Five bodies, five intersecting storylines, five lives ... each searching for hope and

redemption. Wayne County Medical Examiner's Office, Detroit, Michigan: October 31, 1999. Five unidentified bodies lie in the Wayne County morgue on Halloween night. Although each character was on a separate journey, fate leads each of the five victims to cross paths on the streets of Detroit en route to their tragic demise. Set against the backdrop of a Devil's Night party at legendary Detroit concert venue and nightclub, Saint Andrew's Hall, Awaiting

Identification details the final night on earth for five lost souls. NYC Girl: a former dancer arrives back home from New York City to make amends with her mother and begin to rebuild her life. Leaf Man: a musician and part-time DJ is on the cusp of his big break with one final, unexpected drug deal to complete before he can go totally straight. R.I.P.: a career criminal must come up with a large sum of money to pay for his father's medical expenses, despite his yearning for a crime-free

life. The Zealot: a religious fanatic on a mission from God to rid the city of filth. Cat Man: a kind and trusting homeless man wanders the city looking for new friends. Like the city in which it takes place, *Awaiting Identification* is a story of hope, identity, and above all, redemption. *Cotton Ginners Handbook* Elsevier Health Sciences The kids from *The* revealers are back, entering eighth grade at Parkland Middle school, where they have to cope

with the super-popular kids and the ugly truth about online bullying. *A Portable Pulse* Generator Academic Press Dr. Loren A. Olson has frequently been asked two questions: How could you not know that you were gay until the age of forty? Wasn't your marriage just a sham to protect yourself at your wife's expense? In *Finally Out*, Dr. Olson answers these questions by telling the inspiring story of his evolving sexuality, into which he intelligently weaves psychological

concepts and gay history. This book is a powerful exploration of human sexuality, particularly the sexuality of mature men who, like Dr. Olson, lived a large part of their lives as straight men-- sometimes long after becoming aware of their same-sex attractions. Readers will come to understand: - That there is no universal model for coming out - Why many older LGBTQ men came out late, do not come out at all, or come out to varying degrees in different environments -

How stigma has created mental health problems for isolated and closeted men who have sex with men, particularly in geographical areas and cultures where there is little or no acceptance of homosexuality - How sexual function changes but perhaps even improves for older men - That aging creates opportunities that one has never had and may never have again, e.g., freedom from the tyranny of ambition - That some people consistently prefer an older sexual partner

and this can lead to stable, intergenerational relationships - How same-sex sexual activity was considered prior to the Stonewall uprising in 1969 contrasted with the way it is perceived after Stonewall - How age, culture, geographical location, heterosexual marriage, and children impact a person's decision to come out - Why "conversion therapy" does not work and may be harmful - The difference between homophobia and homonaïveté - The archetypes of self-

identified straight men who seek occasional or regular sex with other men - How to overcome the shame and guilt experienced by men who are sexually attracted to other men

**Dictionary** Springer Science & Business Media Self-proclaimed teenage philosopher Cordell Wheaton lives in a sleepy, southern town where nothing ever happens; not since his hero, jazz musician John Coltrane, left some seventy years

earlier to "follow the sound." Cordy's life has been unraveling since the night his father and his brother, Travis, exploded on each other. The night Travis's addiction transformed him from budding musician into something entirely different. The night Travis took his saxophone and disappeared. When Cordy's father falls ill, the sixteen-year-old vows to reunite the Wheaton family. He embarks on a modern-day odyssey with forty bucks in his pocket and a dream to find his

brother and convince him to be Travis again--by taking him to a show at Birdland Jazz Club in New York City, and reminding him of the common bonds they share with their legendary hero. Cordy's journey is soon haunted by ghostly visions, traumatic dreams, and disembodied voices that echo through his mind. He starts to wonder if the voices are those of the fates, guiding him toward his destiny--or if he's losing his grip on reality. *Awaiting Identification* Double-Barrelled Books

of Unified Science Apres Microstrip patch antennas have become the favorite of antenna designers because of their versatility and having the advantages of planar profile, ease of fabrication, compatibility with integrated circuit technology, and conformability with a shaped surface. There is a need for graduate students and practicing engineers to gain an in depth understanding of this subject. The first edition of this book, published in 2011, was

written with this purpose in mind. This second edition contains approximately one third new materials. The authors, Prof KF Lee, Prof KM Luk and Dr HW Lai, have all made significant contributions in the field. Prof Lee and Prof Luk are IEEE Fellows. Prof Lee was the recipient of the 2009 John Kraus Antenna Award of the IEEE Antennas and Propagation Society while Prof. Luk receives the same award in 2017, both in recognition of their contributions to wideband microstrip antennas.

