11 has been especially developed by an
 experienced author team for the
 Curriculum and Assessment Policy
 Statement (CAPS). This new and easy-to-
 use course helps learners to master
 essential content and skills in Physical
 Sciences. The comprehensive Learner's
 Book: • explains key concepts and
 scientific terms in accessible language and
 provides learners with a glossary of
 scientific terminology to aid
 understanding. • provides for frequent
 consolidation in the Summative
 assessments at the end of each module •
 includes case studies that link science to
 real-life situations and present balanced
 views on sensitive issues • includes 'Did
 you know?' features providing interesting
 additional information • highlights
 examples, laws and formulae in boxes for
 easy reference.

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Valley Song Macmillan

This volume focuses on detailed studies of various aspects of Construction Morphology, and combines theoretical analysis and descriptive detail. It deals with data from several domains of linguistics and contributes to an integration of findings from various subdisciplines of linguistics into a common model of the architecture of language. It presents applications and extensions of the model of Construction Morphology to a wide range of languages. Construction Morphology is one of the theoretical paradigms in present-day morphology. It makes use of concepts of Construction Grammar for the analysis of word formation and inflection. Complex words

are seen as constructions, that is, pairs of form and meaning. Morphological patterns are accounted for by construction schemas. These are the recipes for coining new words and word forms, and they motivate the properties of existing complex words. Both schemas and individual words are stored, and hence there is no strict separation of lexicon and grammar. In addition to abstract schemas there are subschemas for subclasses of complex words with specific properties. This architecture of the grammar is in harmony with findings from other empirical domains of linguistics such as language acquisition, word processing, and language change.

The Law of Succession in South Africa

Politicsweb Publishing

"Set on the campus of a Nigerian university, Double Yoke tells the story of Nko and Ete Kamba, a young undergraduate couple that must confront the conflicting demands of tradition and modernity. Nko pursues an education despite the resistance and rigid attitudes of those, like her husband, who feel that a woman's identity is defined through marriage. Her desire for an education severely tests her husband's love for her, and they both struggle with choices that are neither clear-cut nor perfect. Nko must further contend with unscrupulous professors who attempt to take advantage of her tenuous role as a woman in a male-dominated environment. In Double Yoke, Emecheta candidly portrays the status of women in emerging African nations and captures the urgency and complexity of the dilemmas they face."--Back cover.

The Construction of Words Penguin UK

Flip Lochner is a weary and disillusioned

newspaper crime reporter. Curious to find out more about the origins of a casual acquaintance, he descends into Devil's Valley where, like Dante's Virgil, he encounters a bewildering array of mysterious characters and events that lead him to reevaluate the world in which he lives and which he thought he knew.

Fusing invention and reality, magic realism and earthy humour, Lochner's adventures in the valley centre around the journey he undertakes to discover the truth about the elusive and erotic figure of Emma, one of Brink's most remarkable creations.

Geography, Grade 12 Gazelle Distribution

This edited book brings together an international cast of contributors to

examine how academic literacy is learned and mastered in different tertiary education settings around the world.

Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

To Be a Cat Elsevier

This book presents a comprehensive, systematic approach to the development of learning strategies.

Why are we stuck inside? It's so Boring!?
Or is it?

Double Yoke Centre for Higher Education Studies and Development Universi

Set in South Africa, *MindF**k* is a powerful, disturbing, and at times frightening story. Chris Burns, and his friends - Kerbs and Sky Eyes - take to the road, heading for the *MindF**k* rock festival. Along the way they pick up the gorgeous Partygirl. Burns and Partygirl connect immediately. But on the first night, while the rockmusic blasts from the stage, something unexpected happens - Burns's world gets turned on its head as one of the boys emerges from the tent with blood on his hands. *MindF**k* is a real page-turner. The gripping, character-focused, first-person narrative delves right to the heart of a life on-the-edge and

virtually out of control. Gritty, hard-hitting, and often shocking, it is packed with drama, emotion, suspense and intrigue from one page to the next. And there is a serious sting in the tail. *MindF**k* is part of the Cutting Edge series: fast-paced, quick reads for teens and young adults looking for fiction which chimes with their perspective on life. *MindF**k* is a title in the highly contemporary Cutting Edge fiction series for young adults. The series features fast-paced quick reads. Each book focuses on difficult topics and situations that many teenagers will have experienced first-hand or through friends. Cutting Edge is ideal for readers aged 14+ with a reading age of 12+.
