Injury. Adrenaline. Addiction. These are the things that fuelled one man's race to international stardom as he pushed boundaries and took life on and off the bike to the limits. Starting out as a talented youth riding the desert tracks of California, his reckless nature and incredible talent earned him a position in the rarefied world of professional motorcycle racing. Despite the success in his professional life, his personal life was crumbling around him - John was battling with depression and temptation, which began to threaten his career, health and marriage, ultimately bringing him to a life of alcoholism, addiction and even smuggling. In his remarkable memoir, one of the world's most renowned riders takes us on a raw and unique journey to the extremes of fast living. John 'Hopper' Hopkins is an icon for motorsport fans worldwide. He won't let anything hold him back. He has broken almost every bone in his body (twice), suffered a bleed on the brain, and had a finger amputated... yet he continued to race. Finally, at the age of 35 - with his latest crash at Brands Hatch in 2017 putting him in rehab for two years - he decided to hang up his helmet. Leathered tells the incredible story of an unparalleled career. From bone-crunching injuries and alcohol-fuelled antics to the breakdown of his marriage, it unveils the true stories behind the lurid headlines.

"The authors test whether poor households use cash transfers to invest in income generating activities that they otherwise would not have been able to do. Using data from a controlled randomized experiment, they find that transfers from the Oportunidades program to households in rural Mexico resulted in increased investment in micro-enterprise and agricultural activities. For each peso transferred, beneficiary households used 88 cents to purchase consumption goods and services, and invested the rest. The investments improved the household's ability to generate income with an estimated rate of return of 17.55 percent, suggesting that these households were both liquidity and credit constrained. By investing transfers to raise income, beneficiary households were able to increase their consumption by 34 percent after five and a half years in the program. The results suggest that cash transfers to the poor may raise long-term living standards, which are maintained after program benefits end. "--World Bank web site.
