This book, written with unique access to official archives, tells the secret

story of Britain's H-bomb - the scientific and strategic background, the government's policy decision, the work of the remarkable men who created the bomb, the four weapon trials at a remote Pacific atoll in

1957-58, and the historic consequences. [Racing for the Bomb](#) Les editions Scholastic Vols. 24, no. 3-v. 34, no. 3 include: International industrial digest. *Klutz : Fabrique Tes Bombes Pour le Bain*

Springer

See below for English description. Le moment est venu de sublimer l'heure de ton bain avec de la mousse pétillante, des couleurs amusantes et des parfums sucrés! Dans cette trousse, tu découvriras la science qui te permettra d'obtenir des bulles parfaites. Tu pourras fabriquer 12 bombes de bain colorées de cinq formes différentes en transformant ta cuisine en laboratoire. Ensuite, il te suffira de les plonger dans une baignoire remplie d'eau pour

découvrir leur parfum savoureux de fraise et kiwi. Rien de plus relaxant qu'un bon bain moussant! Comprend : du bicarbonate de soude de 3 couleurs, de l'acide citrique, 5 moules en plastique, de l'huile essentielle de fraise et kiwi et de la glycérine. It's time to transform your bath with fizzy bubbles, fun colour, and a fantastic fragrance. With this kit, you'll learn the science behind creating the perfect fizz and make up to twelve colourful bath bombs in five different

shapes-right in your own kitchen. Then dunk them in a bathtub full of water to release the sensational strawberry kiwi scent. So sit back, relax, and settle in for a good soak! Comes with: baking soda in three colours, citric acid, five plastic molds, strawberry kiwi oil, and glycerin. Original title: Make Your Own Bath Bombs  
**Eisenhower, Science Advice, and the Nuclear Test-Ban Debate, 1945-1963**  
 Presses universitaires de Rouen et du Havre  
 In September 1942,

Colonel Leslie R. Groves was given the job of building the atomic bomb. As a career officer in the Army Corps of Engineers, Groves had overseen hundreds of military construction projects, including the Pentagon. Until now, scientists have received the credit for the Manhattan Project's remarkable achievements. And yet, it was Leslie R. Groves who made things happen. It was Groves who drove manufacturers, construction crews, scientists, industrialists,

and military and civilian officials to come up with the money, the materials, and the plans to solve thousands of problems and build the bomb in only two years. It was his operation, and in *Racing for the Bomb* he emerges as a take-charge, can-do figure who succeeds in the face of formidable odds. Revealed for the first time in *Racing for the Bomb*, Groves played a crucial and decisive role in the planning, timing, and targeting of the Hiroshima and Nagasaki missions. Norris offers

new insights into the complex and controversial questions surrounding the decision to drop the bomb in Japan and Groves's actions during World War II, which had a lasting imprint on the nuclear age and the Cold War that followed. Groves's extensive influence on key institutions of postwar America has been overlooked for too long. In this full-scale biography, which includes archival material and family letters and documents and features several previously unpublished

photographs, Norris places Groves at the center of the amazing Manhattan Project story. Skyhorse Publishing, along with our Arcade, Good Books, Sports Publishing, and Yucca imprints, is proud to publish a broad range of biographies, autobiographies, and memoirs. Our list includes biographies on well-known historical figures like Benjamin Franklin, Nelson Mandela, and Alexander Graham Bell, as well as villains from history, such as Heinrich

Himmler, John Wayne Gacy, and O. J. Simpson. We have also published survivor stories of World War II, memoirs about overcoming adversity, first-hand tales of adventure, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home. Britain and the H-Bomb U

of Nebraska Press Janet Farrell Brodie explores the Trinity test and those whose contributions have rarely, if ever, been discussed--the men and women who constructed, served, and witnessed the first test--as well as the downwinders who suffered the consequences of the radiation.

