ÿ Inclusive business is hailed as a win-win scenario for the development of poor communities; yet there is little insight into how these inclusive businesses work and, more importantly, for whom. This book aims for a thorough understanding of the range of inclusive businesses in agriculture by examining: the structures they implement, the actors involved, and whether they are effectively inclusive of smallholders. It presents a range of case studies and is therefore empirically based and practically oriented. By offering a critical assessment of inclusive businesses overall, it allows for a

better perception of what works where, and under which conditions. It provides useful insights that will benefit smallholders, agri-businesses, support groups, policy makers and investors who are willing to promote more inclusive businesses, that foster a better integration of smallholders into commercial value-chains and a more equitable and sustainable agricultural sector.

Pulp & Paper Elsevier

This paper shows that donors that maximize relative aid impact spread their budgets across many recipient countries in a unique Nash equilibrium, explaining aid fragmentation. This equilibrium may be inefficient even without fixed costs, and the

inefficiency increases in the equality of donors budgets. The paper presents empirical evidence consistent with theoretical results. These imply that, short of ending donors maximization of relative aid impact, agreements to better coordinate aid allocations are not implementable. Moreover, since policies to increase donor competition in terms of aid effectiveness risk reinforcing relativity, they may well backfire, as any such reinforcement increases aid fragmentation.

When it comes to mechanicals, (HVAC, Plumbing and Electrical) "Green"

means fuel and energy efficiency, renewable and sustainable fuel sources, and water conservation. Both employers and consumers want to be Green and reduce energy consumption while maintaining their current lifestyles. They want technicians to be aware of the various methods employed in reducing energy consumption and conserving water. They want technicians to be knowledgeable about new technologies. The Green Awareness training program provides a basic understanding of green concepts, terminology, systems, and the latest in green mechanical technology. The manual contains five main sections: * Energy Management and Analysis * Building

Science * HVACR *
Electrical * Plumbing

This publication
provides an overview
of the importing
process and contains
general information
about import
requirements. This
edition contains much
new and revised
material brought about
because of changes in
the law, particularly
the Customs
Modernization Act. The
Customs modernization
provisions has
fundamentally altered
the process by shifting
to the importer the
legal responsibility for
declaring the value,
classification, and rate
of duty applicable to
entered
merchandise. Chapters
cover entry of goods,

informed compliance,
invoices, assessment
of duty, classification
and value, marking,
special requirements
for alcoholic
beverages, motor
vehicles and boats,
import quotas, fraud,
and foreign trade
zones. In addition to the
material provided by
the U. S. Customs
Service, the private
commercial publisher
of this book has
provided a bonus
chapter on how to
build a tax-free import-
export business.

This highly respected book instructs both students and sea-going engineers in the operation, care and maintenance of the auxiliary machinery and apparatus on board ship and is essential reading for marine engineers preparing for British Certificates of Competency examinations, US Licenses and similar</p>	<p>qualifications elsewhere. Designed for ease of use, the detailed treatment and practical orientation of the subject matter is presented in a very accessible manner. The inclusion of suggestions for further reading at the end of each chapter is of particular use to students and all those interested in any related titles. Alongside this, there is also sufficient theoretical background to enable the reader to fully understand the principles involved. These various features allow the book to also serve as a useful reference work for engineers in the shipbuilding and equipment manufacturing industries, as well as all sea-going</p>

engineers.

Payment modality preferences: Evidence from Ethiopia's Productive Safety Net Programme Remedia Publications

Alluvial fans are gently sloping, fan-shaped landforms common at the base of mountain ranges in arid and semiarid regions such as the American West. Floods on alluvial fans, although characterized by relatively shallow depths, strike with little if any warning, can travel at extremely high velocities, and can carry a tremendous amount of sediment and debris. Such flooding presents unique problems to federal and state planners in terms of quantifying flood hazards, predicting the magnitude at which those hazards can be

expected at a particular location, and devising reliable mitigation strategies. Alluvial Fan Flooding attempts to improve our capability to determine whether areas are subject to alluvial fan flooding and provides a practical perspective on how to make such a determination. The book presents criteria for determining whether an area is subject to flooding and provides examples of applying the definition and criteria to real situations in Arizona, California, New Mexico, Utah, and elsewhere. The volume also contains recommendations for the Federal Emergency Management Agency, which is primarily responsible for floodplain mapping,

and for state and local decisionmakers involved in flood hazard reduction.

