LAM KEMP

The SPARC Architecture Manual ISACA

This children's version of Hajjah Amina Adil's four-volume work is intended to introduce a young audience to the prophets of God and to encourage thought and discussion in the family about the eternal wisdom these stories embody.

Mobile Information Systems Saket Ghiria Classes

Audit professionals are valued members of society and are expected to be both skilled and ethical in their decision-making. The role of the auditor extends far beyond that of counting beans by demanding a social and political awareness, a technical knowledge, ethical principles and relationship skills. In addition, due to the team-oriented nature of the audit approach, auditors require strong team-building and interpersonal skills. This book offers expert descriptions of, and insights into, how such skills and responsibilities can be inculcated in tertiary education and professional training environments. Unlike other books which focus on auditing as a technical process, this volume examines auditing from a teaching and learning perspective. Expert contributors provide authoritative insights into an audit education which is embedded in accounting practice. The book's descriptions of these insights into improving education for future audit professionals may allow the introduction of new and challenging fields of enquiry. Audit Education will be of great interest to educators in tertiary institutions, trainers in professional firms, and key individuals in accounting professional bodies seeking to ensure their members possess acceptable levels of attainment for admission and continued membership. This book was originally published as a special issue of Accounting Education: an international journal.

ADVANCED MANAGEMENT ACCOUNTING Tarcher

This handbook plays a fundamental role in sustainable progress in speech research and development. With an accessible format and with accompanying DVD-Rom, it targets three categories of readers: graduate students, professors and active researchers in academia, and engineers in industry who need to understand or implement some specific algorithms for their speech-related products. It is a superb source of application-oriented, authoritative and comprehensive information about these technologies, this work combines the established knowledge derived from research in such fast evolving disciplines as Signal Processing and Communications, Acoustics, Computer Science and Linguistics.

Peak Learning Saint Philip Street Press

Aimed at digital designers, computer hardware designers and computer architects, this title deals with: algorithms and hardware for operations in conventional fixed-point number systems; algorithms and hardware for operations in floating-point number systems; and unconventional number systems.

Mental Illnesses University of Chicago Press

A grand summary and synthesis of the tremendous amount of data now available in the post genomic era on the structural features, architecture, and evolution of the human genome. The authors demonstrate how such architectural features may be important to both evolution and to explaining the susceptibility to those DNA rearrangements associated with disease. Technologies to assay for such structural variation of the human genome and to model genomic disorders in mice are also presented. Two appendices detail the genomic disorders, providing genomic features at the locus undergoing rearrangement, their clinical features, and frequency of detection.

Students Guide To Income Tax (including Service Tax, Vat) Springer Science & Business Media

This book presents a framework for mobile information systems, focusing on quality of service and adaptability at all architectural levels. These levels range from adaptive applications to e-services, middleware, and infrastructural elements, as developed in the "Multichannel Adaptive Information Systems" (MAIS) project. The design models, methods, and tools developed in the project allow the realization of adaptive mobile information systems in a variety of different architectures.

CALL in a climate of change: adapting to turbulent global conditions - short papers from EUROCALL 2017 Springer

2017 saw the 25th conference for the European Association of Computer-Assisted Language Learning (EUROCALL). Every year, EUROCALL serves as a rich venue to share research, practice, new ideas, and to make new international friends - and this year was no different. It is an innovative and inspiring conference in which researchers and practitioners share their novel and insightful work on the use of technology in language learning and teaching. This volume of short papers captures the pioneering spirit of the conference and you will find here both inspiration and ideas for theory and practice.

CA INTER EIS-SM MCQ Book Thomson Brooks/Cole

Learning and memory processes are basic features of human existence. They allow us to (un)consciously adapt to changes in our social and physical environment in a variety of ways and may have been a precursor for survival in human evolution. Through several reviews and original work the book focuses on three key topics that enhanced our understanding of the topic in the last twenty years: first, the role of real-time auditory feedback in learning, second, the role of motor aspects for learning and memory, and third, representations in memory and the role of sleep on memory consolidation. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Springer Handbook of Speech Processing Research-publishing.net

This volume combines some of the most influential published research in this emerging field with newly commissioned essays on the issues, problems and lessons involved in collaborating museums and source communities. Focusing on museums in the UK, North America and the Pacific, the book highlights three areas which demonstrate the new developments most clearly: the museum as field site or 'contact zone' - a place which source community members enter for purposes of consultation and collaboration visual repatriation - the use of photography to return images of ancestors, historical moments and material heritage to source communities exhibition case studies - these are discussed to reveal the implications of cross-cultural and collaborative research for museums, and how such projects have challenged established attitudes and practices. As the first overview of its kind, this collection will be essential reading for museum staff working with source communities, for community members involved with museum programmes, and for students and academics in museum studies and social anthropology.

