The Inside Story of America's Ultimate Warriors When Osama bin Laden was assassinated, the entire world was fascinated by the men who had completed the seemingly impossible mission that had dogged the U.S. government for over a decade. SEAL Team 6 became synonymous with heroism, duty, and justice. Only a handful of the elite men who make up the SEALs, the US Navy's best and bravest, survive the legendary and grueling selection process that leads to becoming a member of Team 6, a group so classified it technically does not even exist. There are no better warriors on Earth. Don Mann knows what it takes to be a brother in this ultra-selective fraternity. As a member of Seal Team Six for over eight years and a SEAL for over seventeen years, he worked in countless covert operations, operating from land, sea, and air, and facing shootings, decapitations, and stabbings. He was captured by the enemy and lived to tell the tale, and he participated in highly classified missions all over the globe, including Somalia, Panama, El Salvador, Colombia, Afghanistan, and Iraq. As a coordinator for several civilian SEAL training programs, and as a former Training Officer of SEAL Team Six, he was directly responsible for shaping the bodies and minds of SEALs who carried out the assassination of Osama bin Laden. But to become a SEAL, Mann had to overcome his own troubled childhood and push his body to its breaking point--and beyond. **INSIDE SEAL TEAM 6** is a high octane narrative of physical and mental toughness, giving unprecedented insight to the inner workings of the training and secret missions of the world's most respected and feared combat unit.

A NEW YORK TIMES BESTSELLER "Already the most discussed and most important religious book of the decade." —David Brooks In this controversial bestseller, Rod Dreher calls on American Christians to prepare for the coming Dark Age by embracing an ancient Christian way of life. From the inside, American churches have been hollowed out by the departure of young people and by an insipid pseudo-Christianity. From the outside, they are beset by challenges to religious liberty in a rapidly secularizing culture. Keeping Hillary Clinton out of the White House may have bought a brief reprieve from the state's assault, but it will not stop the West's slide into decadence and dissolution. Rod Dreher argues that the way forward is actually the way back—all the way to St. Benedict of Nursia. This sixth-century monk, horrified by the moral chaos following Rome's fall, retreated to the forest and created a new way of life for Christians. He built enduring communities based on principles of order, hospitality, stability, and prayer. His spiritual centers of hope were strongholds of light throughout the Dark Ages, and saved not just Christianity but Western civilization. Today, a new form of barbarism reigns. Many believers are blind to it, and their churches are too weak to resist. Politics offers little help in this spiritual crisis. What is needed is the Benedict Option, a strategy that draws on the authority of Scripture and the wisdom of the ancient church. The goal: to embrace exile from mainstream culture and construct a resilient counterculture. The Benedict Option is both manifesto and rallying cry for Christians who, if they are not to be conquered, must learn how to fight on culture war battlefields like none the West has seen for fifteen hundred years. It's for all mere Christians—Protestant, Catholic, Orthodox—who can read the signs of the times. Neither false optimism nor fatalistic despair will do. Only faith, hope, and love, embodied in a renewed church, can sustain believers in the dark age that has overtaken us. These are the days for

building strong arks for the long journey across a sea of night.

**A Day at the Lake** HarperCollins Publishers

A narrative-driven exploration of policing and the punishment of disadvantage in Chicago, and a new vision for repairing urban neighborhoods For people of color who live in segregated urban neighborhoods, surviving crime and violence is a generational reality. As violence in cities like New York and Los Angeles has fallen in recent years, in many Chicago communities, it has continued at alarming rates. Meanwhile, residents of these same communities have endured decades of some of the highest rates of arrest, incarceration, and police abuse in the nation. The War on Neighborhoods argues that these trends are connected. Crime in Chicago, as in many other US cities, has been fueled by a broken approach to public safety in disadvantaged neighborhoods. For nearly forty years, public leaders have attempted to create peace through punishment, misinvesting billions of dollars toward the suppression of crime, largely into a small subset of neighborhoods on the city's West and South Sides. Meanwhile, these neighborhoods have struggled to sustain investments into basic needs such as jobs, housing, education, and mental healthcare. When the main investment in a community is policing and incarceration, rather than human and community development, that amounts to a "war on neighborhoods," which ultimately furthers poverty and disadvantage. Longtime Chicago scholars Ryan Lugalía-Hollon and Daniel Cooper tell the story of one of those communities, a neighborhood on Chicago's West Side that is emblematic of many majority-black neighborhoods in US cities. Sharing both rigorous data and powerful stories, the authors explain why punishment will never create peace and why we must rethink the ways that public dollars are invested into making places safe. The War on Neighborhoods makes the case for a revolutionary reformation of our public-safety model that focuses on shoring up neighborhood institutions and addressing the effects of trauma and poverty. The authors call for a profound transformation in how we think about investing in urban communities—away from the perverse misinvestment of policing and incarceration and toward a model that invests in human and community development.
