**A Long Walk to Water** Washington  
Square Press

There seems to be renewed interest in having universities and other higher education institutions engage with their communities at the local, national, and international levels. But what is community engagement? Even if this interest is genuine and widespread, there

are many different concepts of community service, outreach, and engagement. The wide range of activity encompassed by community engagement suggests that a precise definition of the “community mission” is difficult and organizing and coordinating such activities is a complex task. This edited volume includes 18 chapters that explore conceptual understandings of community engagement and higher education reforms and initiatives intended to foster it. Contributors provide empirical research findings, including several case study

examples that respond to the following higher education community engagement issues. What is “the community” and what does it need and expect from higher education institutions? Is community engagement a mission of all types of higher education institutions or should it be the mission of specific institutions such as regional or metropolitan universities, technical universities, community colleges, or indigenous institutions while other institutions such as major research universities should concentrate on national and global research agendas and on

educating internationally-competent researchers and professionals? How can a university be global and at the same time locally relevant? Is it, or should it be, left to the institutions to determine the scope and mode of their community engagement, or is a state mandate preferable and feasible? If community engagement or “community service” are mandatory, what are the consequences of not complying with the mandate? How effective are policy mandates and university engagement for regional and local economic development? What are the principal features and relationships of regionally-engaged universities? Is community engagement to be left to faculty members and students who are particularly socially engaged and locally embedded or is it, or should it be, made mandatory for both faculty and students? How can community engagement be (better) integrated with the (other) two traditional missions of the university—research and teaching? Cover image: The Towering Four-fold Mission of Higher Education, by Natalie Jacob *The Ik language* Language Science Press Quick vaccine rollouts are crucial for a

strong economic recovery, but vaccine hesitancy could prolong the pandemic and the need for social distancing and lockdowns. We use individual-level data from nationally representative surveys developed by YouGov and Imperial College London to empirically examine the determinants of vaccine hesitancy across 17 countries and over time. Vaccine demand depends on demographic features such as age and gender, but also on perceptions about the severity of COVID-19 and side effects of the vaccine, vaccine access, compliance with protective behaviors, overall trust in government, and how information is shared with peers. We then introduce vaccine hesitancy into an extended SIR model to assess its impact on pandemic dynamics. We find that hesitancy can increase COVID-19 infections and deaths significantly if it slows down vaccine rollouts, but has a smaller impact if all willing adults can be immunized rapidly. [Am I My Genes?](#) Springer

The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our

time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. [LONG WALK TO FREEDOM](#) is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

*Kenya National Assembly Official Record (Hansard)* Roli Books Private Limited  
Find a fulfilling career that tackles the world's most pressing problems, using this guide based on five years of research alongside academics at Oxford. You have about 80,000 hours in your career: 40 hours a week, 50 weeks a year, for 40 years. This means your choice of career is one of the most important decisions you'll ever make. Make the right choices, and you can help solve some of the world's most pressing problems, as well as have a more rewarding, interesting life. For such an important decision, however, there's surprisingly little good advice out there. Most career advice focuses on things like how to write a CV, and much of the rest is just (misleading) platitudes like "follow your passion". Most people we speak to don't even use career advice - they just speak to friends and try to figure it out for themselves. When it comes to helping others with your career the advice usually assumes you need to work as a teacher, doctor, charity worker, and so on, even though these paths might not be a good fit for you, and were not what the highest-impact people in history did. This guide is

based on five years of research conducted alongside academics at the University of Oxford. It aims to help you find a career you enjoy, you're good at, and that tackles the world's most pressing problems. It covers topics like: 1. What makes for a dream job, and why "follow your passion" can be misleading. 2. Why the most effective ways to make a difference aren't always the obvious ones like working at a charity, or becoming a doctor. 3. How to compare global problems, like climate change and education, in terms of their scale and urgency. 4. How to discover and develop your strengths. It's also full of practical tips and tools. You'll come away with a plan to use your 80,000 hours in a way that's fulfilling and high impact. What people are saying "Based on evidence and good sense, not platitudes" - Steven Pinker, New York Times bestselling author Johnstone Family Professor of Psychology at Harvard University. "This incredible group is helping people have a greater social impact with their careers." - Sue Desmond-Hellmann, CEO of the Bill and Melinda Gates Foundation. "Every college grad should read this" - Tim Urban, creator of Wait But Why. Read more online This

