This investigation studies the participle in the Hebrew manuscripts from the Judaeen Desert, its formation, its usage, and its meaning, compared with those in other Hebrew traditions and dialects,

especially the language of the Hebrew Bible. Diese Studie untersucht das Partizip in den hebräischen Handschriften aus der judäischen Wüste, seine Bildung, seine Verwendung und seine Bedeutung, im Vergleich mit anderen hebräischen Traditionen und Dialekten, vor allem der Sprache der hebräischen Bibel. *A Dictionary of the English and German Languages, with a Synopsis of*

The twentieth century is the period during which the history of Greek mathematics reached its greatest acme. Indeed, it is by no means exaggerated to say that Greek mathematics represents the unique field from the wider domain of the general history of science which was included in the

research agenda of so many and so distinguished scholars, from so varied scientific communities (historians of science, historians of philosophy, mathematicians, philologists, philosophers of science, archeologists etc.), while new scholarship of the highest quality continues to be produced. This volume includes 19 classic papers on the history of Greek mathematics that were

published during the entire 20th century and affected significantly the state of the art of this field. It is divided into six self-contained sections, each one with its own editor, who had the responsibility for the selection of the papers that are republished in the section, and who wrote the introduction of the section. It constitutes a kind of a Reader book which is today, one

century after the first publications of Tannery, Zeuthen, Heath and the other outstanding figures of the end of the 19th and the beginning of 20th century, rather timely in many respects. Law Dictionary

This volume contains the major result of the work undertaken by the international research group "Transfer of Movables" which belonged to the Study Group on a European Civil Code. It covers the most important aspects of the law of

property in movables, such as the transfer of ownership based on the transferor's right and the good faith acquisition of ownership. The suggested black letter provisions are accompanied by extensive explanatory comments and comparative notes providing information on the existing rules of the EU Member States. As compared to Book VIII of the DCFR, this volume contains

additional and partly revised national notes, extended comments, translations of the black letter rules and adapted registers. The "Principles of European Law" are published in co-operation with Oxford University Press and Staempfli (Switzerland). second language who began acquisition as adults are rarely the object of second language acquisition research. In the study described in this book, the speech of 36 advanced learners of German, 20 of whom were considered to have "near-native" proficiency was recorded, transcribed and analyzed according to the "Quaestio Model". The focus of the study was the information

structure of the learners' spoken texts and its implications for word order. The study revealed differences in the information structure of texts of learners and native German speakers even for those learners whose performance was nearly indistinguishable from L1 German speakers. The author discusses possible reasons for these

differences, suggests implications for second language acquisition theory and draws up lesson plans for using the insights brought forth by the study for the second language and translation classrooms.
