The world has changed radically since 1989, when the General Assembly declared the period from 1990 to 1999 as the United Nations Decade of International Law. During that time, the international community claimed some major achievements as reflected by the adoption of conventions and treaties.

This publication presents a collection of essays from legal advisers of States and international organizations, all of whom are among those committed to promoting respect for international law. Their contribution provides a practical perspective on international law, viewed from the standpoint of those involved in its formation, application and administration.

The classic thriller about a hostile foreign power infiltrating American politics: “Brilliant . . . wild and exhilarating.” —The New Yorker A war hero and the recipient of the Congressional Medal of Honor, Sgt. Raymond Shaw is keeping a deadly secret—even from himself. During his time as a prisoner of war in North Korea, he was brainwashed by his Communist captors and transformed into a deadly weapon—a sleeper assassin, programmed to kill without question or mercy at his captors’ signal. Now he’s been returned to the United States with a covert mission: to kill a candidate running for US president . . . This “shocking, tense” and sharply satirical novel has become a modern classic, and was the basis for two film adaptations

(San Francisco Chronicle). “Crammed with suspense.” —Chicago Tribune
“Condon is wickedly skillful.” —Time

Twenty years ago, noted film scholars Tom Gunning and André Gaudreault introduced the phrase “cinema of attractions” to describe the essential qualities of films made in the medium’s earliest days, those produced between 1895 and 1906. Now, *The Cinema of Attractions Reloaded* critically examines the term and its subsequent wide-ranging use in film studies. The collection opens with a history of the term, tracing the collaboration between Gaudreault and Gunning, the genesis of the term in their attempts to explain the spectacular effects of motion that lay at

the heart of early cinema, and the pair’s debts to Sergei Eisenstein and others. This reconstruction is followed by a look at applications of the term to more recent film productions, from the works of the Wachowski brothers to virtual reality and video games. With essays by an impressive collection of international film scholars—and featuring contributions by Gunning and Gaudreault as well—*The Cinema of Attractions Reloaded* will be necessary reading for all scholars of early film and its continuing influence.

For a principled refutation of the 9/11 propaganda myth in all its parts, Tarpley's work is indispensable. This new, fifth edition adds a significant new dimension. Tarpley's documentation of a

comprehensive array of 9/11 drills may prove as revolutionary as the thesis of controlled demolition - perhaps even more so. Many people have been unable to see that 9/11 was a false flag. They may seem immune to physical facts like the free-fall speed of the towers, as they take refuge in a lack of engineering qualifications. No math skills are needed to grasp the more familiar, common-sense fact that an act that is rehearsed is also staged. Moreover, when we learn how drills are essential to conduit such operations, we can recognize many types of false flags, such as the London bombings, and not only building collapses. Finally, wider public awareness of the dangerous workings of drills could help prevent terror operations, by making them too difficult

to carry out with impunity. The authoritative work on 9/11 and state-sponsored false-flag terrorism. 9/11 Synthetic Terror is the only book to present a working model for the event - a network of moles, patsies, paramilitary pros, privatized intelligence assets and corrupt media corporations. We see how this enormous provocation was successfully executed and exploited as war propaganda. This new, fifth edition reveals a whole new dimension of explosive facts for the first time: the enormous array of drills in which the US defense apparatus rehearsed every aspect of the 9/11 operation. Author Webster Tarpley presents the corpus of 9/11 research - such as the controlled demolition of the three WTC towers - from the perspective of a veteran

intelligence expert and historian. The exploit is placed in the geopolitical context of oligarchy and imperialism - in the tradition of precedents such as the Gunpowder Plot, the USS Maine, the Strategy of Tension, and other historically decisive state-sponsored terror subterfuges.
