The Oxford History of Anglicanism, Volume V Oxford University Press

Ethnic Patriotism and the East African Revival shows how, in the era of African political independence, cosmopolitan Christian converts struggled with East Africa's patriots over the definition of culture and community. The book traces the history of the East African Revival, an evangelical movement that spread through much of eastern and central Africa. Its converts offered a subversive reading of culture, disavowing their compatriots and disregarding their obligations to kin. They earned the ire of East Africa's patriots, who worked to root people in place as inheritors of ancestral wisdom. This book casts religious conversion in a new light: not as an inward reorientation of belief, but as a political action that opened up novel paths of self-narration and unsettled the inventions of tradition.

How does a book become an international bestseller? What happens to it as it is translated into different languages, contexts, and societies? How is it changed by the intellectual environments it encounters? What does the transnational circulation mean for its reception back home? Exploring the international life of a particularly long-lived and widely traveled book, Isabel Hofmeyr follows *The Pilgrim's Progress* as it circulates through multiple contexts--and into some 200 languages--focusing on Africa, where 80 of the translations occurred. This feat of literary history is based on intensive research that criss-crossed among London, Georgia, Kingston, Bedford (John Bunyan's hometown), and much of sub-Saharan Africa. Finely written and unusually wide-ranging, it accounts for how *The Pilgrim's Progress* traveled abroad with the Protestant mission movement, was adapted and reworked by the societies into which it traveled, and, finally, how its circulation throughout the empire affected Bunyan's standing back in England. The result is a new intellectual approach to Bunyan--one that weaves together British, African, and Caribbean history with literary and translation studies and debates over African Christianity and mission. Even more important, this book is a rare example of a truly worldly study of "world literature"--and of the critical importance of

translation, both linguistic and cultural.

This book offers a variety of approaches to children's literature from a postcolonial perspective that includes discussions of cultural appropriation, race theory, pedagogy as a colonialist activity, and multiculturalism. The eighteen essays divide into three sections: Theory, Colonialism, and Postcolonialism. The first section sets the theoretical framework for postcolonial studies; essays here deal with issues of "otherness" and cultural difference, as well as the colonialist implications of pedagogic practice. These essays confront our relationships with the child and childhood as sites for the exertion of our authority and control. The second section presents discussions of the colonialist mindset in children's and young-adult texts from the turn of the century. Here, works by writers of animal stories in Canada, the U.S., and Britain; works of early Australian colonialist literature; and Frances Hodgson Burnett's *A Little Princess* come under the scrutiny of our postmodern reading practices. Section Three deals directly with contemporary texts for children that manifest both a postcolonial and a neo-colonial content, and includes studies of children's literature from Canada, Australia, Africa, the Caribbean, and the United States.

The Portable Bunyan Univ. Press of Mississippi

"The Oxford history of Anglicanism" is a major new and unprecedented international study of the identity and historical influence of one of the world's largest versions of Christianity. This global study of Anglicanism from the sixteenth century looks at how was Anglican identity constructed and contested at various periods since the sixteenth century; and what was its historical influence during the past six centuries. It explores not just the ecclesiastical and theological aspects of global Anglicanism, but also the political, social, economic, and cultural influences of this form of Christianity that has been historically significant in western culture, and a burgeoning force in non-western societies today. The chapters are written by international experts in their various historical fields which includes the most recent research in their areas, as well as original research. The series forms an invaluable reference for both scholars and interested non-specialists. Volume one of The Oxford History of Anglicanism examines a period when the nature of 'Anglicanism' was still heavily

contested. Rather than merely tracing the emergence of trends that we associate with later Anglicanism, the contributors instead discuss the fluid and contested nature of the Church of England's religious identity in these years, and the different claims to what should count as 'Anglican' orthodoxy. After the introduction and narrative chapters explain the historical background, individual chapters then analyse different understandings of the early church and church history; variant readings of the meaning of the royal supremacy, the role of bishops and canon law, and cathedrals; the very diverse experiences of religion in parishes, styles of worship and piety, church decoration, and Bible usage; and the competing claims to 'Anglican' orthodoxy of puritanism, 'avant-garde conformity' and Laudianism.

Heart of Darkness Cambridge University Press

Author Samuel Ndogo offers an understanding of the autobiographical genre in contemporary Kenyan literature. He draws attention to life-writing as a form of cultural re-imagination in post-colonial Africa. Taking into consideration contradictions and paradoxes of referentiality in life writing, this book examines the autobiographies of Jaramogi Oginga Odinga, Ngugi wa Thiong'o, Wangari Maathai, and Bethwell Ogot. The analysis dwells on self-representations in correlation with imaginations of the 'Kenyan nation' in these works. Thus, the study gives a critical account into the modern memoir: the forms and styles it takes, the ways in which these authors tend to understand and present their lives. Ethnic Patriotism and the East African Revival [Syracuse, N.Y.] : Program of Eastern African Studies, Syracuse University

The Oxford History of Anglicanism provides a global study of Anglicanism from the sixteenth century

to the twenty-first. The five volumes in the series look at how Anglican identity was constructed and contested since the English Reformation of the sixteenth century, and examine its historical influence during the past six centuries. They consider not only the ecclesiastical and theological aspects of global Anglicanism, but also the political, social, economic, and cultural influences of this form of Christianity that has been historically significant in Western culture, and a burgeoning force in non-Western societies since the nineteenth century. Written by international experts in their various historical fields, each volume analyses the varieties of Anglicanism that have emerged. The series also highlights the formal, political, institutional, and ecclesiastical forces that have shaped a global Anglicanism; and the interaction of Anglicanism with informal and external influences which have both moulded Anglicanism and been fashioned by it. Volume five of The Oxford History of Anglicanism considers the global experience of the Church of England in mission and in the transitions of its mission Churches towards autonomy in the twentieth century. The Church developed institutionally, yet more than the institutional history of the Church of England and its spheres of influence is probed. The contributors focus on what it has meant to be Anglican in diverse contexts. What spread from England was not simply a religious institution but the religious tradition it intended to implant. The volume addresses questions of the conduct of mission, its intended and unintended consequences. It offers important insights on what decolonization meant for Anglicans as the mission Church in various global locations became self-reliant. This study breaks new ground in describing the emergence of an Anglicanism shaped more contextually than externally. It illustrates how Anglicanism became enculturated across a broad swath of cultural contexts. The influence of context, and the challenge of adaption to it, framed Anglicanism's twentieth-century experience.