Food and Culture Springer Science & Business Media

This book constitutes the thoroughly refereed post-conference proceedings of the workshops held at the 37th International Symposium on Computer Architecture, ISCA 2010, in Saint-Malo, France, in June 2010. The 28 revised full papers presented were carefully reviewed and selected from the lectures given at 5 of these workshops. The papers address topics ranging from novel memory architectures to emerging application design and performance analysis and encompassed the following workshops: A4MMC, applications for multi- and many-cores; AMAS-BT, 3rd workshop on architectural and micro-architectural support for binary translation; EAMA, the 3rd Workshop for emerging applications and many-core architectures; WEED, 2nd Workshop on energy efficient design, as well as WIOSCA, the annual workshop on the interaction between operating systems and computer architecture.

Students Guide To Accounting Standards (Ca-Pe-II) Univ of California Press

The first book to introduce computer architecture for security and provide the tools to implement secure computer systems This book provides the fundamentals of computer architecture for security. It covers a wide range of computer hardware, system software and data concepts from a security perspective. It is essential for computer science and security professionals to understand both hardware and software security solutions to survive in the workplace. Examination of memory, CPU architecture and system implementation Discussion of computer buses and a dual-port bus interface Examples cover a board spectrum of hardware and software systems Design and implementation of a patent-pending secure computer system Includes the latest patent-pending technologies in architecture security Placement of computers in a security fulfilled network environment Co-authored by the inventor of the modern Computed Tomography (CT) scanner Provides website for lecture notes, security tools and latest updates

Dictionary of Acronyms and Technical Abbreviations Springer Science & Business Media

These proceedings represent the work of contributors to the 18th European Conference on Research Methodology for Business and Management Studies (ECRM 2019), hosted by Wits Business School, University of Witwatersrand, Johannesburg, South Africa on 20-21 June 2019. The Conference Chair is Prof. Anthony Stacey, from Wits Business School and the Programme Chair is Prof. Louise Whittaker, from University of Pretoria. ECRM is now a well-established event on the academic research calendar and now in its 18th year the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research. This year marks the first time the European Conference on Research Methodology for Business and Management Studies has been hosted outside of Europe. We are pleased to take the conference on tour to South Africa in order to facilitate a wider and more diverse range of participants. The opening keynote presentation is given by Prof. Dan Remenyi, who is extraordinary professor at the University of the Western Cape, on the topic of Being a Successfully Published Academic Researcher. The second day of the conference will open with an address by Dr Jayshina Punwasi, Clinical Manager at the Helen Joseph Hospital in Gauteng, who's talk is entitled From Clinician to Researcher to Manager: The Practical Application of Research Methodology. With an initial submission of 129 abstracts, after the double blind, peer review process there are 42 Academic research papers and 3 PhD research papers published in these Conference Proceedings. These papers represent research from Australia, Bahrain, Cameroon, Canada, China, Czech Republic, Denmark, Estonia, Ireland, Netherlands, New Zealand, Poland, Portugal, Romania, South Africa, Spain, United Kingdom, United States of America and Zimbabwe.

Charts and Notes Research-publishing.net

This remarkable workbook includes tips, Big Picture Outlines and LawTutors' own Charts for Torts, Criminal Law, Criminal Procedure, Civil Procedure, Evidence, Contracts, Property and Constitutional Law. Created by LawTutors' President Tania Shah and the LawTutors team by carefully selecting the most effective way to convey large amounts of information into condensed formats, giving the student the opportunity to add their own notes and examples as well. This is the perfect study aid for law students and bar students alike, and can be effectively used in conjunctions with LawTutors' MiniEssays and Big Picture Questions.

Vocational Development BoD – Books on Demand

The two-volume set LNCS 10896 and 10897 constitutes the refereed proceedings of the 16th International Conference on Computers Helping People with Special Needs, ICCHP 2018, held in Linz, Austria, in July 2018. The 101 revised full papers and 78 short papers presented were carefully reviewed and selected from 356 submissions. The papers are organized in the following topical sections: Web accessibility in the connected world; accessibility and usability of mobile platforms for people with disabilities and elderly persons: design, development and engineering; accessible system/information/document design; accessible e-learning - e-learning for accessibility/AT; personalized access to TV, film, theatre, and music; digital games accessibility; accessibility and usability of self-service terminals, technologies and systems; universal learning design; motor and mobility disabilities: AT, HCI, care; empowerment of people with cognitive disabilities using digital technologies; augmented and alternative communication (AAC), supported speech; Art Karshmer lectures in access to mathematics, science and engineering; environmental sensing technologies for visual impairment; 3D printing in the domain of assistive technologies (AT) and do it yourselves (DIY) AT; tactile graphics and models for blind people and recognition of shapes by touch; access to artworks and its mediation by and for visually impaired people; digital navigation for people with visual impairments; low vision and blindness: human computer interaction; future perspectives for

ageing well: AAL tools, products, services; mobile healthcare and m-health apps for people with disabilities; and service and information provision.

