The right to a fair trial is a fundamental element of legal systems. Guaranteed by national constitutions and the European Convention on Human Rights, it ensures the effectiveness of law against arbitrary acts of the authorities. The reports which

appear in this volume were presented in Brno, at a seminar on European constitutional heritage, in which judges from constitutional courts and other equivalent bodies from approximately 20 countries participated. They show the convergence of approaches, in Europe and on other continents, and the universal nature of rights protected by a fair trial.

Bislama is the variety of Melanesian Pidgin spoken in Vanuatu (formerly New Hebrides). In this learned study, Crowley

traces the history and development of Bislama from the 1840s to the present. Drawing on written records and other historical sources, he examines the language's labor history, and discusses the evolution of its grammatical construction. Arbitration in International Trade Africa World Press
Guides practitioners through the international arbitration process from beginning to end. This work covers each step of arbitral procedure, from the conclusion of the arbitration agreement to

the enforcement of the arbitral award, from a comparative standpoint, helping practitioners decide which jurisdiction's rules they wish to be bound by

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the

modern English historian Paul Harris.

In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series and out-of-print volumes are available on microfiche.

Mike Shayne investigates the connection between a flirtatious wife, a husband

blinded by jealousy, and a murdered boss

Just 3 years ago, Ralph Larson and his wife were newlyweds, the happiest young couple in Miami. But since Larson went to work for Wesley Ames, his life has been hell. He's convinced his wife has fallen in love with his boss, and the jealousy is driving him mad. Hoping to avoid a murder, private detective Mike Shayne tells Larson's wife to knock off the flirting before her husband's envy leads to tragedy. But it's too late: Death is at the door. When Shayne learns that Larson is headed to Ames's apartment, pistol in hand, he races there hoping to prevent bloodshed. He finds Larson standing over his boss's corpse, ready to confess to murder. But there's more here than meets the eye—and more to this murder than a resentful husband holding a smoking gun. Shoot to Kill is the 48th book in the Mike Shayne Mysteries, but you may enjoy reading the series in any order.

Annales Arms & Armour

This mythology study from Cameroon illuminates the performance contexts of the oral narratives in Subsaharan Africa. The study of the narrator, narrative pattern, audience interaction and details about language, setting, date, time of the performance of each tale is very important and helps to recreate the atmosphere of live performance. Through translated into English, the author has made an effort to give to the oral narratives an indigenous flavour. This book is divided into categories such as origin stories, stories about men and women, and trickster cycles.

Originally published in 1997, this book is concerned with human language technology. This technology provides computers with the capability to handle spoken and written language. One major goal is to improve communication between humans and machines. If people can use their own language to access information, working with software applications and controlling machinery, the greatest obstacle for the acceptance of new information technology is overcome. Another important goal is to facilitate communication among people. Machines can help to translate texts or spoken input from one human language to

the other. Programs that assist people in writing by checking orthography, grammar and style are constantly improving. This book was sponsored by the Directorate General XIII of the European Union and the Information Science and Engineering Directorate of the National Science Foundation, USA.

Survey of the State of the Art in Human Language Technology Cambridge University Press

Aims to take users from scratch to having a solid base in the language within six months, and to feel comfortable in as little

as three months. In only half an hour a day users will move ahead naturally until they are at ease with all the basic structures needed for communication and become familiar with the basic words and grammar. The method comprises two phases: the passive phase, in which users simply repeat what they hear and read, and the active phase, in which users begin to create sentences and imagine themselves in a variety of everyday situations.
