It is after years of teaching English to young children that this new course, Creative English, has been put together. Two things were in mind during its preparation: · What do children enjoy while learning a

language? Stories are based on children's interests and therefore hold their attention. For the first few classes, the lessons draw upon pupils' everyday experience, allowing links to be made between home and school. · What does a teacher need while teaching a language? The books are structured to meet the requirements of teachers across the board. Someone who has just started a career in teaching would find it stimulating enough to give his or her best. Others, with years of experience, could use it as a tool to carry forward all the good they have been doing.