**The Race Bomb** Morgan Rice

60 activités et conseils pour protéger la nature et te relier à elle ! La nature vit dans ton jardin, dans ta rue, et même dans ta

chambre. C'est l'eau, l'air, les animaux... et tant d'autres choses qui sont essentielles pour vivre et nous apportent de la joie. Nous avons besoin de la nature et, aujourd'hui, elle a besoin de nous ! Avec ce cahier, aide les oiseaux, réduis tes déchets, fabrique une bombe à graines ou évade-toi lors d'une marche apaisante en forêt. Es-tu prêt à observer la nature, à découvrir ses trésors et à la protéger ? Avec :

- Des infos utiles pour comprendre les secrets de

l'environnement et devenir un vrai observateur !

- Des conseils et bricolages variés pour les petits écolos en herbe !
- Des activités détente pour se ressourcer au contact de la nature.
- Une roue à découper pour cuisiner des repas de saison super bons.

Accompagné d'une fiche parent numérique pour cultiver le lien à la nature des enfants.

*Stopping the Bomb* Univ. Press of Mississippi

« Un tome d'ouverture intense pour une série qui promet un mélange de protagonistes fougueux et

de situations éprouvantes pour attirer non seulement les jeunes adultes, mais aussi les fans de fantasy plus âgés à la recherche d'histoires épiques alimentées par de grandes amitiés et de puissants adversaires. »

—Midwest Book Review (Diane Donovan) (à propos d'Un Trône pour Deux Sœurs) « L'imagination de Morgan Rice est sans limites ! »

—Books and Movie Reviews (à propos d'Un Trône pour Deux Sœurs)

Par l'auteure de fantasy n°1 Morgan Rice, une

nouvelle série pour les adolescents – et les adultes aussi ! Fans de Harry Potter et de Percy Jackson, ne cherchez pas plus loin ! La Fabrique Magique, tome 1 de la série Oliver Blue à l'École des Prophètes, raconte l'histoire d'Oliver Blue, 11 ans, un garçon mal aimé de sa famille odieuse. Oliver sait qu'il est différent, et sent qu'il détient des pouvoirs que les autres n'ont pas. Obsédé par les inventions, Oliver est déterminé à échapper à son horrible vie et à laisser son

empreinte sur le monde. Quand Oliver est forcé à déménager dans une énième maison épouvantable, il est placé dans une nouvelle classe de sixième, encore plus terrifiante que la précédente. Il est harcelé et exclu, et ne voit aucune issue à sa situation. Mais quand il tombe par hasard sur une fabrique à inventions abandonnée, il se demande si ses rêves ne sont pas sur le point de devenir réalité. Qui est le mystérieux inventeur qui se cache derrière l'usine ?

Quelle est son invention secrète ? Et Oliver se retrouvera-t-il transporté dans le temps, en 1944, dans une école magique pour enfants ayant des pouvoirs pouvant rivaliser avec les siens ? Histoire exaltante, La Fabrique Magique est le tome 1 d'une nouvelle série captivante pleine de magie, d'amour, d'humour, de chagrin, de tragédie, de fatalité, et de rebondissements stupéfiants. Elle vous fera tomber amoureux d'Oliver Blue, et tourner les pages jusque tard dans la nuit.

Le tome 2 (L'Orbe de Kandra) et le tome 3 (Les Obsidiennes) sont maintenant disponibles !

« Les prémisses de quelque chose de remarquable sont là. »

—San Francisco Book Review (à propos de La Quête des Héros)

Dix ans après le meurtre de ses parents, Katerina Barthély se voit confier, par l'un des professeurs de l'école de magie, une étrange mission : protéger une clé. À seize ans, la jeune sorcière a bien autre chose en tête que de lever les secrets d'une vieille clé poussiéreuse, comme de tenter de comprendre pourquoi, après avoir tué sa famille, le terrible Basileus cherche à la supprimer à son tour. Et surtout, trouver un moyen d'attirer l'attention du magnifique

