At a time when the world is contemplating the depletion of non-renewable natural resources, the consumer society is increasingly being called into question. This is nowhere more acutely evident than in France, where since its beginnings in the nineteenth century, the consumer revolution, extending market forces into every area of social and private life, has been perceived as a challenge to core elements in French culture, such as traditional artisan crafts and small businesses serving local communities. Cultural historians and sociologists have charted the increasing commercialisation of everyday life over the twentieth century, but few have paid systematic attention to the crucial testimony provided by the authors of narrative fiction.

Consumer Chronicles rectifies this omission by means of close readings of a series of novels, selected for their authentic portrayal of consumer behaviour, and analysed in relation to their social, cultural and historical contexts. Walker's study, offering an imaginative interdisciplinary panorama covering the impact of affluence on French shoppers, shopkeepers and society, provides telling new insights into the history and characteristics of the consumer mentality.

The First Part of the Institutes of the Lawes of England. Or, A Commentarie Vpon Littleton, Not the Name of a Lawyer Onely, But of the Law it Selfe ... CHANGDER OUTLINE Originally published in German and French, the work is considered to be unsurpassed in both its scientific eloquence and accurate photographic documentation. Revising Brodmann's cortical parcellation system, von Economo took cytoarchitectonics to a new zenith.>The revised edition contains newly compiled tables with extensive quantitative data on the 107 cytoarchitectonic areas of Economo and Koskinas, plus all the 'transition' areas and full reproductions of the original microphotographs. It also contains the concluding chapter that appeared only in the 1929 English edition, with Economo's later views on cytoarchitectonic neuropathology and evolutionary neuroscience, enriched with material and figures from his later studies. Last but not least a newly discovered manuscript by Georg N. Koskinas, appears in English for the first time. In it, Economo's collaborator presents an insightful analysis of the 'General Part' of their larger textbook of cytoarchitectonics.

Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis, (CINDAS) *at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity was transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 19 (thesis year 1974) a total of 10,045 theses titles from 20 Canadian and 209 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. The organization of Volume 19 is identical to that of past years. It consists of theses titles arranged by discipline and by university within each discipline.
