to evaluate and assess risk including frailty and use this information in Goals of Care discussions to facilitate shared decision making so crucial to this population. The individual chapters consist of best practices and care guidelines from some of the most well-known thought leaders and best trauma centers in the country across the spectrum from geriatricians to trauma and acute care surgeons and nurses. Each chapter contains easy-to-read algorithms and references that the readers can use and adapt for their own setting. Chapters on Pre-hospital care will help guide EMS organizations and even systems in the right care and triage of the elderly. Each chapter also contains a Nursing Focus section for helpful nursing tips in caring for the elderly with those injuries and problems. These sections make this book a must-have for any center looking to improve its care of the elderly patient or just trying to be sure its care is already the best it can be. A special section on Post Acute Care will introduce the provider to the common issues surrounding particular disposition destinations for the elderly patient. This will facilitate discussions with families, case managers and facilities to help improve time to disposition.
