Topics include the design of modern ammonia systems and technological innovation, improving energy efficiency, various applications, technical guidelines and safety regulations. By using more ammonia refrigeration, we are employing environmentally friendly technology.

Science progrès, la nature

Food & Agriculture Org.

Classifies according to subject all documents abstracted in the Bulletin of the International Institute of Refrigeration, 1953-

Bibliographic Guide to

Refrigeration 1965-1968

is a bibliographic guide to

all the documents

abstracted in the

International Institute of

Refrigeration Bulletin

during the period

1965-1968. The

references include nearly

7,000 reports, articles,

and communications,

classified according to

subjects, and followed by

a listing of books. This

book is divided into 10

parts and begins with a

listing of references on

thermodynamics, heat

transfer, and other basic

physical phenomena

relating to refrigeration,

including desiccation and

measurements of

temperature, humidity,

and pressure. The next

sections are devoted to

the physics of low

temperatures and

cryogenics; production

and distribution of cold;

refrigerating plants

(mainly in the food

domain); and refrigerated

transport and packaging.

Other references deal

with air conditioning and

heat pumps; and

industrial, biological,

medical, and agricultural

applications of

refrigeration. The final

section focuses on

standards and

regulations, economics

and statistics, and

education and trade

activities in the

refrigeration industry. This

guide is intended to assist

researchers, engineers,

manufacturers, and

operators who are in

either constant or

occasional contact with

the refrigeration domain.

In accordance with Article

102 of the Charter and

the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their

subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series and out-of-print volumes are available on microfiche.
