In emergencies, distributing cash in a targeted manner can often meet people's immediate needs more quickly and appropriately than the direct distribution of commodities such as food aid. Cash gives people choices and thereby preserves their dignity. Commodity distribution may pose logistical problems, takes time, and in the case of food aid, may disrupt local markets if food is actually available within the affected country or region. But among humanitarian agencies there are fears that cash transfers will pose security risks, create inflation, and fail to be used to meet basic needs. In this guide, the first of its kind, Oxfam staff members present the rationale behind cash-transfer programs, considering the arguments for and against cash as an alternative to commodity distribution. They also give guidance on when cash is the most appropriate intervention and how to assess this. Different types of cash intervention are compared--cash grants, vouchers, and cash-for-work--and the guide uses checklists to explain the practical steps involved in implementing them. They draw on the experience of Oxfam and other agencies of operating such programs, including responses to the devastation caused by the Indian Ocean tsunami in December 2004. The

guidelines are primarily intended for NGO personnel: humanitarian program managers, food-security specialists, public-health engineers, finance staff, and logisticians. Policymakers in donor organizations and international agencies will also find them relevant. The sixteen cards contain key elements from the book to explain how to assess whether cash is the most appropriate response to any particular emergency. The cards and the paperback are also available as a set.
