Unbelievable Pictures and Facts About Belgium Books by Cooper
 Smart Kids Presents...Constellations- Unbelievable Pictures and Facts about Constellations. Have you children ever wondered if there are patterns in the sky? What is a constellation? How many constellations are there? In this book you will explore the wonders of constellations finding the answers to these questions and so many more. Complete with incredible pictures to keep even the youngest of children captivated, you will all embark on a little journey into the great unknown. In school our children aren't taught in a way that makes them curious and wants to learn. I want to change that! This book will show your children just how interesting the world is and help ignite a passion for learning. Your children will learn how to: Become curious about the world around them. Find motivation to learn. Use their free time to discover more about the world-and have fun while doing so! And much more!

Walt Disney: 84 Fascinating Facts for Kids Independently Published

From asteroids to zodiac constellations--500 amazing space facts for kids ages 8 to 12 Do you know a kid who wants to know all about space? This intergalactic entry into space books for kids is bursting with 500 out-of-this-world facts for hours of space exploration from the comfort of Earth. Alongside full-color pictures on every page, kids can adventure through stars, planets, and space technology with this book of astronomy for kids. Go beyond other space books for kids with trivia such as: Mars is often referred to as the red planet because its surface is red due to iron oxide, or rust. The average lifespan of a star is 10 billion years. All the other planets in our solar system could fit between Earth and its moon. Kids will light up as they discover ice giants and famous astronomers with this standout among space books for kids.

Earth Fun Fact for Kids Scholastic Inc.

As a stay-at-home mom and former teacher, I understand how difficult it can be to explain space to young children. I am here to help with some simple facts about space that can help your kids understand how big our universe really is. This fact sheet has fun facts about Jupiter, Saturn, and Uranus. You can use it to make your own celestial model. Remember to use a simple model of the moon and planets to illustrate the different concepts.The first step in teaching your child about space is to show them the sun. The sun is a dwarf star, which means it is smaller than our sun. Giant stars are called red giants, and they can swallow entire orbits of Saturn. Dwarf stars, on the other hand, live for trillions of years, while larger stars only live for a few million years. In order to get your child excited about space, start by sharing some cool facts about space.You can show your child facts about space by pointing out that the sun and planets are made of stars. These stars are also called dwarfs. Their mass is one hundred and eight times less than the Sun's, and they are very similar. The moon is a giant, but it is a red giant. Compared to the Sun, a neutron star can absorb Saturn's entire orbit. Despite their differences, the sun and planets have much in common.

Subtraction Facts that Stick Racehorse for Young Readers

The fun, engaging program that will help your child master the subtraction facts once and for all—without spending hours and hours drilling flash cards! Subtraction Facts That Stick will guide you, step-by- step, as you teach your child to understand and memorize the subtraction facts, from 1 - 1 through 9 - 9. Hands-on activities, fun games your child will love, and simple practice pages help young students remember the subtraction facts for good. In 15 minutes per day (perfect for after school, or as a supplement to a homeschool math curriculum) your child will master the subtraction facts, gain a greater understanding of how math works, and develop greater confidence, in just six weeks! Mastery of the math facts is the foundation for all future math learning. Lay that foundation now, and make it solid, with Subtraction Facts That Stick!

The Trivia Challenge Vintage

Uncle John's fabulous and fascinating For Kids Only reader is back. No parents allowed! We admit it: Uncle John wasn't a great student. He'd rather draw plungers or make fart noises than read boring school books. So we made this book with little Uncle John in mind. It's full of fun facts and funny illustrations--all designed to make your teacher squirm. It's got the weird. It's got the wacky. And it definitely has the gross. So hide this book from the grownups as you check out . . . * Icky eats: fried spiders and candy-coated larvae * Hunting for real hidden treasures * The history of doughnuts * How to make armpit farts * Goofball students who grew up to be president * Wrong facts your teacher thinks are true Plus dumb crooks, amazing kids, animal oddities, and a whole lot more!

Interesting Facts for Smart Kids National Geographic Books

Did you know that becoming a knight took three steps? Or that piggyback was part of the training? Those are just some of the fascinating tidbits kids will discover in 10 Fascinating Facts About Knights.

