It is amazing how a camel can survive the harsh deserts and the hottest spots in the world. The reason for this lies in the way their bodies are designed. Their humps are very important for survival. Even without food and water for many days, the fats in the humps provide for these necessities. Their facial features are also very helpful

in the desert travels. Their noses can close. They have extra eyelids and long lashes. These all keep the desert sand from getting into their lungs and eyes. They have thick lips so that they are able to eat even the thorny plants in the desert. These are just some of the amazing things to know about a camel. In this book you will find many more interesting facts to add to what you already know about them. You will learn what they eat, drink, and how they survive in the desert. You will learn about their domesticated lives, what they do and how they are useful to

humans. Some of the questions you might have about camels will be answered in this book. Questions like: Are camels aggressive animals? What do they do if they are threatened by humans? What is a bachelor herd? Do they have predators? What is a Bactrian camel? What is an F1 camel? Who are the camel's relatives? This book also contains more than 20 colorful photographs of the camel in its natural habitat. These photos will help you understand the life of a camel better. *Resource Conservation Createspace Independent Publishing Platform*

Camels are first mentioned in the Bible as the movable property of Abraham. During the early monarchy, they feature prominently as long-distance mounts for the Queen of Sheba, and almost a millennium later, the Gospels tell us about the impossibility of a camel passing through a needle's eye. Given the limited extrabiblical evidence for camels before circa 1000 BCE, a thorough investigation of the spatio-temporal history of the camel in the ancient Near and Middle East is necessary to understand their early appearance in the Hebrew Bible. *Camels in the Biblical World* is a two-part study that charts the cultural trajectories of two domestic species—the two-humped or Bactrian camel (*Camelus bactrianus*) and the one-humped or Arabian camel (*Camelus dromedarius*)—from the fourth through first millennium BCE and up to the first century CE. Drawing on archaeological camel remains, iconography, inscriptions, and other text sources, the first part reappraises the published data on the species' domestication and early exploitation in their respective regions of origin. The second part takes a critical look at the

various references to camels in the Hebrew Bible and the Gospels, providing a detailed philological analysis of each text and referring to archaeological data and zoological observations whenever appropriate. A state-of-the-art evaluation of the cultural history of the camel and its role in the biblical world, this volume brings the humanities into dialogue with the natural sciences. The novel insights here serve scholars in disciplines as diverse as biblical studies, (zoo)archaeology, history, and philology.  Did you know that the fat in the Bactrian camel's hump can be converted into energy when food and water are scarce? Desert animals have many adaptations that protect them from extreme temperatures and drought. Discover these and other intriguing facts in *Resource Conservation*. The *Animal Adaptations* series introduces readers to some of the most fascinating characteristics, habits, and abilities that animals have developed over time. Readers explore the physical traits and behaviors that make different animal species unique. Each title includes

stunning photos, fun facts, and easy-to-read text. This is series of AV2 media enhanced books. A unique book code printed on page 2 unlocks exciting online content that brings the book to life. Readers can access embedded weblinks, audio and video clips, activities, and other features, such as slide show, matching word activity, and quiz. Book jacket.

14 Fun Facts About Camels: A 15-Minute Book Independently Published The highlighting method used in this workbook helps the student concentrate and improve the ability to read more effectively. Short pieces of text are used to teach the strategies to the students and improve their accuracy and mastery before proceeding to longer text. Students are provided with repeated drill and practice to understand and reinforce the following Common Core Reading Strategies. In this LEVEL 5 book, students will learn about the characteristics, habits, and fun facts of different animals. They will read about animals they know, and learn about others!

Bactrian camel: Amazing Photos & Fun Facts Book About Bactrian camel For Kids *Life in the Gobi Desert* Independently Published Discover the desert in this fact-packed leveled reader! Welcome to the Gobi Desert, where you can find camels, scorpions, and even snow leopards! Explore this huge habitat and meet the many creatures that call it home. But keep an eye out for the ones that are no longer alive, too--the Gobi may have more dinosaur fossils than any other place on Earth! Learn more about this amazing place as well as how you can help protect and preserve it for future generations. *Bactrian Camel* Hachette UK There are thousands of species of animals here on our Earth sharing our planet. Some are well known while others are not as common. Just like human beings, animals are individuals and have their own stories. ANiTAiLS is a way for you to learn about 10 different species of animals. In ANiTAiLS Volume Twenty-One you will learn about Oliver the Bactrian Camel, Jack the Ringed Teal, Andrea the Black-Necked Swan, Andrew the Cownose Ray, Braxton the Bobcat, Linda the Spider Tortoise,

Leigh the Short-Beaked Echidna, Kevin the Chinook Salmon, Jennifer the King Quail, and Shelby the Mule Deer. You will gain greater understanding about each species by reading a short story based on facts. You will then have the opportunity to complete a crossword puzzle and take a multiple choice quiz to test your knowledge. A coloring page is included after each quiz for those of you who like to color.

Bogart the Camel High Noon Books

This book of photography represents

National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks

to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet. *Bactrian Camel* Createspace Independent Publishing Platform