book is based on the free guide you can find on the 80,000 Hours website, where you can find many more articles and our most up-to-date content. All profits from the book are used to fund 80,000 Hours, expanding our research and enabling us to reach more people. About the authors 80,000 Hours is an independent non-profit founded in Oxford in 2011. It performs research into career choice, and provides online and in-person advice. Benjamin Todd is the CEO and co-founder of 80,000 Hours. He grew the organization from a student society at Oxford to a non-profit that's raised \$1.3m in donations, and has 100,000 monthly readers. He has a Master's degree in Physics and Philosophy from Oxford, and speaks Chinese, badly. Ben is advised by the rest of the 80,000 Hours team, including Professor Will MacAskill, author of *Doing Good Better*, co-founder of the Effective Altruism movement, and one of the youngest tenured professors of philosophy in the world.

**Recovering Biblical Manhood and Womanhood (Revised Edition)** Little, Brown

“An incredibly interesting work.” —Jane Smiley “A straight up masterwork.” —Sarah Silverman “Blisteringly funny.” —Corey Seymour “A transcendent apocalyptic satire.” —Michael Silverblatt “Crackling with life.” —Paul Theroux “Great fun.” —Salman Rushdie “A provocative debut.” —Kirkus Reviews From legendary actor and activist Sean Penn comes a scorching, “charmingly weird” (Booklist, starred review) novel about Bob Honey—a modern American man, entrepreneur, and part-time assassin. Bob Honey has a hard time connecting with other people, especially since his divorce. He’s tired of being marketed to every moment, sick of a world where even an orgasm isn’t real until it is turned into a tweet. A paragon of old-fashioned American entrepreneurship, Bob sells septic tanks to Jehovah’s Witnesses and arranges pyrotechnic displays for

foreign dictators. He’s also a contract killer for an off-the-books program run by a branch of United States intelligence that targets the elderly, the infirm, and others who drain society of its resources. When a nosy journalist starts asking questions, Bob can’t decide if it’s a chance to form some sort of new friendship or the beginning of the end for him. With treason on everyone’s lips, terrorism in everyone’s sights, and American political life sinking to ever-lower standards, Bob decides it’s time to make a change—if he doesn’t get killed by his mysterious controllers or exposed in the rapacious media first. A thunderbolt of startling images and painted “with a broadly satirical, Vonnegut-ian brush” (Kirkus Reviews), *Bob Honey Who Just Do Stuff* is one of the year’s most controversial and talked about literary works.

**Who Doesn’t Want to be Vaccinated? Determinants of Vaccine Hesitancy During COVID-19** Routledge

The training and development of human capital in Sub-Saharan Africa (SSA) will help countries in the region diversify their economies, carry out economic transformation, and support sustainable

growth. Higher education plays a key role in training qualified individuals who will be able to implement new technologies and use innovative methods to establish cost-efficient and effective enterprises and institutions. However, in order for SSA to reap the benefits of this investment in human capital, higher education institutions must secure financing to provide quality training and sound professional prospects to their students. Currently, tertiary education development is unsustainable resources per student are declining and the quality of education is affected. These issues are particularly pressing in times of financial global crisis, when available resources for tertiary education tend to diminish. The impact of the crisis that started in 2008 provides a clear illustration of the need to explore innovative ways to diversify and secure financing for higher education in SSA. ‘Financing Higher Education in Africa’ provides a comprehensive overview of higher education financing in SSA. The book begins with an explanation of the fundamental problems faced by higher education institutions and students in SSA, namely the combined pressure of a rapid

growth in demand and a growing scarcity of public resources, and it presents the dramatic consequences of these trends on quality. The book then turns to analyzing and comparing the current funding policies in SSA countries and it provides recommendations for improvement. Finally, the book examines the alternatives to the status quo and the policy tools needed to both diversify resources and allocate them based on performance. It will be of great interest to governments, universities, research institutions, and international organizations throughout the region.

