The world agri-food system is getting increasingly 'globalized'. As the majority moves into cities, and those who remain in rural areas adopt urbanized lifestyles the consumption of food is changing toward varied yet similar consumption around the world. This book reflects on how these changes are affecting the poor by looking at specific factors that are driving change. The chapters consider different angles to the following questions: How do these changes affect the roles and powers of various actors along the food chain? How relevant are these trends to the economic developments within the global agri-food system, and in particular to the poor segments of society? How is the globalization of foods affecting human health? How can international and national policy address possible adverse direct and indirect effects of globalization of the world's agri-food system while strengthening positive ones? The book attempts to combine both lines of inquiry, focusing more specifically on the globalization of agri-food systems, the actual and potential impacts of these trends on the poor, and the implications for food and nutrition security in developing countries.

"[Mueller reveals] the brazen fraud in the olive oil industry and [teaches] readers how to sniff out the good stuff." —Dwight Garner, *New York Times* For millennia, fresh olive oil has been one of life's necessities—not just as food but also as medicine, a beauty aid, and a vital

element of religious rituals. But this symbol of purity has become deeply corrupt. A superbly crafted combination of cultural history and food manifesto, *Extra Virginity* takes us on a journey through the world of olive oil, opening our eyes to olive oil's rich past as well as to the fierce contemporary struggle between oil fraudsters of the globalized food industry and artisan producers whose oil truly deserves the name "extra virgin."

Corruption regularly makes front page headlines: public officials embezzling government monies, selling public offices, and trading bribes for favors to private companies generate public indignation and calls for reform. In *Corruption: What Everyone Needs to Know*®, renowned scholars Ray Fisman and Miriam A. Golden provide a deeper understanding of why corruption is so damaging politically, socially, and economically. Among the key questions examined are: is corruption the result of perverse economic incentives? Does it stem from differences in culture and tolerance for illicit acts of government officials? Why don't voters throw corrupt politicians out of office? Vivid examples from a wide range of countries and situations shed light on the causes of corruption, and how it can be combated.

The infiltration of organised crime in the legitimate economy has emerged as a transnational phenomenon. This book constitutes an unprecedented study of the involvement of criminal groups in the legitimate economy and their infiltration

in legal businesses, and is the first to bridge the research gap between money laundering and organised crime. It analyses the main drivers of this process, explaining why, how and where infiltration happens. Building on empirical evidence from the Netherlands, Slovenia, Spain, Sweden, the UK, Ireland, Italy, France and Finland, *Organised Crime in European Businesses* is divided into four parts. Part I explores the infiltration of legitimate businesses to conceal and facilitate illicit trafficking. Part II examines the infiltration of legitimate businesses to develop fraud schemes. Part III focuses on the infiltration of legitimate businesses to control the territory and influence policy makers. Part IV concludes by considering the research and policy implications in light of these findings. Bringing together leading experts and detailed case studies, this book considers the infiltration of organised crime in legitimate business around Europe. It is an ideal resource for students and academics in the fields of criminology, economics and sociology, as well as private sector practitioners, public officials and policy makers.

The General Law of Capitalist Accumulation in Latin America and Beyond Routledge

The mafia is the impenetrable and seemingly infallible embodiment of notoriety and criminality. Umberto Santino, one of Italy's leading mafia experts, here provides a new perspective on the mafia: as a polymorphic organization which encompasses crime, the accumulation of corruptly acquired wealth and power, the cultural code of omertà and consensus. Exploring the movements which strive to fight against the powers of the mafia, such as the campaigns of civil society

organizations like the Centro siciliano di documentazione, the author also provides a fresh look at the mechanisms - and struggles - of the antimafia movement.

Oltre un milione di controlli l'anno. 24 milioni di chilogrammi di prodotti fuorilegge sequestrati. Un giro d'affari di miliardi di euro. Sono le truffe alimentari, che periodicamente fanno capolino in tv sottoforma di agenti in divisa che mettono i sigilli su casse di formaggi avariati, prodotti ittici senza etichetta, partite di mozzarella alla diossina. Quello di cui nessuno parla però, è il sistema che consente ai truffatori e alle mafie di speculare utilizzando materie prime scadute se non addirittura vietate, mettendo a repentaglio la salute dei consumatori. È lo stesso sistema di norme e controlli europei e nazionali a permettere la vendita di cibo pericoloso per chi lo mangia. Un reticolo di burocrazia, negligenza, maglie normative allargate appositamente per permettere il profitto di multinazionali e

consorzi agroalimentari, che arriva in alcuni casi a costruire vere e proprie truffe legalizzate. Questo libro indaga sugli angoli più bui dell'industria alimentare italiana, laddove l'inganno e il profitto sono sempre più difficili da scovare.

The first comprehensive look at the global dilemma of child migration Why, despite massive public concern, is child trafficking on the rise? Why are unaccompanied migrant children living on the streets and routinely threatened with deportation to their countries of origin? Why do so many young refugees of war-ravaged and failed states end up warehoused in camps, victimized by the sex trade, or enlisted as child soldiers? This book provides the first comprehensive account of the widespread but neglected global phenomenon of child migration, exploring the complex challenges facing children and adolescents who move to join their families, those who are moved to be exploited, and those who move simply to survive. Spanning several continents and drawing on the stories of young migrants, *Child Migration and Human Rights in a Global Age* provides a comprehensive account of the widespread and growing but neglected global phenomenon of child migration and child trafficking. It looks at the often-insurmountable obstacles we place in the paths of adolescents fleeing war, exploitation, or destitution; the contradictory elements in our approach to international adoption; and the limited support we give to young people brutalized as child soldiers. Part history, part in-depth legal and political analysis, this powerful book challenges the

prevailing wisdom that widespread protection failures are caused by our lack of awareness of the problems these children face, arguing instead that our societies have a deep-seated ambivalence to migrant children—one we need to address head-on. *Child Migration and Human Rights in a Global Age* offers a road map for doing just that, and makes a compelling and courageous case for an international ethics of children's human rights.