Designed for first-time readers of the subject, this stimulating introduction offers a historical exposition of differing views on the philosophy of science. With concise profiles presenting the major philosophers whose contributions are discussed in this book, Losee explores the long-argued questions raised by philosophers and scientists about the proper evaluation of science. This new edition incorporates

contemporary developments in the discipline, including recent work on theory-appraisal, experimental practice, the debate over scientific realism, and the philosophy of biology. Taking a balanced and informative approach, this work is the ideal introductory volume.

Combat robotics is a sport that is practiced world-wide. It attracts all kinds of participants, especially people interested in technology, engineering, machine design, computer science, new technologies and their

trends. The competitions involve one-on-one duels between radio-controlled robotic vehicles in a bulletproof arena. RioBotz is the Robotic Competition team from the Pontifical Catholic University of Rio de Janeiro, Brazil. The team is formed by control, mechanical and electrical engineering undergraduate students from the University. This 374-page tutorial tries to summarize the knowledge learned and developed by the team since its creation in 2003. It includes the information

on competing as well as designing and building combat robots. This tutorial also includes build reports from all combat robots from RioBotz, including detailed drawings and photos, totaling almost 900 figures.

English and American Tool Builders Bloomsbury Publishing  
 Winner of the 2004 Edelstein Prize given by the Society for the History of Technology "The cotton gin animates the American imagination in unique ways. It evokes no

images of antique machinery or fluffy fiber but rather scenes of victimized slaves and battlefield dead. It provokes the suspicion that had Eli Whitney never invented the gin, United States history would have been somehow different. Yet cotton gins existed for centuries before Whitney invented his gin in 1794. Nineteenth-century scholars overlooked them as well as gins made by southern—and northern—mechanics, in order to create a history

meant to chasten some southerners and demean others. Using the gin as evidence, they read failure back from the Civil War into the choices that southerners made from the American Revolution, tracing the steps that led them to Appomattox." In *Inventing the Cotton Gin*, Lakwete explores the history of the cotton gin as an aspect of global history and an artifact of southern industrial development. She examines gin invention and innovation in Asia and Africa from the earliest

evidence to the seventeenth century, when British colonizers introduced an Asian hand-cranked roller gin to the Americas. Lakwete shows how indentured British, and later enslaved Africans, built and used foot-powered models to process the cotton they grew for export. After Eli Whitney patented his wire-toothed gin, southern mechanics transformed it into the saw gin, offering stiff competition to northern manufacturers. Far from being a record of southern failure, Lakwete

concludes, the cotton gin—correctly understood—supplies evidence that the slave labor-based antebellum South innovated, industrialized, and modernized. *Perspectives on the Teaching of Geometry for the 21st Century* Createspace Independent Publishing Platform Gain fast access to design information required for any RF communication project using high-frequency circuits and systems with this bestseller. *Life Before Birth*

Charlesbridge Publishing  
Julián Romero, Sancho Dávila, Cristóbal de Mondragón, and Francisco de Valdés were prominent Spanish military commanders during the first decade of the Revolt in the Low Countries (1567-1577). Occupying key positions in this conflict, they featured as

central characters in various war narratives and episodic descriptions of the events they were involved in, ranging from chronicles, poems, theatre plays, engravings, and songs to news pamphlets. To this day, they still figure as protagonists of historical novels: brave heroes in some, cruel oppressors in others. Yet personal, first-hand accounts also exist. Archival research into the

letters written by these commanders now makes it possible to include their perspectives and the way they describe their own experiences. Looking through the eyes of four Spanish commanders, 'Protagonists of War' provides the reader with an alternative reading of the Revolt, contrasting the subjective experiences of these protagonists with fictionalised perceptions.
