MATHEWS CARLSON

Government Reports Annual Index

Van Nostrand Reinhold Company
 The link between gender and corruption has been studied since the late 1990s. Debates have been heated and scholars accused of bringing forward stereotypical beliefs about women as the "fair" sex. Policy proposals for bringing more women to office have been criticized for promoting unrealistic quick-fix solutions to deeply rooted problems. This edited volume advances the knowledge surrounding the link between gender and corruption by including studies where the historical roots of corruption are linked to gender and by contextualizing the

exploration of relationships, for example by distinguishing between democracies versus authoritarian states and between the electoral arena versus the administrative branch of government—the bureaucracy. Taken together, the chapters display nuances and fine-grained understandings. The book highlights that gender equality processes, rather than the exclusionary categories of "women" and "men", should be at the forefront of analysis, and that developments strengthening the position of women vis-à-vis men affect the quality of government.

The CPA Profession CRC Press
 In *How to Super Tune and Modify Holley Carburetors*, best selling author Vizard explains the science, the function, and most importantly, the tuning expertise required to get your Holley carburetor to perform its best for your performance

application.

Reflections on Character and Leadership

Robbie Newport

This book offers a critical introduction to the core technologies underlying the Internet from a humanistic perspective. It provides a cultural critique of computing technologies, by exploring the history of computing and examining issues related to writing, representing, archiving and searching. The book raises awareness of, and calls for, the digital humanities to address the challenges posed by the linguistic and cultural divides in computing, the clash between communication and control, and the biases inherent in networked technologies. A common problem with publications in the Digital Humanities is the dominance of the Anglo-American perspective. While seeking to take a broader view, the book

attempts to show how cultural bias can become an obstacle to innovation both in the methodology and practice of the Digital Humanities. Its central point is that no technological instrument is culturally unbiased, and that all too often the geography that underlies technology coincides with the social and economic interests of its producers. The alternative proposed in the book is one of a world in which variation, contamination and decentralization are essential instruments for the production and transmission of digital knowledge. It is thus necessary not only to have spaces where DH scholars can interact (such as international conferences, THATCamps, forums and mailing lists), but also a genuine sharing of technological know-how and experience. "This is a truly exceptional work on the subject of the digital....Students and scholars new to the field of digital humanities will find in this book a gentle introduction to the field, which I cannot but think would be good and perhaps even inspirational for them....Its history of the development of machines and programs and communities bent on using computers to advance science and research merely sets the stage for an insightful analysis of the role of the digital in the way both scholars and everyday people communicate and conceive of themselves and "others" in written forms - from treatises to credit card transactions." Peter Shillingsburg

The Digital Humanist is not simply a translation of the Italian book *L'umanista digitale* (il Mulino 2010), but a new version tailored to an international audience through the improvement and expansion of the sections on social, cultural and ethical problems of the most widely used methodologies, resources and applications.

TABLE OF CONTENTS // Preface: Digital Humanities at a Political Turn? by Geoffrey Rockwell / PART I: The Socio-Historical Roots - Chap. 1: Technology and the Humanities: A History of Interaction - Chap. 2: Internet, or The Humanistic Machine / PART II: Theoretical and Practical Dimensions - Chap. 3: Writing and Content Production - Chap. 4: Representing and Archiving - Chap. 5: Searching and Organizing / Conclusions: DH in a Global Perspective

 Publisher description
Dr. J. B. Cranfill's Chronicle Mdpi AG
 Daniel and Koerner provide technical guidance for ensuring construction quality control and assurance of geosynthetics used to contain waste.
Gender and Corruption North Amer Die Casting Assn

Reflections on Character and Leadership is the first of the three books in the Manfred Kets de Vries on the Couch series. Here, Kets de Vries looks at entrepreneurship, the pathology of leadership, and the personality of the leader. The reader will visit the disturbed inner worlds of leaders like Alexander the Great, Shaka Zulu and Robert Maxwell, discover how to distinguish between a cold fish and a live volcano, and identify impostors, despots, organizational fools and global leaders. The book highlights the basic principles of the clinical paradigm—the process of putting organizations and the individuals who lead them on the psychoanalyst's couch. It includes studies of personality archetypes and the effects they have on organizational life and culture—and the effects that organizations have on them. Referring frequently to key management concepts, Kets de Vries looks not only at what happens when things go wrong, but also at how to create the psychological and organizational space to make sure that things go right. About the series: The series offers an overview of Kets de Vries's work spanning four decades, a period in which he has established himself as the leading figure in the clinical study of organizational leadership. The books in this series contain a representative selection of Kets de Vries' writings about leadership from a wide variety of published sources and cover character and leadership in a global context, career development and leadership in organizations. The original essays were all written or published between 1976 and 2008. Updated where appropriate and revised by the author, they present a digest of the work of one of the most influential management thinkers of the present day.

Introducing Public Administration Springer
 Discusses equalization of wastewater flows at municipal wastewater treatment plants. Focuses on equalization of dry weather flows. Includes performance and case histories.

Waste Containment Facilities Butterworth-Heinemann
 Here is the first definitive history of graphic communication. More than a thousand vivid illustrations chronicle our fascinating & unceasing quest to give visual form to ideas.

A History of Graphic Design Harper Collins
 Suitable for practicing engineers and engineers in training, this book covers the most important operations involving particulate solids. Through clear explanations of theoretical principles and practical laboratory exercises, the text provides an understanding of the behavior

of powders and pulverized systems. It also helps readers develop skills for operating, optimizing, and innovating particle processing technologies and machinery in order to carry out industrial operations. The author explores common bulk solids processing operations, including milling, agglomeration, fluidization, mixing, and solid-fluid separation.