The Fascinating Space Book for Kids Yale University Press

Do you know that the Ostrich is the fastest running land bird?And do you know that the largest Ostrich egg ever laid was over five pounds?It is sometimes difficult to make our children understand the beauty of nature, to make them appreciate the small things, the beauty of a flower, the freshness of the air, the scent of grass. Many times we are not fortunate to be in contact with nature, far from a meadow, closed in the cities. Still, so often, while looking out from our balcony in a beautiful country house, we know how to observe but do not appreciate creation's beauty.Know the details and habits of a Ostrich as common as it is surprising, through a simple path, which fuels your child's interest and curiosity. That's the purpose of this book.But beware, prepare for the challenge!You will have to be able to answer the questions that your child will ask you by showing

off their deep knowledge in the microworld of the Ostrich: -Mom, do you know what the symbol of Ostrich represents? I do!-Hey dad, do you know how long Ostriches normally live? I do!-Grandpa, do you know long it takes for a baby Ostrich to be the same size as their parents? I do!-Grandma, do you know what the Ostrich is doing when they stick their head in the ground? I do!-Sarah, you're my big sister, and you've studied a lot, but I bet you don't know what Ostrich use their feathers for! I know that.You don't need anything else; just one click on "Buy Now," and you will let your child live a magical new adventure with his new friend Ostrich and the magic natural world of birds.

Ignite their passion for exploring the night sky—the astronomer's guidebook for kids ages 7 to 13 “No matter how many times you’ve orbited the Sun, Astronomy for Kids is really for kids of all ages. Dr. Betts shows you how to become an astronomer—an observer of the stars. With this book, you can know the cosmos and your place within it. Read on, walk out, and look up!”—Bill Nye, science educator, author, and CEO of The Planetary Society One of the coolest things about outer space is that anyone can explore it. All you have to do is go outside and look up! Using plain sight, binoculars, or a small telescope, Astronomy for Kids shows stargazers how easy it is to explore space, just by stepping outside. With this book as their guide to the northern hemisphere, kids will

learn to find and name amazing objects in the night sky. Fully illustrated with fun facts throughout, kids can point out sights to friends and family, saying things like, “that’s Jupiter,” and, “those stars are the constellation Cygnus the Swan,” and maybe even, “that group of stars doesn’t have a name but I think it looks like my dog getting belly rubs.” From the Milky Way Galaxy to Mars to the Moon’s craters and mountains—Astronomy for Kids helps young astronomers discover important parts of our solar system, with: 30 sights for the naked eye (yes, 30!) objects to see without any equipment, including Orion’s Belt, the Big Dipper, Mars, and even the International Space Station. 25 sights magnified with binoculars or a basic telescope to make objects in the sky easier to find and explore. Plus, buying tips and usage tricks to get the most out of astronomy equipment. Clear illustrations that show kids where to look and what they can expect to see. Like all big things, outer space is something you have to see to believe. Astronomy for Kids teaches kids that planets, shooting stars, constellations, and meteor showers are not only in books—but right above them.

Make learning about STEM fun in this colorful chemistry activity book! Science, Technology, Engineering, and Math (STEM) are subjects crucial to children’s education. In these illustrated pages, your boy or girl will be immersed in the world of STEM through science and chemistry! Filled with activities such as mazes, spot the difference, drawing, puzzles, pattern identifying, quizzes, and more, this book will introduce your child to the fascinating science of chemistry. While they think they’re just playing games and looking at fun infographics, they’ll actually be learning about the elements, matter, atoms, chemicals, and more. In this series of educational workbooks your child will not only be entertained for hours, but also be familiarized with the just some of the STEM subjects that are so important to our society. The books in this series aim to pique the interest of children in these areas of study, stress the importance of these subjects, and help encourage children who are interested to continue within these fields as they grow and learn. Introduce your child to STEM subjects today through STEM Starters for Kids: Chemistry Activity Book!

[Hey Kids! Let's Visit Charleston South Carolina](#) Rockridge Press

You've probably seen some of these images of stars in the night sky, but did you know that they are not actually real? Stars are spherical bodies composed of plasma and held together by gravity. While our Sun is the nearest star to Earth, there are many other stars visible to the naked eye. At a distance, stars appear as fixed points of light. Let's examine a few Stars Facts. Stars are giant balls of hot gas, called plasma, held together by gravity. All stars are bigger than the sun, but only some are brighter than our sun. Alpha Centauri is the least luminous star, but it is about 1.5 times brighter than the sun. All stars are very different, but they all have some characteristics in common. Read on for more fun facts about the stars. These facts will help you engage your children and answer their burning questions about the universe. The sun converts 4 million metric tons of hydrogen every second into energy. That is equivalent to a hundred billion hydrogen bombs. By harnessing solar energy, we could survive on the planet for 500,000 years, which would be incredible. However, it is still not clear whether this energy will be useful in the near future. There are still plenty of other facts to learn about the stars and how to make the most of them. So, start exploring!