Computer Architecture and Security Elsevier

Dynamic System Reconfiguration in Heterogeneous Platforms defines the MORPHEUS platform that can join the performance density advantage of reconfigurable technologies and the easy control capabilities of general purpose processors. It consists of a System-on-Chip made of a scalable system infrastructure hosting heterogeneous reconfigurable accelerators, providing dynamic reconfiguration capabilities and data-stream management capabilities.

Dynamic System Reconfiguration in Heterogeneous Platforms Springer

"Embedded Computing is enthralling in its clarity and exhilarating in its scope. If the technology you are working on is associated with VLIWs or "embedded computing", then clearly it is imperative that you read this book. If you are involved in computer system design or programming, you must still read this book, because it will take you to places where the views are spectacular. You don't necessarily have to agree with every point the authors make, but you will understand what they are trying to say, and they will make you think." From the Foreword by Robert Colwell, R&E Colwell & Assoc. Inc The fact that there are more embedded computers than general-purpose computers and that we are impacted by hundreds of them every day is no longer news. What is news is that their increasing performance requirements, complexity and capabilities demand a new approach to their design. Fisher, Faraboschi, and Young describe a new age of embedded computing design, in which the processor is central, making the approach radically distinct from contemporary practices of embedded systems design. They demonstrate why it is essential to take a computing-centric and system-design approach to the traditional elements of nonprogrammable components, peripherals, interconnects and buses. These elements must be unified in a system design with high-performance processor architectures, microarchitectures and compilers, and with the compilation tools, debuggers and simulators needed for application development. In this landmark text, the authors apply their expertise in highly interdisciplinary hardware/software development and VLIW processors to illustrate this change in embedded computing. VLIW architectures have long been a popular choice in embedded systems design, and while VLIW is a running theme throughout the book, embedded computing is the core topic. Embedded Computing examines both in a book filled with fact and opinion based on the authors many years of R&D experience. Features: · Complemented by a unique, professional-quality embedded tool-chain on the authors' website, <http://www.vliw.org/book> · Combines technical depth with real-world experience · Comprehensively explains the differences between general purpose computing systems and embedded systems at the hardware, software, tools and operating system levels. · Uses concrete examples to explain and motivate the trade-offs.

My Little Lore of Light Springer Science & Business Media

The computing world today is in the middle of a revolution: mobile clients and cloud computing have emerged as the dominant paradigms driving programming and hardware innovation today. The Fifth Edition of Computer Architecture focuses on this dramatic shift, exploring the ways in which software and technology in the cloud are accessed by cell phones, tablets, laptops, and other mobile computing devices. Each chapter includes two real-world examples, one mobile and one datacenter, to illustrate this revolutionary change. Updated to cover the mobile computing revolution Emphasizes the two most important topics in architecture today: memory hierarchy and parallelism in all its forms. Develops common themes throughout each chapter: power, performance, cost, dependability, protection, programming models, and emerging trends ("What's Next!") Includes three review appendices in the printed text. Additional reference appendices are available online. Includes updated Case Studies and completely new exercises.

Computer Architecture Springer Science & Business Media

Made to be Seen brings together leading scholars of visual anthropology to examine the historical development of this multifaceted and growing field. Expanding the definition of visual anthropology beyond more limited notions, the contributors to Made to be Seen reflect on the role of the visual in all areas of life. Different essays critically examine a range of topics: art, dress and body adornment, photography, the built environment, digital forms of visual anthropology, indigenous media, the body as a cultural phenomenon, the relationship between experimental and ethnographic film, and more. The first attempt to present a comprehensive overview of the many aspects of an anthropological approach to the study of visual and pictorial culture, Made to be Seen will be the standard reference on the subject for years to come. Students and scholars in anthropology, sociology, visual studies, and cultural studies will greatly benefit from this pioneering look at the way the visual is inextricably threaded through most, if not all, areas of human activity.
