Sybex  
Over the last  
few years,

financial  
statement  
scandals,  
cases of fraud  
and  
corruption,  
data  
protection  
violations, and  
other legal  
violations  
have led to

numerous  
liability cases,  
damages  
claims, and  
losses of  
reputation. As  
a reaction to  
these  
developments,  
several  
regulations  
have been

<p>issued: Corporate Governance, the Sarbanes- Oxley Act, IFRS, Basel II and III, Solvency II and BilMoG, to name just a few. In this book, compliance is understood as the process, mapped not only in an internal control system, that is intended to guarantee conformity with legal requirements but also with internal policies and enterprise objectives (in particular, efficiency and</p>	<p>profitability). The current literature primarily confines itself to mapping controls in SAP ERP and auditing SAP systems. Maxim Chuprunov not only addresses this subject but extends the aim of internal controls from legal compliance to include efficiency and profitability and then well beyond, because a basic understanding of the processes involved in IT- supported</p>	<p>compliance management processes are not delivered along with the software. Starting with the requirements for compliance (Part I), he not only answers compliance- relevant questions in the form of an audit guide for an SAP ERP system and in the form of risks and control descriptions (Part II), but also shows how to automate the compliance management process based on SAP GRC (Part III). He</p>

thus addresses the current need for solutions for implementing an integrated GRC system in an organization, especially focusing on the continuous control monitoring topics. Maxim Chuprunov mainly targets compliance experts, auditors, SAP project managers and consultants responsible for GRC products as readers for his book. They will find indispensable information

for their daily work from the first to the last page. In addition, MBA, management information system students as well as senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in the SAP ERP environment, on GRC in general and its implementation in particular. *Implementing SAP S/4HANA Finance Espresso Tutorials GmbH Master the most*
