*The French  
Right Between  
the Wars*

From the year  
1066 the  
English  
Channel has  
provided  
Great Britain  
with a natural  
defensive  
barrier, but  
never more  
than in the  
early days of  
World War  
Two. This  
book relates  
how the Royal  
Navy

defended that vital seaway throughout the war. From the early days of the Dover Patrols, through the traumas of the Dunkirk evacuation, the battles of the Channel convoys; the war against the E-boats and U-boats; the tragic raids at Dieppe and St Nazaire; the escape of the German battle-fleet; coastal convoys; the Normandy landings and the final liberation of the Channel Islands. Many wartime photographs, charts and tables add to this superb account of this bitterly contested narrow sea.

In defining Action Directe's mixture of millenarianism , workerism and nihilism, this study explains why the group turned to a strategy of murderous strikes and how a revolutionary political

faction emerged in a stable western society. *Lettres de la France Combattante* Casemate Publishers Charles De Gaulle's leadership of the French while in exile during World War II cemented his place in history. In contemporary France, he is the stuff of legend, consistently acclaimed as the nation's pre-eminent historical figure. But paradoxes abound. For one thing, his

personal popularity sits oddly with his social origins and professional background. Neither the Army nor the Catholic Church is particularly well-regarded in France today, as they are seen to represent antiquated traditions and values. So why, then, do the French nonetheless identify with, celebrate, and even revere this austere and devout Catholic, who remained closely wedded to

military values throughout his life? In *The Shadow of the General* resolves this mystery and explains how de Gaulle has come to occupy such a privileged position in the French imagination. Sudhir Hazareesingh's story of how an individual life was transformed into national myth also tells a great deal about the French collective self in the twenty-first century: its fractured memory, its aspirations to

greatness, and its manifold anxieties. Indeed, alongside the tale of de Gaulle's legacy, the author unfolds a much broader narrative: the story of modern France.

His Majesty's destroyers had a long and costly war. Some eight thousand destroyer men did not survive. At the height of the war the Royal

navy was commissioning four new vessels a month, which was only sufficient to replace those which had been sunk or severely damaged. This outstanding book contains the details of the majority of the sinkings that occurred throughout World War II and includes many firsthand accounts from the officers and crew involved.

The most up-to-date and comprehensive English-language study of its kind, From victory to Vichy explores the political mobilisation of the two largest French veterans' associations during the interwar years, the Union fédérale (UF) and the Union nationale des combattants (UNC). Drawing on extensive research into the associations' organisation,

policies and tactics, this study argues that French veterans were more of a threat to democracy than previous scholarship has allowed. As France descended into crisis, the UF and the UNC sought to extend their influence into the non-veteran milieu through public demonstrations, propaganda campaigns and the foundation of auxiliary groups. Despite shifting policies and independent

initiatives, by the end of the 1930s the UF and the UNC had come together in a campaign for authoritarian political reform, leaving them perfectly placed to become the 'eyes and ears' of Marshal Pétain's Vichy regime. Offering an original contribution to the history of late Third Republican political culture, From victory to Vichy will appeal to students and scholars of

modern France and Europe.

Excerpt: HMS Ledbury (Pennant L90)	was an escort destroyer of the Hunt Type II class. The Royal Navy ordered Ledbury's construction two days after the outbreak of the Second World War and J. I. Thornycroft Ltd laid down her keel at their Southampton yard on 24 January 1940. Air raid damage to the yard delayed her construction and she did not launch until 27 September 1941. Her initial assignment

was to perform escort duties between Scapa Flow and Iceland. She remained in this theatre for the first part of the war, during which time she served with the ill-fated Arctic convoy PQ17 in June 1942, from which twenty-four ships were lost. Only two months later she took up the role of close escort in the Pedestal convoy to Malta. During the fierce attacks that dogged the convoy,

Ledbury claimed three enemy aircraft destroyed and five damaged, and was one of three destroyers that helped the crippled oil tanker SS Ohio into the Grand Harbour. She added to her battle honours with the Allied landings in Sicily, Salerno, and operations in the Adriatic and Aegean. The Royal Navy finally scrapped Ledbury in... *Exchange of Letters Between the Prime Minister and General*

During the interwar years France experienced severe political polarization. At the time many observers,

particularly on the left, feared that the French right had embraced fascism, generating a fierce debate that has engaged scholars for decades, but has also obscured critical changes in French society and culture during the 1920s and 1930s. This collection of essays shifts the focus away from long-standing controversies in order to examine various elements of

the French right, from writers to politicians, social workers to street fighters, in their broader social, cultural, and political contexts. It offers a wide-ranging reassessment of the structures, mentalities, and significance of various conservative and extremist organizations, deepening our understanding of French and European history in a troubled yet fascinating era.

During the Second World War, there were over 100 instances of naval engagements between ships, submarines and aircraft of the same side. In the past there has often been a reluctance by the authorities to admit to these losses but with operational records now available, it is possible for

historians to explain how a good number of ships and submarines were attacked, damaged or sunk by the forces of their own side.