Flow Equalization Routledge
 Pounder's Marine Diesel Engines and Gas Turbines, Tenth Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission control areas (ECAs) have been established by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO2 measured as a product of cargo carried. Provides the latest emission control technologies, such as SCR and water scrubbers Contains complete updates of legislation and pollutant emission procedures Includes the latest emission control technologies and expands upon remote monitoring and control of engines

Damage Mechanisms and Life Assessment of High Temperature Components Amer Society of Civil Engineers
 The classic book on the development of human language by the world's leading expert on language and the mind. In this classic, the world's expert on language and mind lucidly explains everything you always wanted to know about language: how it works, how children learn it, how it changes, how the brain computes it, and how it evolved. With deft use of examples of humor and wordplay, Steven Pinker weaves our vast knowledge of language into a compelling story: language is a human instinct, wired into our brains by evolution. The Language Instinct received the William James Book Prize from the American Psychological Association and the Public Interest Award from the Linguistics Society of America. This edition includes an update on advances in the science of language since *The Language Instinct* was first published.

Cyber Security and Critical Infrastructures CRC Press
 This textbook treats the broad range of modern acoustics from the basics of wave

propagation in solids and fluids to applications such as noise control and cancellation, underwater acoustics, music and music synthesis, sonoluminescence, and medical diagnostics with ultrasound. The new edition is up-to-date and forward-looking in approach. Additional coverage of the opto-acoustics and sonoluminescence phenomena is included. New problems have been added throughout.

The Bureaucracy of Beauty Cambridge University Press

"This manual contains overview information on treatment technologies, installation practices, and past performance."--Introduction.

Ethics, Technology, and Engineering

Government Printing Office

Analytical methods used in the Geologic Division laboratories of the U.S. Geological Survey for the inorganic chemical analysis of rock and mineral samples.

This book provides an overview of the current advances in artificial intelligence and neural nets. Artificial intelligence (AI) methods have shown great capabilities in modelling, prediction and recognition tasks supporting human-machine interaction. At the same time, the issue of emotion has gained increasing attention due to its relevance in achieving human-like interaction with machines. The real challenge is taking advantage of the emotional characterization of humans' interactions to make computers interfacing with them emotionally and socially credible. The book assesses how and to what extent current sophisticated computational intelligence tools might support the multidisciplinary research on the characterization of appropriate system reactions to human emotions and expressions in interactive scenarios. Discussing the latest recent research trends, innovative approaches and future challenges in AI from interdisciplinary perspectives, it is a valuable resource for researchers and practitioners in academia and industry.

Pest and Predator Control John Wiley & Sons

Updated in its 8th edition, *Introducing Public Administration* provides readers

with a solid, conceptual foundation in public administration, and contains the latest information on important trends in the discipline. Known for their lively and witty writing style, Shafritz, Russell, and Borick cover the most important issues in public administration using examples from various disciplines and modern culture. This approach captivates readers and encourages them to think critically about the nature of public administration today.

Coatings Technology Handbook

Springer Science & Business Media

A core text for undergraduate/graduate-level courses in professional ethics; a supplement for intermediate/advanced-level accounting; or core text in professional practice seminars courses. Innovative in perspective, this text explores the non-technical dimension of the profession of accountancy and the duties and responsibilities assumed by its practitioners specifically by certified public accountants (CPAs). Part I provides an orientation to the profession; Part II explores the legal, regulatory, and social environments in which the CPA practices and their problems and challenges; Part III focuses on the traditional and the evolving market-drive services provided by CPAs; and Part IV surveys future trends and challenges.

Unit Operations of Particulate Solids

CarTech Inc

The worth of public service media is under increasing scrutiny in the 21st century as governments consider whether the institution is a good investment and a fair player in media markets. Mandated to provide universally accessible services and to cater for groups that are not commercially attractive, the institution often confronts conflicting demands. It must evidence its economic value, a concept defined by commercial logic, while delivering social value in fulfilling its largely not-for-profit public service mission and functions. Dual expectations create significant complexity for measuring PSM's overall 'public value?', a controversial policy concept that provided the theme for the RIPE@2012 conference, which took place in Sydney, Australia. This book, the sixth in the series of RIPE Readers on PSM published by NORDICOM, is the culmination of robust discourse during that

event and the distillation of its scholarly outcomes. Chapters are based on top tier contributions that have been revised, expanded and subject to peer review (double-blind). The collection investigates diverse conceptions of public service value in media, keyed to distinctions in the values and ideals that legitimate the public service enterprise in media in many countries.

The Science and Applications of Acoustics Pitman Publishing

This is a complete guide for those who are interested in starting up their own small lawn care business or for those who have one and want some helpful tips. With eight chapters and many sub chapters, this book deals with this seemingly simple topic holistically and in-depth. My hope is to give readers some helpful tips and guide them along so they can smoothly get a small lawn care business up and running successfully. This will allow them to escape working for someone else while making more money and having more flexibility in their lives. One chapter is devoted to telling you what this business is really like, so interested people can get a feel if it's something they want to pursue. Also, there's a chapter that talks about off-season ideas for work, which may help those who are already working the business too. All-together, this is the culmination of my four years of experience with having three different successful lawn care businesses. The third business I'm still working. Although I'm not an expert at gardening or landscaping, I've been able to replace the "real jobs" out there with something better. If you're interested in starting a small lawn care business, want some help getting it started the right way, and want to make sure you have success, then you can't go wrong with this complete guide for starting your small lawn care business book.

Handbook of Heat Transfer John Wiley & Sons

Serving as an all-in-one guide to the entire field of coatings technology, this encyclopedic reference covers a diverse range of topics-including basic concepts, coating types, materials, processes, testing and applications-summarizing both the latest developments and standard coatings methods. Take advantage of the insights and experience of over