Debating Immigration Alison Publishing

Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k), everyday decisions—both big and small—have become increasingly complex due to the overwhelming abundance of choice with which we are presented. As Americans, we assume that more choice means better options and greater satisfaction. But beware of excessive choice: choice overload can make you question the decisions you make before you even make them, it can set you up for unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In *The Paradox of Choice*, Barry Schwartz explains at what point choice—the hallmark of individual freedom and self-determination that we so cherish—becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice—from the mundane

to the profound challenges of balancing career, family, and individual needs—has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By synthesizing current research in the social sciences, Schwartz makes the counter intuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and ultimately derive greater satisfaction from the choices you have to make.

Pensare che il caporalato e lo sfruttamento lavorativo riguardino solo il settore agricolo e le zone rurali del nostro Paese è un errore. I recenti provvedimenti giudiziari sull'intermediazione illecita in danno dei rider del food delivery hanno svelato l'esistenza di pratiche di sfruttamento lavorativo anche nell'ambito della gig economy. I giudici hanno dimostrato come dietro ai servizi forniti tramite piattaforma digitale possano celarsi penetranti ingerenze ed abusi nell'organizzazione e nella gestione dell'attività lavorativa dei rider. Questi ultimi, ingaggiati con contratti di lavoro autonomo occasionale, venivano obbligati a turni di lavoro massacranti,

sanzionati in caso di comportamenti sgraditi al committente e messi in pericolo nella loro integrità psico-fisica. Inoltre i rider vittime di caporalato e sfruttamento erano in gran parte stranieri, richiedenti protezione internazionale e residenti in centri di accoglienza; dunque soggetti particolarmente fragili, vulnerabili e più facilmente ricattabili per ragioni legate alla regolarità del loro soggiorno nel territorio dello Stato.

The Alps and Resistance

(1943-1945) Bloomsbury Publishing

This collection of essays highlights how given Alpine territories in Austria, Italy, and Switzerland are currently facing challenges imposed by migration, the barriers and limitations they are encountering, and the extent to which migration triggers policy and territorial innovations that can generate beneficial impacts for both migrants and local inhabitants. Contributors here include practitioners and social workers who have experimented with innovative reception and integration pathways, as well as researchers with diverse disciplinary backgrounds, including geographers, sociologists, political scientists, social anthropologists, economists, and legal experts. The book draws on empirical and theoretical investigations, research actions implemented within the framework of large EU projects, and exploratory case studies and storylines of welcoming reception initiatives. It will appeal to

practitioners, social scientists, and policy makers interested in both understanding the determinants that affect migrant exclusion and inclusion in Alpine territories and developing reception and integration initiatives of advantage to both sides when hosting asylum seekers in mountain areas.

In recent years, Mediterranean agriculture has experienced important transformations which have led to new forms of labour and production, and in particular to a surge in the recruitment of migrant labour. The Mediterranean Basin represents a very interesting arena that is able to illustrate labour conditions and mobility, the competition among different farming models, and the consequences in terms of the proletarianization process, food crisis and diet changes. Migration and Agriculture brings together international contributors from across several disciplines to describe and analyse labour conditions and international migrations in relation to agri-food restructuring processes. This unique collection of articles connects migration issues with the proletarianization process and agrarian transitions that have affected Southern European as well as some Middle Eastern and Northern African countries in different ways. The chapters present case studies from a range of territories in the Mediterranean Basin, offering empirical data and

theoretical analysis in order to grasp the complexity of the processes that are occurring. This book offers a uniquely comprehensive overview of migrations, territories and agro-food production in this key region, and will be an indispensable resource to scholars in migration studies, rural sociology, social geography and the political economy of agriculture.

Il mercato alimentare, dalla commercializzazione delle sementi alla distribuzione dei prodotti commestibili, è in mano a poche potenti multinazionali e a grandi catene di supermercati. Un sistema globalizzato che ha tagliato il prezzo di quello che mettiamo nei piatti, ma a quale costo? Nei paesi avanzati ci si ammala di cibo e si sprecano tonnellate di alimenti, mentre nei paesi poveri quasi un miliardo di persone continua a morire di fame. La Terra esausta anche a causa dell'agricoltura che si nutre di petrolio, risorsa scarsa e inquinante. Perpetuare questo modello ed espanderlo per far fronte alle mutate abitudini alimentari di milioni di cinesi, indiani o brasiliani, che arricchendosi mangeranno sempre più come noi, non è sostenibile. Lo stanno predicando scienziati, visionari e attivisti. Ma soprattutto lo capiscono sempre più persone che si organizzano e agiscono per cambiare le cose dal basso. Un

movimento mondiale di contadini di città che coltivano pomodori sui tetti e fragole negli orti collettivi, di consumatori consapevoli che comprano a chilometro zero e costituiscono gruppi di acquisto solidale (GAS): in altre parole di cittadini che si ribellano alla "dittatura dello

scaffale". Siamo alle prese con l'ultima ossessione delle annoiate élite metropolitane o davvero questi fenomeni stanno contribuendo a riscrivere l'economia alimentare del pianeta?