Importing Into the United States

Grade Level: 4-6

Making sense of multiple-meaning words. The 25 lessons in this book are designed to give students plenty of practice recognizing and using homographs and heteronyms in written and oral communication.

Activities ranging from matching meanings to completing sentences work to stimulate awareness of the multiple meanings a single word can have and how pronunciation changes the meaning of like words. Example:
 - They tied a BOW on the present. - Robin Hood used a BOW and

arrows. - The star came on stage to take a BOW. Exercises increase in difficulty as students progress. A list of homographs not used in the lessons is included so teachers can design their own activities.

Quantitative Methods in Economics and Finance MDPI

The District Cooling Guide provides design guidance for all major aspects of district cooling systems, including central chiller plants, chilled-water distribution systems, and consumer interconnection. It draws on the expertise of an extremely diverse international team with current involvement in the industry and hundreds of years of combined experience.

This study of the Vaso de Leche (quot;Glass of Milkquot;) feeding program in Peru looks for evidence that this in-kind transfer program aimed at young children furthers nutritional objectives. The study links public expenditure data with household survey data to substantiate the targeting and to model the determinants of nutritional outcomes. It confirms that the social transfer program targets poor households and households with low nutritional status. Nevertheless, the study fails to find econometric evidence that the nutritional objectives are being achieved.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and

above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has

become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex. Electronics World World Bank Publications Importing finished

products, components, and raw materials has become the status quo in today's increasingly competitive business landscape. The lessons of inbound supply, however, can be very costly if learned through a trial-and-error approach—especially foreign purchasing. By not understanding the parameters of landed costs alone, purchasing managers can cause serious and expensive disruptions to their supply chain. Leaving little to chance, *Mastering Purchasing Management for Inbound Supply Chains* details the fundamentals regarding logistics and compliance. It emphasizes the importance of bonded warehouses and cost modeling and presents

case studies from a wide range of industries that illustrate best practices in imports, logistics, and landed cost modeling. International trade expert Thomas Cook provides valuable insights for avoiding common foreign trade zone pitfalls. He also explains the best ways to handle and minimize landed costs, including duties, shipping costs, and transfer pricing. This comprehensive purchasing guide covers the potential risks and complications involved with U.S. Customs (CBP), freight, INCO terms, and title and payment issues. Complete with a multitude of references to additional information in print and on the Web, the text provides the well-rounded understanding

needed to avoid costly mistakes and make purchasing one of the strongest links in your global supply chain.

ng Practices. In this book, you will find Step by Step Procedures for preparing an air conditioning and heat pump system for refrigerant, reading the manifold gauge set, measuring the refrigerants charge level, and troubleshooting problems with the system's refrigerant flow. This book differs from others as it gives key insights into each procedure along with tool use from a technician's perspective, in language that the technician can understand. This book explains the refrigeration cycle of air conditioners and heat pumps, refrigerant properties, heat transfer, the components included in the system, the roles

of each component, airflow requirements, and common problems. Procedures Included: Pump Down, Vacuum and Standing Vacuum Test, Recovery and Recovery Bottle Use, Refrigerant Manifold Gauge Set and Hose Connections, Service Valve Positions and Port Access, Preparation of the System for Refrigerant, Refrigerant Charging and Recovery on an Active System, Troubleshooting the Refrigerant Charge and System Operation
American Lumberman & Building Products Merchandiser
 A flagship marketing resource that provides an introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of

learning. Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying

skills. MyLab Marketing can be packaged with this edition to engage students and allow them to apply their knowledge, strengthen their understanding of key concepts and develop critical decision making skills.

Economists typically default to the assumption that cash is always preferable to an in-kind transfer. We extend the classic Southworth (1945) framework to predict under what conditions this assumption holds. We take the model to longitudinal household data from Ethiopia where a large-scale social safety net intervention - the Productive Safety Net Programme (PSNP) - operates. Even though most PSNP payments are paid in cash, and even though the

(temporal) transaction costs associated with food payments are higher than payments received as cash, the overwhelming majority of the beneficiary households prefer their payments only or partly in food.

However, these preferences are neither homogeneous nor stable. Higher food prices induce shifts in preferences towards in-kind transfers, but more food secure households and those closer to food markets and to financial services prefer cash. There is suggestive evidence that preferences for food are also driven by self-control concerns.