Camille Dellait. Katerina trouvera-t-elle la porte qu'ouvre la mystérieuse clé, avant que le mage noir Basileus ne s'en empare ? *Fuel Element Fabrication* Springer

In this introductory textbook the author explains the key topics in cryptography. He takes a modern approach, where defining what is meant by "secure" is as important as creating something that achieves that goal, and security definitions are central to the discussion throughout. The author balances a

largely non-rigorous style — many proofs are sketched only — with appropriate formality and depth. For example, he uses the terminology of groups and finite fields so that the reader can understand both the latest academic research and "real-world" documents such as application programming interface descriptions and cryptographic standards. The text employs colour to distinguish between public and private information, and all chapters include

summaries and suggestions for further reading. This is a suitable textbook for advanced undergraduate and graduate students in computer science, mathematics and engineering, and for self-study by professionals in information security. While the appendix summarizes most of the basic algebra and notation required, it is assumed that the reader has a basic knowledge of discrete mathematics, probability, and elementary calculus.

The Effects of Atomic Bomb Blasts on Elevated Tanks and Standpipes  
Stanford University Press  
Après une longue période de “purgatoire”, les années Wilson connaissent une regain d’intérêt, et l’ouvrage propose de nouveaux regards sur ces années soixante si ambiguës.

**Report of Investigations.**  
**[no.2002 to No.7380]**  
Springer Science & Business Media  
How are the decisions made which produce the phenomenal arsenals of

nuclear weapons in the world today? Who makes them? To whom are they answerable? What role does Parliament play? These questions have until now been shrouded in mystery. But until the answers to them are widely and openly known, those who are concerned about the build-up of nuclear arsenals cannot know how the process works, and to whom they should address themselves. That is why this book is a breakthrough. It explains, for the first time, how

nuclear weapons decisions are made in each of the nuclear nations. The Oxford Research Group has brought together, entirely from non-classified sources, a mass of information to throw light on a hitherto invisible and unaccountable process.

**Les termes pétroliers**  
Oswaal Books and  
Learning Private Limited  
Based on extensive

research in government  
archives and private  
papers, this book analyzes  
the secret debate within  
the Eisenhower  
administration over the  
pursuit of a nuclear test-  
ban agreement. In  
contrast to much recent  
scholarship, this study  
concludes that  
Eisenhower strongly  
desired to reach an  
accord with the Soviet  
Union and the United  
Kingdom to cease nuclear  
weapons testing. For  
Eisenhower, a test ban  
would ease Cold War  
tensions, slow the nuclear

arms race, and build  
confidence toward  
disarmament; however,  
he faced continual  
resistance from his early  
scientific advisers, most  
notably Lewis L. Strauss  
and Edward Teller.  
Extensive research into  
previously unavailable  
government archival  
sources and collections of  
private manuscripts  
reveals the manipulative  
acts of test-ban  
opponents and other  
factors that inhibited  
Eisenhower's actions  
throughout his  
presidency. Meticulously

analyzed, these sources underscore Eisenhower's dependence on the counsel of his science advisors, such as Strauss, James R. Killian, and George B. Kistiakowsky, to determine the course he pursued in regard to several components of his national security strategy. In addition to its comprehensive analysis of the test-ban debate, this book makes important contributions to the scholarly literature assessing Eisenhower's leadership and his approach to arms control.

"  
A comparison of the effects of Test Able atomic bomb ionizing radiation and X-rays on seeds of barley, wheat and oats Hatier Jeunesse  
 " . . . offers the quickest way I know to acquire the basic historical background that we ought all to have." —Louis J. Halle, *Survival*  
 This classic in the field of military history covers weaponry from Archimedes' catapult down to MIRV and the ABM, emphasizes the contributions of science to warfare, and includes an

extensive new chapter on the weapons of the nuclear age.  
Dictionary of Louisiana French  
 The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi

River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new

authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English

equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane .
