The Massorah Magna: Part One Massoretic Dictionary, or The Massorah in Alphabetical Order. Text in Hebrew and German.

[Jewish Studies Between the Disciplines / Judaistik zwischen den Disziplinen](#) Otto Harrassowitz Verlag

This issue of the Berliner Chinahefte/Chinese History and Society deals with cultural exchanges between China and the outside world and with their impact, mostly in terms of questions regarding tradition and modernity. China is understood more as an area composed of certain cultural elements which may include the Chinese (and Taiwanese) diaspora, where a sense of belonging still exists, and which exerts influence on everyday culture and habits.

Arthur Schopenhauer's Sämtliche Werke Brill Archive

Writing in English, German, or French, more than 300 authors provide a historical description of the beginnings and of the early and subsequent development of thinking about language and languages within the relevant historical context. The gradually emerging institutions concerned with the study, organisation, documentation, and distribution are considered as well as those dealing with the utilisation of language related knowledge. Special emphasis has been placed on related disciplines, such as rhetoric, the philosophy of language, cognitive psychology, logic and neurological science.

A unique analysis of the intensive interest in Jewish culture of early modern Christian Humanists as a part of their comprehensive program of study of Greek, Latin, and Hebrew. Over the past two decades, statistical and other quantitative concepts, models and methods have been increasingly gaining importance and interest in all areas of linguistics and text analysis, as well as in a number of neighboring disciplines and areas of application. The term "quantitative linguistics" comprises all scientific and technical approaches which use such terms and methods in the analysis of or work with language(s), texts and other related subjects. The 71 articles in this handbook, written by internationally-recognized experts, offer a broad, up-to-date overview of the scientific-theoretical principles, the history, the diversity of the subject areas studied, the methods and models used, the results obtained thus far and their applications. The articles are divided up into thirteen chapters: the first chapter includes contributions on the basic principles and the history of the field, nine additional chapters are dedicated to individual descriptions of the levels of linguistic research (from phonology to pragmatics) as well as typological, diachronic and geolinguistic questions. The next two chapters include a description of important models, hypotheses and principles; selected areas of application; and references to neighboring disciplines. The last portion of the handbook is an informative contribution, with information about publication forums, bibliographies, major projects, Internet links, etc. This handbook is useful not only for researchers, teachers and students of all branches of linguistics and the philologies, but also for scientists in neighboring fields, whose theoretical and empirical research touches on linguistic questions (for instance, psychology and sociology), or for those who want to make use of the proven methods or results from quantitative linguistics in their own research.

Collectors' Knowledge: What Is Kept, What Is Discarded / Aufbewahren oder wegwerfen: wie Sammler entscheiden Walter de Gruyter

Vielleicht ist die Erschaffung der Schrift die größte Erfindung der Menschheit überhaupt. Sie macht es möglich, Geschichten zu Geschichte werden zu lassen, sie gibt uns ein zeitloses Medium der Kommunikation, über alle Epochen und über alle Regionen der Erde hinweg. Und das Alphabet, diese circa zwei bis drei Dutzend Zeichen, stellen die Kronjuwelen dieser wahrlich königlichen Geistesleistung dar, egal mit welchem der bekannten Alphabete geschrieben wird. Verstreut wie Fürstentümer im Reich der Sprache führen die einzelnen Buchstaben ein Eigenleben, durchsetzt von kuriosen und überraschenden Kapriolen, und doch ausgezeichnet durch kulturübergreifende, kollektive Wirkungskraft. Der Darstellung des Charakters jedes einzelnen Buchstabens unseres

Alphabets, seine Entwicklung auf dem nahezu 4000 Jahre langen Weg der Schrift sowie das Sichtbarmachen der Zusammenhänge von Laut und Zeichen, diesen großen Themen unserer Kultur widmet sich das vor Ihnen liegende Buch. Mit zahlreichen schwarzweiß Abbildungen.

In considering the construction of medieval sermons, the term 'construction' has many meanings. Those studied here range from questions about sermon composition with the help of artes praedicandi or model collections to a more abstract investigation of the mental construction of the concepts of sermon and preacher. Sermons from a range of European countries, written both in Latin and vernaculars, are subjected to a broad variety of analyses. The approach demonstrates the vitality of this sub-discipline. Most of the essays are more occupied with literary and philological problems than with the religious content of the sermons. While many focus on vernacular sermons, the Latin cultural and literary background is always considered and shows how vernacular preaching was in part based on a more learned Latin culture. The collection testifies both to the increasing esteem of the study of vernacular sermons, and to a revival in the study of all those things contained in a preacher's 'workshop', ranging from rhetorical invention, medieval library holdings and study-aids, through to factors that are crucial for the successful delivery of the sermon, such as the choice of language, mnemonic devices and addressing the

audience. The interdisciplinary approach remains ever-present, not only in the diversity of the academic disciplines represented, but also within individual essays. The volume is based on a conference held in Stockholm, 7-9 October 2004.

Ugarit-Forschungen Walter de Gruyter

This volume contains revised and, in some cases, extended versions of twelve of the fourteen lectures read at the conference on "Early Germanic Languages in Contact" held at the University of Southern Denmark in Odense on 22-23 August 2013 – with a paper and a review article added at the end on themes pertaining to the aim and scope of the symposium. All papers cover central aspects of the early contact between Germanic and some of its Indo-European and non-Indo-European linguistic neighbours; and, in certain cases, aspects involving internal Germanic language contact.
