Guide House of Collectibles
The increasing amount of violence in the United States in recent years has led to measures to control gun purchases and limit their availability. Against the arguments of gun-control lobbyists, who want to further decrease the number of weapons, or even ban guns altogether, are the voices of those who contend that gun bans are

unrealistic solutions to crime, and serve only to deny a valid form of self-defense to law-abiding citizens. Going beyond the emotional appeals and stilted rhetoric on gun control, *Guns: Who Should Have Them?* tackles the problems in a straightforward, intelligent manner. Each chapter in this powerful volume, written by leading experts in law, criminology, medicine, psychiatry, and feminist

studies, addresses a major issue in the gun-control debate. The conclusions of this carefully detailed and superbly argued study are difficult to deny: "gun control" is a red herring that has been deflecting attention from the true causes of crime, namely, the breakdown of the family; failed social welfare programs; and increasing hopelessness among male youths, especially in

our troubled inner cities.	1995 Gun digest.	proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House."

of budding sports journalist Jessica (Jessi) Redfield Ghawi in a public mass shooting, and the widening circle of pain it inflicted on her family, friends, police, medical first responders, and others. The book is at the same time a deep examination of the causes and potential cures of the quintessential 21st century American sickness—public mass shootings. At the heart of that examination is

an unpacking of America's deep polarization and political gridlock. It addresses head on the question of why? Why is American gun violence so different from other countries? Why does nothing seem to change? The "Parkland kids" inspired hope of change. But the ultimate questions stubbornly remain—what should, what can, and what will Americans do to reduce gun violence? Tragedy in

Aurora argues that the answer lies in a conscious cultural redefinition of American civic order. Over recent decades, America has defined a cultural "new normal" about guns and gun violence. Americans express formalistic dismay after every public mass shooting. But many accept gun violence as an inevitable, even necessary, and to some laudable part of what it

means to be “American.” Although Americans claim to be shocked with each new outrage, so far they have failed to coalesce around an effective way to reduce gun death and injury. The debate is bogged down in polarized and profoundly ideological political and cultural argument. Meanwhile, America continues to lead the globe in its pandemic levels of gun

deaths and injuries. Combined with the cynical “learned helplessness” of its politicians, the result is gridlock and a growing roll of victims of carnage. Is there a path out of this cultural and political gridlock? Tragedy in Aurora argues that if America is to reduce gun violence it must expand the debate and confront the fundamental question of “who are we?” Tom Diaz

gives a new understanding of American culture and the potential for change offered by the growing number and ongoing organization of victims and survivors of gun violence. Without conscious cultural change, the book argues, there is little prospect of effective laws or public policy to reduce gun violence in general and public mass shootings in particular. *United States Statutes at*