*African Journal of Education Studies* CTA  
The push towards greater autonomy is one of the three main trends in every modern educational policy, alongside quality assurance and quality evaluation techniques and the need to devote attention to special — and often disadvantaged — target groups. It is, however, difficult to derive a unified concept of 'autonomy' from the comparative indicators which are published on a regular basis and it has emerged that there are significant differences depending on the specific area

and the administrative organisation of education in the country in question. During the discussions of the annual Congress of the European Association for Education Law and Policy (ELA) in Salzburg (1998) it was apparent that autonomy has to be considered in its various applications. Autonomy for school boards is realised through management, administrative mechanisms, management of staff and pedagogical options. Autonomy of administration requires competence, the willingness to establish an autonomous administration and awareness of each party's responsibility in the educational process. The contents of this Yearbook are an answer to the question of how legislatures are responding to the trend towards greater responsibility, decentralisation and autonomy. It is an overview of the efforts made by the Member States of the European Union to apply the principle of subsidiarity.

*Tense-Switching in Classical Greek*  
Houghton Mifflin Harcourt

Tense is at its most interesting when it behaves badly. In this book Arjan Nijk investigates the variation between the

past and present tenses to refer to past events in Classical Greek and beyond. Adopting a cognitive approach to the issue, he argues that the use of the present for preterite depends on the activation of implicit conceptual scenarios in which the gap between the past and the present is bridged. The book is distinguished from previous accounts by its precision in describing these conceptual scenarios, the combination of linguistic theorising with philological and statistical methods, the size of the corpus under investigation and the explicitly cross-linguistic scope. It provides a complete overview of the phenomenon of tense switching in Classical Greek, as well as new theoretical perspectives on deixis and viewpoint, and is important for classicists, narratologists and linguists of every stamp.

Cambridge University Press

Dongri to Dubai is the first ever attempt to chronicle the history of the Mumbai mafia. It is the story of notorious gangsters like Haji Mastan, Karim Lala, Varadarajan Mudaliar, Chhota Rajan, Abu Salem, but above all, it is the story of a young man who went astray despite having a father in the police force. Dawood Ibrahim was initiated into crime as a pawn in the hands of the Mumbai police and went on to wipe out the competition and eventually became the Mumbai police's own nemesis. The narrative encompasses several milestones in the history of crime in India, from the rise of the Pathans, formation of the Dawood gang, the first ever supari, mafia's nefarious role in

Bollywood, Dawood's move to Karachi, and Pakistan's subsequent alleged role in sheltering one of the most wanted persons in the world. This story is primarily about how a boy from Dongri became a don in Dubai, and captures his bravado, cunningness, focus, ambition, and lust for power in a gripping narrative. The meticulously researched book provides an in-depth and comprehensive account of the mafia's games of supremacy and internecine warfare.

Supplement to Who's who in America

Cambridge University Press

This book is about the close historical and linguistic relationship between the languages of Surinam and Benin, a relationship which can be viewed in terms of a Trans Atlantic Sprachbund or linguistic area. It consists of a detailed analysis of various possible substrate and adstrate effects in a number of components of the grammar, in the Surinam Creole languages, primarily from the Gbe languages of Benin but also from Kikongo.

**Community Engagement in Higher Education**

Hodder & Stoughton

This book explores the visual narratives of a group of decorated tombs from

Ptolemaic and Roman Egypt (c.300 BCE-250 CE). The author contextualizes the tombs within their social, political, and religious context and considers how the multicultural population of Graeco-Roman Egypt chose to negotiate death and the afterlife.

*Autonomy in Education*

World Bank Publications

This new, fully revised edition aims to serve as a guide for agricultural research scientists and other practitioners in writing papers for publication. It also looks to provide a resource manual for training courses in scientific writing. There are three new chapters on reporting statistical results, communicating science to non-scientific audiences and electronic publishing. In addition, the original chapters have all been rewritten to reflect current developments and to make the content more complete and easily comprehensible.

**No Logo** Currency

This book discusses the fundamental as well as modern approaches and technologies related to the fields of renewable energy and biofuels. Renewable energy sources can be replenished in a

given time frame and have the potential of replacing pollution causing fuels such as fossil fuels. Biofuels are derived from plants and other resources such as commercial, agricultural and domestic waste through biological processing using bacteria for anaerobic digestion. Biofuels are a commonly known form of renewable energy. The need to reduce the hazardous effect of non-renewable forms of energy has led to rapid progress and extensive research in this area. This extensive book collates researches from across the globe which explore the diverse aspects of renewable energy and biofuels. Different approaches, evaluations, methodologies and advanced studies have been included in this book. It will benefit researchers and students alike.

Global Trends 2030: Alternative Worlds Cambridge University Press

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and

microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
