This is a book of basic English grammar for the elementary-level of learners. It can even be used by those who want to brush up their basics. Unlike the prevailing books on grammar in the market, the focus of this book is not on learning the definitions of grammatical terms. Instead, efforts are made to let the learners identify these items and understand their functions. Rational explanations are given for the learner to understand the rules with ease. Special care is taken to expose the learners to the unique features of the English language. This is to help them avoid committing common errors. Exercises are prepared to address these errors too. The 'Answer Keys' to the exercises are a part of the book. The book can be used as a course for learners to acquire the basics of grammar. It may be used as a grammar book for classes 5th to 8th in the CBSE schools and for classes 9th and 10th in the State Board schools in India.

Elementary English Grammar And Writing Skill. Learn English Grammar With Easy Writing Skill Lessons (Noun, Pronoun, Adjective, Adverb, Preposition, Conjunction, Interjection, Sentence - With Examples) This book is intended as an introductory text for courses in English grammar at secondary and tertiary level. It offers an outline account of the most important and central grammatical constructions and categories in English. I have assumed only minimal prior familiarity with the structure of English: all the grammatical terminology used is systematically explained. The analysis draws on the descriptive and theoretical advances made in modern linguistics, and for this reason the book could be used for an elementary course on English within a linguistics programme. It is, however, intended for a wider audience: for any course aiming to present a descriptive overview of the structure of English. Significant departures from traditional grammar in analysis or terminology are pointed out, normally in footnotes. One distinctive feature of the book is that it discusses the major grammatical categories at both a language-particular and a general level. The language-particular account gives the distinctive grammatical properties of the various categories as they apply to English: it thus provides the criteria for determining whether some word is a noun, verb, adjective, adverb or whatever, whether some verb-form is a past participle, a past tense form, etc., whether some clause is declarative, interrogative, imperative, exclamative - and so on. Analysis at the general level is concerned with what is common to the categories across languages, thus providing criteria for the application of the same terms in the grammars of different languages. Hope this book will remain as a "friend in need" in your daily life whenever you use English language as a communicative vehicle .
